THE RETURN OF THE RUFFLED PRINCESS.

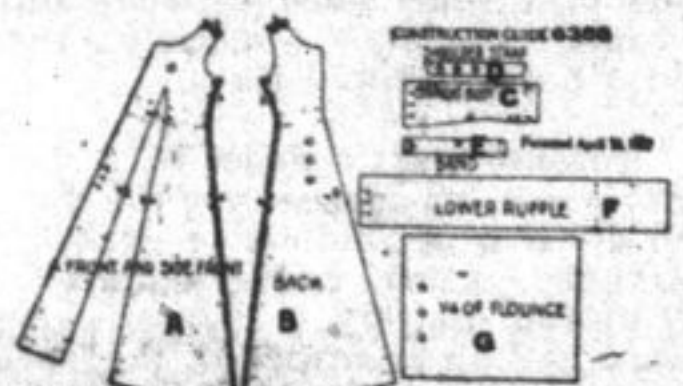

sons of Directoire modes are reasserting themselves.

The five-gored princess shown here is made of fine Irish lawn, trimmed with embroidery and three frills of Valenciennes, the frills being stitched close to the skirt under a heading of insertion, through which satin ribbon is run.

If preferred the princess may be cut very low, in square effect and finished with straps to extend over the shoulders. In average size it requires 5 yards 36-inch material, with 3 yards of bearing and 9 yards 7 1/2-inch founcing for the frills.

Only a few hours' work are needed to put the princess together. First

close the dart seam of the front and side front as notched, terminating the seam at large "O" perforation. Close under-arm and shoulder seams as notched. Close back seam from large "O" perforation to lower edge, finish edges above for opening. Turn hem at back edge of body at notches. Gather lower edge between double "TT" perforations. Sew band to lower edge, center-fronts and center-backs even (double "oo" perforations indicate center-back), and bring the large "O" perforations together. Sew shoulder strap to upper edge between small "o" perforations. Small "o" perforation in strap indicates front edge. Sew to upper edge of front, side-front.

Now, close center-back seams of ruffles and gather the upper edge. Adjust to position on slip, center-fronts even, and seams at center-back. Stitch gathers to position along the indicating crosslines of small "o" perforations (stitch founce along the upper crossline of perforations); and if shorter length slip is made, raise the founce or the ruffles two or four inches higher, according to the amount cut off lower edge of slip.

If the princess is preferred in Empire style or with a deep founce instead of the ruffles on the skirt provision for these changes are also made. It will be found exceedingly useful this season.

With the return of the full skirts there is an accompanying revolution in underwear. The frills and folds so ruthlessly suppressed during the sea-

Pictorial Review Princess No. 6388. Sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches bust. Price, 15 cents. Embroidery No. 11744. Transfer pattern, 15 cents.

A NATIONAL FUNERAL

AT HALIFAX FOR LATE SIR CHARLES TUPPER.

Kept Up His Correspondence To the Last—A Sculptured Bust Taken of Him Last Year.

London, Nov. 3.—Although arrangements are not yet completed, it is stated that the funeral of Sir Charles Tupper will take place at Halifax, the liner Metagama, which will be buried beside those of Lady Tupper.

Although three acute heart attacks had caused serious apprehension, his wonderful vitality had survived on the one of three weeks ago, and an enquiry made two days before his death dismissed the idea of immediate danger. Up to five weeks ago, Sir Charles was moving about the house, and journeyed to London, a trip of twelve miles, to see his grandson, Lieut. R. H. Tupper, who had returned wounded from the front. The latter sailed for Canada on the 13th of October.

Like Lord Strathcona, Sir Charles had kept up his correspondence, diaries and other work to the last, and dictated in his bedroom. For the past four years he had lived in absolute retirement at Bexley Heath, a small Kentish town, and enjoyed peace by the absence of a telephone in his house.

As announced a year ago Sir Charles had accepted the request of his Montreal friends, including Sir William Van Horne, to sit for a sculptured bust, a North London artist, Frederic Lessore, producing a pleasing model, which was exhibited at the Academy this year. Lessore said that the study of his features showed him to be alive with mental acumen and energy, which was most wonderful in so aged a man.

It was in keeping with his life work that his last public utterance in London was at a meeting of the British Empire Club on November 13th, 1911, when he gave a 35-minute address on an Imperial topic. The penalty was a severe chill, which caused a cessation of such activities. Sheets of cables and telegrams piled on a desk bore silent testimony as to how the news had reached a wide circle. The Duke of Connaught's message was addressed to the new heir, who is supposed to be in Winnipeg. One from E. W. Villeneuve, of Montreal, on behalf of the Carter Centenary Committee, was a reminder of the postponed scheme by which Sir Charles was to have unveiled the statue by pressure of an electric button at his residence.

A National Funeral.

Ottawa, Nov. 3.—Beyond an intimation that Sir Charles Tupper will be buried beside his wife at Fairview, near Halifax, nothing has been arranged yet with regard to the funeral of the deceased statesman.

Sir Robert Borden, it is expected, will attend the funeral, and other members of the Government will likely be present. The Prime Minister's proposed western trip will not take place until after the funeral, and may have to be postponed indefinitely, as ten days or more must elapse before he can return from the east.

The Government is in communication with Sir Charles Hibbert Tupper, who is arranging to bring the body across the ocean, but no details have as yet been completed. Nothing has been heard here of the suggestion that the remains be brought to Canada on a warship. It does not emanate from the Government or from the Tupper family, and is very unlikely of acceptance under existing conditions.

The funeral is likely to be of a national character, and it is more than probable that a permanent monument will be erected to the memory of the great nation builder, either in Ottawa or in his native province of Nova Scotia.

MORE BLOCKADE SUCCESS.

Swedish Ferries Refuse to Carry Freight.

London, Nov. 4.—Further progress in the blockade against Germany is noted by the Stockholm correspondent of the Morning Post, who says that, although the Swedish ferries have resumed service with Germany, they will carry only passengers and mails. An agreement, he adds, has been reached with the British Government that these boats should no longer transport freight.

Who ever heard of a boarding house landlady complain of a boarder's poor appetite?

Family Pride.

Mrs. Blunt-Well, Louisa, I don't suppose you will attempt to deny that your original ancestors were stone age ruffians who lived in a damp cave. Mrs. Tree—if my earliest ancestors were a part of the geologic period of which you speak they must have had a red sandstone chateau of their own on Flinthead avenue, with stalaetite decorations and running water on the first floor.—Cleveland Plain Dealer.

Poi in Hawaii.

Pol, the Hawaiian national dish, is made by pounding up the root of the taro plant—the Arum esculentum of the botanists—with water into a thick paste. When slightly fermented it has a pleasant, fruity, acid taste.

The Solution.

"I wish I knew how Blinks lives without working?"

"Open a grocery store in his neighborhood and you'll soon find out."—Philadelphia Ledger.

Parts of Speech.

Teacher—Thomas, what are the parts of speech? Tommy Tucker (after an exhaustive mental effort)—It's the way a man talks when he stutters.

A great man is he who affects the mind of his generation.—Diersted.

To Be Paris Governor.

Paris, Nov. 4.—It is semi-officially announced that General Michael Joseph Maunoury, former Military Governor of Paris, who was badly

ILLNESS CHEAP IN PRAGUE.

Comparatively Few Doctors There, Yet the Fees Are Small.

According to a consular report, one may at least be ill in Austria and not dread the exorbitant doctor's bill that follows.

The city of Prague, with a population of about 600,000, has only about 800 physicians, or one for every 7,500 persons. A doctor charges for a day-time call in a middle class family only 60 cents, or 10 cents more than if the patient calls on him in his office. For a night call the doctor receives from \$1.20 to \$2, according to the distance. Only professors at the clinics of the two local universities charge more, receiving \$2 to \$4 for a house call and \$2 for an office visit. As in this country, the physicians give only prescriptions. About 100 dentists practice in Prague. The average charges are: Drawing one tooth, 40 cents; cement filling, 60 cents to \$1; amalgam filling, 80 cents to \$2.

The annual income of these professional men is estimated as follows: Head professor in charge of clinics, salary paid by the government, \$1,440 to \$1,600, and \$5,000 to \$11,000 from private practice; other professors at clinics, salary paid by the government, \$1,000 and from private practice, \$4,000 to \$10,000; general medical practitioner not attached to any clinic, \$3,000 to \$3,500, the average income of a dentist being \$5,000.

MAKING OTHERS HAPPY.

Why Put It Off Till Tomorrow When It May Be Done Today?

Why should we postpone our loving and the being happy that goes with it? The wife we are going to show more affection for as soon as we have made a little more of a pile. The husband we are going to be more companionable and sunny with as soon as we get a little more service in the house, the children whose lives we will enter into more fully as soon as we feel the pressure of circumstances a little less, the people we are going to show how genial we really are as soon as we have time—none of these ways of loving depends on the things we are waiting for.

Indeed, our opportunity comes more now than it will come when we have these things. The very pressure of our days bring us in contact with many people who most need a show of kindness and who will most warmly respond to it. The wife most needs and will most value love in her days when she is most being a helpmeet. The husband most needs and most prizes love in his years of struggle.

What are we waiting for? The kingdom of heaven is within and will not come of circumstances.—Nautilus.

First European Railway.

The first carriages that ran on rails in Europe were those of a horse railway between Linz and Budweis, in Austria. This was in working order in 1827. Locomotive railways were much longer coming. The first line in a modern sense was opened from Paris to St. Germain in 1835, but railway development was greatly hindered by a terrible accident on the Paris-Versailles line in 1842. The next was the Brussels-Malines line in Belgium. Belgium was also the first country to begin, in 1830, systematic plans for a national network of railways. Prussia followed in 1835 and Austria-Hungary in 1833. The first great trunk line in Europe was from Paris to Rouen, opened in May, 1843.

How Do Your Biscuits Turn Out?

A very severe test for any shortening is to use it in hot biscuits. For in these both the smell and the taste will show at once the quality of the shortening used.

Try Crisco once for these dainties, and you never will go back to lard.

As you break open a Crisco biscuit, you will be greeted by a fresh, pure, tempting odor—and as you eat it, every morsel will have a delightful flavor such as lard-cooked biscuits never had.

To Be Paris Governor.

Paris, Nov. 4.—It is semi-officially announced that General Michael Joseph Maunoury, former Military Governor of Paris, who was badly

wounded last March in fighting against the Germans, will succeed General Gallieni as Military Governor of Paris, the latter now being Min-

ister of War in the reconstructed Cabinet.

General Maunoury distinguished himself in the early days of the war, being in command of the extreme left wing of the French army in parrying the rapid advance of the German right wing on Paris.

All the VALUE in the SOAP

SUNLIGHT SOAP is made from the sweetest and choicest of edible oils and fats. It contains no harsh or strong ingredient.

It is the purest and most efficient of soaps and, if used judiciously, the most economical of soaps.

A little goes a long way—every particle is pure—there is nothing to harm the clothes or to impede the rapid progress of the wash.

ALL THE VALUE IS IN THE SOAP.

We are soapmakers with an ideal—our ideal is to make a Soap which shall have no equal for Purity and Efficiency throughout the country—no superior in all the world.

We realize our ideal in every tablet of Sunlight Soap which is manufactured.

ALL THE VALUE IS IN THE SOAP—THAT'S WHY.
