FREE ADVICE TO SICK WOMEN
Thousands Have Been Helped By Common Sense Suggestions.
Women suffering from any form of female ill are invited to communicate promptly with the woman's private correspondence department of the Lydia E. Pinkham Medicine Co., Lynn, Mass.

Every woman ought to have Lydia E. Pinkham's 80-page Text Book. It is not a book for general distribution, as it is too expensive. It is free and only obtainable by mail. Write for it today.
Those who suffer in silence usually have a lot to say about it later.

General Information for Busy People

The Good Old Times.
At one time in Home political offices were auctioned off in public to the highest bidder. In ancient Greece they were not considered so much of a disgrace as being caught at it.

Setting a Fashion.
Some years ago the coral fishers of Torre del Greco, near Naples, were in hard straits. The value of coral had fallen so low that they were no longer able to find purchasers for their harvest.

The Chinaman's Wardrobe.
In "Home Life in China" issue Taylor Headland tells the following story to illustrate the conveniences of the Chinese costume:

A Rare Bird.
The loveliest form of bird life which exists is believed to be the kiwi, or Apteryx nantuli, of New Zealand. It is so scarce, however, that scientists consider themselves lucky to get a specimen in any condition.

Explained.
When he came in late he said to his waiting wife, "See, the nice present I brought you."

Chesterfield on Dress.
"Who you are once well dressed for the day," wrote Chesterfield, "think no more of it. Always find without any stiffness or fear of discomposing that dress let all your actions be as easy and natural as if you had no clothes on at all."

An Unkind Retort.
"Who made a fool of me?" exclaimed the angry husband.

Honest, Anyhow.
"Who you are marrying the man of your choice?"

Quits Manly.
Mother—I'm afraid you are overreacting. Tommy (keeping on)—I ain't afraid. Women get scared at things you men do.

Cold Proposition.
Hubb—Meet any icebergs coming over on the steamer? Gotham—Well, yes; I was introduced to a girl from Boston.

Harvest Time in Shantung.

Now, come and see a harvest in Shantung. Here, too, it is the time of supreme interest to the whole family. Life in the country is practically measured by so many wheat harvests, and every old man and woman hopes to live to see one more.

The Irish of the Balkans.
The Servians are the Irish of southeastern Europe, with all the virtues and some of the weaknesses of the Irish people. They are especially proud of their national poetry, which they possess as no other nation possesses in modern times.

Clouded Windows.
Many people have a window or a part of one which they would like barred to the too curious gaze of passers-by or, possibly, of neighbors.

It Was a Nice Stone.
General Sir John Young, the well known writer on military subjects, was once cleverly victimized by some Indian natives. At a village where he was encamping the dusky inhabitants brought to his tent a number of sapphire-like stones which they stated had been dug up at a spot some distance from the village.

TORTURING SCIATICA
A Severe Sufferer Cured Through the Use of Dr. Williams' Pink Pills.
Fierce darting pains—pains like red hot needles being driven through the flesh—in the thigh; perhaps down the legs to the ankles—that's sciatica. None but the victim can realize the torture.

Eyes of a Bird.
Fishes and birds have an advantage over human beings in their ability to see on both sides of them. Their eyes are set not for looking straight ahead, but for looking out on each side. That is because they balance their bodies to right or to left, while we balance forward and backward.

Forshadowed.
Madge—Why did you throw him over? Mabel—He would have been a very parsimonious husband. Madge—But he fairly lavished money on you during the engagement. Mabel—Yes; but as soon as we began to talk honeymoon the first thing he did was to 'book up' excursion rates.

Inconsistency.
Mrs. Bacon—He's a very inconsistent man. Mrs. Egbert—Indeed? "Yes. Why, he tried to break his boy of being left handed, and he could only punish the little fellow with his left hand."

A Great Effort.
"Quiet, children, quiet!" says the German mother in Pflogende Blätter. "Father is tired to death. He wrote a letter today that will go so very far—all the way to America."

Take Along a Hammer.
She—Have you been up to break bread with the new bride and groom yet? He—No! I'm not feeling very strong.

Self Sacrifice.

No man has ever sacrificed himself in the common meaning of that phrase, which is self-sacrifice for another alone. Men make daily sacrifice for others, but it is for their own sakes first. They must content their own spirit first. A man must feel better for doing a duty than he would for shirking it.

Brush Your Tongue.
Brush your teeth. By all means brush your teeth religiously and well, but for pity's sake brush your tongue too. Wield your brush backward and forward, under and over, to the north, to the south, to the east and west, scour it with fervor, for it is in truth a tiny forest of dense foliage wherein lurks the unseen enemy.

A Terrible Abyss.
The greatest ocean depth yet sounded is 31,330 feet, near the island of Guam. If Mount Everest, the world's highest mountain, were plucked from its seat and dropped into this spot the waves would roll 2,000 feet about its crest. Into this terrible abyss the waters press down with a force more than 10,000 pounds to the square inch.

How Plants Die.
That plants die like animals we all know, but we do not know the exact moment when they die. For hours a dead plant seems alive. There is no twitch, no death spasm. A scientist has, however, succeeded not only in noting the precise moment when a plant gives up its life, but in recording its death spasm.

Eyes of a Bird.
Fishes and birds have an advantage over human beings in their ability to see on both sides of them. Their eyes are set not for looking straight ahead, but for looking out on each side. That is because they balance their bodies to right or to left, while we balance forward and backward.

Buy now and save money. You can buy CEETEE UNDERWEAR this Fall, about one-third cheaper than you will probably have to pay for it next Fall.
"CEETEE" UNDERCLOTHING ALL PURE WOOL - GUARANTEED UNSHRINKABLE MEANS ECONOMY PLUS COMFORT.
Wool has gone up from 50 to 75% in price since war was declared, yet "CEETEE" UNDERWEAR remains the same price at present because most "CEETEE" dealers had the foresight to place their orders for fall requirements before the great advance in wool and yarns, and the fact that we had a large stock of wool on hand, therefore made up what we could out of our old stock at the old prices, but in the future we shall be compelled to charge higher prices according to the market price of wool and CEETEE UNDERWEAR will, of necessity, cost much more.

Give the firemen time to get there! It's the first ten minutes that counts most when a fire starts. Hold it that long, and there's a good chance to put it out. Let it spread, and it quickly gets beyond control, and your building is destroyed.
It is rarely practicable to build an absolutely fireproof residence—but the use of LINABESTOS AND ASBESTOSLATE FLAME-PROOF BUILDING BOARD ASBESTOS SHINGLES gives a maximum amount of fire protection at a cost very little greater than that of ordinary construction. The house is absolutely safe from falling sparks outside, and a fire starting inside is confined and strangled by Linabestos partitions.
LINABESTOS Flame-proof building board is a composition of asbestos and portland cement, that is absolutely fireproof. It is made in standard-sized sheets, and can be used as a finished surface with battens or to take a thin skin coat of plaster if a perfectly smooth surface is required for tinting, painting or papering. It is made for the interior lining of residences, cottages, bungalows, hotels; for walls and ceilings of kitchens, bathrooms, hallways, and for ventilating elevator, stair or light shafts fireproof.
ASBESTOSLATE Asbestos shingles are not only absolutely fireproof, but are practically everlasting, giving a tight, durable roof that does not require painting or repairing, and that actually gets stronger as the years pass. They give the most economical of all roofs, at the same time that their attractive appearance adds to the beauty of any building. Cost less to lay than wood, and are made in a variety of styles to harmonize with every kind of architectural treatment.
