For One Week Only Cut prices on Auto Tires -all sizes.

BIBBY GARAGE, Dodge Bros.' Agents. Tel. 201 and 917.

This is a section of both Tube and Tire. The Inner Tube is pictured to show the layers which compose it. In completed Tubes these layers, of course, are vulcanized together into one solid rubber Tube.

Goodyear Tubes Can't Leak They Outlast Any Tire

Inner tubes are made to hold air. Those that are made of one thick piece of rubber are apt to be porous. Neither can foreign matter be detected. So the air escapes and your tires run into trouble. Tubes that are colored contain much mineral matter. That heats up under friction and destroys the tube before its time.

Goodyear Inner Tubes are made of thin sheets of pure natural gray rubber. So the slightest flaw is detected and eliminated. Then these perfect sheets are wrapped layer on layer and vulcanized into an inseparable unit. The valve patch, too, is made part of the tube. It is not stuck on. And so our method makes the tube proof against inherent leaks.

14% Heavier

Countless tests have roved that Goodyear Laminated Inner Tubes outlast. on the average, any tire

Yet since those tests we have added extra layers. The smaller sizes are 1236 per cent thicker, the larger sizes
