A Land Without Flies. It should be refreshing and a bit Mr. and Mrs. Joshua Humphrey and British West Indies. This interesting fact-that there are no flies in British West Indies - starts up a number of questions and curious conjectures. Why is it that they have no flies? It is that they have lost the seed, or is it that they have some active paradise or animal that feeds on flies, like the South American ant eater, for instance? Certainly it is not that they have no fifth. They have heat and moisture, and, if rumor has it true, they have all the filth that is necessary. That these three conditions can exist without any flies is what we do not understand .-- North Carolina Health Board

Archbishop of Canterbury Would Retort By Christian Expression London, July 2.—England needs short, ejaculatory prayers as a Christian antidote to the German "Gott Strafe England" (God punish Eng-
