THE LATEST TIDINGS
PRESENTED IN THE BRIEFEST POSSIBLE FORM.

The Whig's Daily Condensation of the News of the World From Telegraph Service and Newspaper Exchanges.

King George is confined to bed solely because of muscular stiffness following bruising.
Louis David Whyte, one of the oldest G. T. R. conductors, died in Toronto on Wednesday.
He was born 62 years ago in Scarborough Township, and had been "rail-roading" for forty-five years.
Edward Walters, Toronto, for stealing two coats from an east end store in Woodstock. He was sentenced to serve five years in Penitentiary.

Edith Cavell.
John O'Keefe, in New York World. Sun glint and gun glint, and sweet eyes clear with pain, And on the head of a woman dead the red cross made by Cain!

O distant ones, all white of face, Who hear the rifle roll, See the real death the true disgrace, The devil's perfect toll: A nation in the fring-place Has murdered its own soul.

Straight fire and hate fire with or without the lips one oath outslips to blow an empire down!

We saw the Tide of Terror sweep Across the Belgian plain, And women died like poisoned sheep That drop in a murrain. Then wherefore should we pause and weep For one more slain?

GERMS ON SALADS.
A Simple Method by Which All Danger May Be Avoided.

Drs. Lail and Legagneux of Paris tested vinegar as a destroyer of the germs of typhoid fever. That they are killed by a mixture of wine and water in equal parts has long been known. These investigators prove now that twenty grains of vinegar to a liter of water kill the typhoid bacilli in an hour and five minutes.

"From this," writes the Paris correspondent of the London Lancet, "a practical inference may be drawn concerning salads. After washing the salad as usual, detaching each leaf, it should be put into water acidulated with ten grains of vinegar so the leaf and remain immersed in this liquid for about an hour and a quarter. All vegetables ordinarily eaten uncooked may be subjected without any inconvenience to the same process."

A liter is equivalent to about a quart and ten grains are equivalent to about a third of an ounce. So if lettuce or other greens for salad be placed in water to which about one-third of an ounce of vinegar has been added and be left for about an hour and a quarter all danger of typhoid fever will be removed.

SIGNIFICANT MOVEMENTS.
German Envoy to Sofia Suddenly Returns To Athens.
Rome, Nov. 4.—Colonel Falkenheim, the German military attaché at Athens, who went to Sofia immediately before Bulgaria's mobilization as bearer of an autograph letter from the Kaiser to King Ferdinand, has unexpectedly returned to Athens, accompanied by two members of the staff of the German legation and several German officers. They are reported to be entrusted with a secret mission.

The arrival of Colonel Falkenheim is considered more significant and probably heralds important decisions, since, if Greece's neutrality is to be maintained throughout the war, as is now hinted, demobilization is bound to follow. It is only delayed with the object of justifying Greece's demand for payment of the second instalment of the French loan, a sum of £1,000,000, half of which has been already advanced.

Dies in 99th Year.
St. Catharines, Nov. 4.—Mrs. Margaret Hare, who was in her ninety-sixth year, is dead at Grimsby. She was a daughter of the late Col. Peter Hare, at one time paymaster for the Indians under the British Government, and was born in the township of Clinton, where is a farm adjacent to Jordan Harbor, on a farm adjacent to the present Government Experimental Farm.

OLD FOLKS NEED "CASCARETS" FOR LIVER, BOWELS

Salts, colonel, pills act on bowels like pepper acts in nostrils.

Enjoy life! Don't stay bilious, sick, headachy and constipated.

Get a 10-cent box now.

Most old people must give to the bowels some regular help, else they suffer from constipation. The condition is perfectly natural. It is just as natural as it is for old people to walk slowly. For age is never so active as youth. The muscles are less elastic. And the bowels are muscles.

So all old people need Cascarets. One might as well refuse to aid weak eyes with glasses as to neglect this gentle aid to weak bowels. The bowels must be kept active. This is important at all ages, but never so much as at fifty.

Age is not a time for harsh physics. Youth may occasionally whip the bowels into activity. But a lash can't be used every day. What the bowels of the old need is a gentle and constant aid without harm. The only such tonic is Cascarets, and they cost only 10 cents per box at any drug store. They work while you sleep.

RAILROADS IN ARGENTINA.
Run Under Rules Framed by a Strict Government Commission.

Argentina has a commission which is in some respects even more powerful than the interstate commerce commission. The direction-general de ferrocarriles, as it is named, prescribes the number of trains to be run and insists on the number of coaches. Every night train must carry a certain number of sleeping cars, and dining cars, or restaurant cars, as they are known in Argentina, are obligatory on runs of certain distance. Every train is obliged to carry a letter box, and recently the railroads have been squeezed into carrying the mails for nothing.

A medicine chest, a stretcher and a bicycle—this last to establish quick communication with the nearest station in case of an accident—are compulsory on every passenger train.

Every passenger coach is disinfected each month, and the precautions for preserving the cleanliness of sleeping cars are probably the most thorough in the world.

No time table can be altered without the sanction of the director general and at least two months in advance of their taking effect. If trains stop at stations not scheduled a heavy fine is imposed, and all late trains must be reported to the government, with the reason for being delayed.—New York Tribune.

UP TO LEGISLATURE TO RESTRICT CLUBS
Provincial License Board Can Act only in An Advisory Capacity.

Toronto, Nov. 4.—In view of the opposition apparently shown by members of certain clubs in the city as to the move set on foot for eight o'clock closing, it is worth pointing out that, under the legislation passed last session, the Ontario License Board has no power to reduce the hours of these institutions. The only way such restrictions could be brought into operation would be by legislation when the Legislature meets.

The present movement for early closing arose through a suggestion from the Chairman of the License Board that the clubs might make the sacrifice at a time like this and voluntarily close their bars at 8 o'clock. It is understood that the Cabinet has not so far considered what action might be taken next session if the clubmen after their own free will to come into line with the hotels in the matter of closing.

WAR BULLETINS.

- ♦ Germans have been withdrawn from every front for the Serbian invasion.
- ♦ The next year of war will cost Canada \$250,000,000.
- ♦ Russians have opened a general offensive on a front of more than 750 miles, capturing 5,000 Germans on the Semikovitz front.
- ♦ The food crisis in Germany is reaching alarming proportions.
- ♦ The Russian minister has warned the Persian Government against an alliance with the enemy.

DETECTION OF ZEPPELINS.
Inventor of Forest Has Submitted Device to Britain.

London, Nov. 4.—Lee de Forest, the inventor, leaves London tomorrow for the Continent after submitting to the British Government his invention of an audion amplifier, which he maintains would be of use in detecting the approach of Zeppelins.

In a talk with a correspondent tonight, Mr. de Forest was careful to say he did not know what the authorities intended to do with his invention, as he has had no definite word that they consider adopting it. Mr. de Forest intends to stay a few days in Paris to arrange preliminaries for the ultimate installation of a wireless telephone outfit across the Atlantic Ocean to New York.

Until the war is over no definite steps will be taken to inaugurate a transatlantic wireless telephone. "Any day telephony across the ocean is bound to come," he said. "We have demonstrated that it can be done, and now it is only necessary to wait until the war is through before we will set up a plant that will be put on a practical working basis."

CHURCH BELLS FOR GUNS.
Hungary Primate Talks of the Church's Sacrifice.

Budapest, Nov. 4.—The Primate of Hungary, having offered to the military authorities all of the bells of the Catholic churches of the country, the process of collection by the military authorities has now begun with great diligence.

His Eminence, in an interview, said that a conference of bishops had decided to sacrifice all bells with each tower, and thus enable the military authorities to overcome any difficulty they may have encountered in securing material for guns. In clerical circles, it is asserted, the number of bells to be collected will exceed 27,000, and that Austria will supply about the same.

School Greatly Improved.
Cape Vincent, N. Y., Nov. 4.—Many improvements at the Cape Vincent High School have been made which have added greatly to the convenience and comfort of the students this fall. Hardwood floors were placed in the study rooms and adjustable seats and desks were installed. Drinking fountains, paper towels and liquid soap instruments have also been placed in the school for the convenience of the children.

Netherlands May Demobilize.
London, Nov. 4.—A despatch to Reuter's from the Hague says: "Major-General C. J. Snijders, commander-in-chief of the Netherlands' land and sea forces, attended a council of ministers to-day, from which fact it is deduced that he discussed the proposals for the eventual demobilization of the Netherlands' forces as contained in the report of the committee of the second chamber on the budget for 1916."

EVERYBODY NEEDS PURE, RICH BLOOD

Pure blood enables the stomach, liver and other digestive organs to do their work properly. Without it they are sluggish, there is loss of appetite, sometimes faintness, a deranged state of the intestines, and, in general, all the symptoms of dyspepsia.

Pure blood is required by every organ of the body for the proper performance of its functions.

Hood's Sarsaparilla makes pure blood, and this is why it is so successful in the treatment of so many diseases and ailments. Its acts directly on the blood, ridding it of scrofulous and other humors. It is a peculiar combination of blood-purifying, nerve-toning, strength-giving substances. Get it today.
