Mother's Cough!

It distresses you as much as her! Why continue to treat it by dosing the stomach (which is not ailing) with cough mixtures, syrups, tonics, and the like? You will never cure lung troubles by dosing the stomach. The Peps way is entirely different. Peps are tablets made up of Pine extracts and medicinal essences, which when put into the mouth turn into healing vapors. These are breathed down direct to the lungs, throat and bronchial tubes—not swallowed down to the stomach—which is not ailing.

Peps contain no morphia, laudanum nor any of the poisons which are found in many of the old-fashioned syrups. Peps are, therefore, best for aged people and for young children. Peps do not disorder the stomach; they sweeten the breath, are pleasant to take, and are the latest and best that science can offer for the treatment of coughs, colds, bronchitis and allied lung troubles. 50c. all druggists and stores, or for price from Peps Co., Toronto. Remember the name—

Peps

CARING FOR THE POOR

REPORTS PRESENTED AT MEETING POOR RELIEF ASSOCIATION

Association Dealt With a Number of Needy Cases in a Most Satisfactory Manner During the Year—Miss A. M. Machar Gave Summary of the Work

Mayor Sutherland presided at the annual meeting of the Poor Relief Association, held in the City Council Chamber, on Monday afternoon, when reports of the year's work were presented. Rev. D. Laing opened the proceedings with prayer.

Mayor Sutherland stated that he had been looking over the reports of the Association and found that they were most satisfactory. Credit was due to the those who had the management of the affairs in charge. At the beginning of the year it was anticipated that there would be a heavy call on the Association, owing to the war, but it had turned out that there was plenty of work for those who wanted it.

Mayor Sutherland also referred to the fact that the Association was about to lose one of its valued members, in the person of Miss Muckleston, who was compelled to retire from active work. He paid a warm tribute to the good work she had carried on during the many years she had been identified with the Association. She was a faithful worker, and did much to promote the interests of the Association.

A report of the year's work of the Association was presented by Miss A. M. Machar. In her report, she stated that when the committee elected by the Poor Relief Association last November, undertook during another winter, they did so with much anxiety and misgiving, as to the ways and means of meeting the winter requirements which seemed certain to be much greater than usual, while their ordinary resources appeared likely to be a good deal smaller.

The members of the committee were, however, advised by the public spirited citizens not to attempt their ordinary collection, but to trust to having the need supplied from public funds, consisting of the surplus over the amount promised for the Patriotic Fund League, and held over for the purpose of meeting local needs. Therefore, for the first time in the Society's history, no collectors were appointed at the annual meeting, and an arrangement was shortly afterwards completed, whereby the Poor Relief Committee, and that of the St. Vincent de Paul Society, were authorized to draw to a sufficient extent, on the fund thus held for local exigencies.

This arrangement enabled the committee to go on without undue anxiety, in what was otherwise have been the arduous task of meeting a most unusual and urgent pressure of destitution. Happily, the winter did not turn out a severe one, but notwithstanding this, its requirements were considerably in excess of ordinary years.

About one hundred and twenty cases required immediate relief, which were promptly supplied after due enquiry, these being, in a large proportion, cases of those of respectable working men, temporarily deprived of their usual means of earning a living for themselves and their families. There were, in addition to these, a number of the helpless or aged poor, who have always been the objects of the Society's care. A few special cases of exceptional destitution have needed some relief during the summer, mainly through severe illness.

The committee, wise on the whole, the satisfaction of believing that all cases of real need had been met at least to such an extent as to prevent much actual suffering from the effects of the winter.

NOT A PARTICLE OF DANDRUFF OR A FALLING HAIR

Save your hair! Double its beauty in just a few moments.

25-cent "Danderine" makes hair thick, glossy, wavy and beautiful.

Within ten minutes after an application of Danderine you can not find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most will be after a few weeks' use, when you see new hair, fine and downy at first—yes—really new hair—growing all over the scalp.

Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life producing properties cause the hair to grow long, strong and beautiful.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance.

Get a 25-cent bottle of Knowlton's Danderine from any drug-store or toilet counter, and prove that your hair is as pretty and soft as any that it has been neglected or injured by careless treatment—that's all—you surely can have beautiful hair and lots of it if you will just try a little Danderine.

exceptional conditions of the time, although it was not possible that the existence of some privations could be entirely prevented. The committee, in thus reporting their past year's work, would express what they believed to be well-founded hope that the conditions of the coming winter will prove much more favorable for the many who last year passed through an anxious and trying season. While for themselves, they would express their thankful sense of the kind Providence which supplied the urgent needs of the time.

Miss Machar also reported that the housing conditions for working men are still far from satisfactory, though there may be noted some improvements, as to the conditions, though the rents still in many cases, seem to be excessive.

The report of the treasurer was read by Miss Muckleston, and showed that the sum of \$82.69 had been expended out of the Poor Relief Fund, and \$1,512.40 out of the Citizens' Relief Fund.

The old members of the executive were re-elected with these additions: Mrs. William Craig, Mrs. John Wright, Mrs. R. D. Sutherland, Miss Skinner, Miss Going and Miss Baker. The executive will meet and elect the officers for the Association.

Miss Muckleston said that she was very sorry to have to give up active work in the Association, but circumstances compelled her to do so. She said that while retiring, she would at all times render any assistance she could, and give any advice, she might be able to give.

Rev. Douglas Laing paid tribute to the work of Miss Muckleston, stating that the Association was greatly indebted to her for her work. He moved that a vote of thanks be tendered to her.

The motion was seconded by Rev. William Craig, and carried by a unanimous vote. Mr. Craig, Dean Starr and Mayor Sutherland spoke of the work accomplished by Miss Muckleston. The latter replied feelingly to the remarks, stating that she had always tried to do her duty.

Dean Starr put up a plea for the men who had volunteered for overseas service, and who had been rejected for medical reasons, and Mayor Sutherland remarked that the demand of the hour would be for the care of the returned soldiers.

The great need of a shelter in the city for children, and a place where worthy homeless might secure a night's lodgings, was also discussed. Dean Starr stated that it would be well if arrangements could be made for the housing of such unfortunate over night, at the Home for the Aged, so as they would not be compelled to stay in the police station. He thought perhaps a room could be secured at the Home for the Aged, for this purpose. A committee, composed of Canon Starr, Rev. William Craig and Rev. D. Laing, was appointed to look after this matter. W. H. Wylie, inspector of the Children's Aid Society speaking relative to the need of a shelter in the city for children, stated that in the past the city had been depending on the generosity of the various Homes in the city, to take in the children. The County Council was to meet in this city this week, and he had a pain on foot to have Frontenac county, the city and the counties of Lennox and Addington go into a scheme to provide a suitable shelter. However the plans had not yet been advanced.

A MOST UNIQUE TEST

Of Endurance And Stability Given An Overland Car.

A most unique test of the endurance and stability of Overland construction occurred recently along the Florida coast, when a Model 83, Overland touring car, after being buffeted about all night in a raging surf, was found to be only slightly damaged when rescued the following morning. The owner of the car together with a party of four people, was driving along the beach at low tide when he ventured too close to the water's edge. The first inkling he had of impending danger was when the car slowed up suddenly and began to settle in the rear. He had driven into a pocket of quick sand, and the party barely had time to jump for safety before the water surrounded the car. At the full height of the tide, the car was in ten feet of water with the waves pounding and heating it from one side to the other. The breakers would smash into it and stand it on end, leaving sometimes on two wheels, sometimes on its side and at other times completely upside down, with the body and radiator grinding into the sand.

The following morning at low tide a wrecking crew managed to haul the car up on the beach and the owner was amazed to find that with the exception of a broken up, smashed windshield and loss of paint, the car was as good as ever. The terrific pounding it had been subjected to during the night had not even bent the fenders. The radiator was not damaged and with the exception of sand scratches the body was in excellent shape.

Spectators declare that the manner in which the Overland withstood the buffeting of the high seas, left no doubt as to the ruggedness of its construction.

What It Means. Montreal Herald.

Canada has every reason to be proud of the part her men are taking in the war. When the full army of 250,000 men has been raised and equipped—as it will be shortly—it will be tantamount to the United States enlisting, arming and equipping in the same period of time an army more than 2,000,000 men. If Canada's contingent reaches half a million, as it may, it will be tantamount to an American army of more than 6,500,000, based on present estimates of population.

Mrs. Robert Aflleck, Middleville celebrated her 102nd birthday on Nov. 14th. Balderson Cheese Factory produced about \$50,000 worth of cheese during the past season.

WILL PROBABLY DROP

THE REFERENDUM AS TO UTILITIES COMMISSION.

No Object in Asking the People To Vote—Realized Also That the Commission Would Be Retained.

It is not likely that the City Council will ask the ratepayers at the January elections to express themselves as to whether they want to retain the Utilities Commission or not. Two weeks ago the council, being angry at the Commission over the question of high power rates, decided to submit a by-law to the people with the object in view of having the public utilities put back under council control. When Ald. Graham submitted the by-law to Council last night for its approval, it was shelved until the next regular meeting, when the City Solicitor will report as to whether a commission must control an electrical plant when power is purchased from an outside source.

Ald. Nickle advised that the by-law be withdrawn entirely. "I don't think the Commission will be put out, and I'll tell you why," said Ald. Nickle, who proceeded to inform Council that the number of power users was small in proportion to light consumers. The light rates had been reduced by the Commission from twenty-five to thirty-five per cent. The people of University avenue were getting a thirty-five per cent. reduction, and Ald. Nickle said he was pretty sure they were going to vote to keep the Commission in control.

Ald. Nickle referred to the recent meeting held by the Board of Trade to discuss the power rates, and how a motion recommending the abolition of the Utilities Commission had not received a single vote. Explanations had been made by Utilities Commissioners that satisfied the nothing now at issue. Even the newspaper that inaugurated the protest against the new power rates had expressed itself as satisfied with leaving the Commission alone.

But there was another question that should be considered before money was expended in putting a by-law to the people. He understood that when a municipality purchased power from outside, the statutes required that the electrical plant be managed by a Commission. In view of the fact that Kingston was about to purchase power from J. M. Campbell and possibly also from the Seymour Company, it would be able to have the proposed by-law voted upon.

Ald. Graham said he was willing to leave the matter to a vote of Council. It appeared, he said, that the newspaper that had made such an outcry against the Commission had flopped, and he supposed the Council, which a fortnight ago decided almost unanimously to put the question to the people, would follow suit and swallow itself.

On motion of Ald. Kent, the by-law was held over until Council's next regular meeting, in order that the City Solicitor might report as to whether there must be Commission government when outside power is purchased.

Terms of Settlement.

London Free Press. The restoration of Belgium, with full money indemnity, the fixing of the German boundary on the west at the Rhine, the division of territory in the Near East on the basis of nationality, the dismemberment of the Turkish Empire and the destruction of the German navy—these are the terms of peace set forth by a member of the British Government, Rt. Hon. Mr. Masterman. From the allied standpoint they are "the only possible terms."
