Announcing the Advent of a New Synthetic Substance

Picture to yourself that dramatic moment when the scientist knows that he has brought into being a new synthetic substance.

Conceive, if you can, the intensity of satisfaction that comes with the sense of having created.

Imagine such a scene enacted in the laboratories of the Goodyear factories. If you can visualize the event and the enthusiasm that followed it, you will know something of what it means to us to announce to the world the advent of Neolin.

Neolin

GOOD YEAR MADE IN CANADA

Better than Leather

Literally a New Substance

Of Incalculable Value

Neolin is literally a new substance of incalculable economic value. Yesterday it did not exist, today it is a new, practical and a proven product, destined to play a part in the daily lives of hundreds of thousands of homes. Neolin is not leather. It is not rubber. It is not a substitute for leather. It is not a substitute for rubber. It is Neolin. The substance is new, the name is new. Only the uses to which it will be put are old—almost as old as humanity, and as vast and universal. Neolin is better than leather. It is better because it is waterproof.

Neolin Means Better Shoes

It is better because it is more flexible. It is light. It is strong. It is durable. It is reliable because it is always the same. Neolin will displace leather in some of the largest and widest fields which leather now fills. It should, for instance, replace leather soles on every single pair of shoes sold. More than two hundred of the greatest shoe manufacturers of this continent saw the immense market for Neolin immediately. These men are all masters of shoe design and construction—they know what the human foot requires. They did not need to be told about Neolin—they saw at once its tremendous economic importance.

An Improvement on Leather

They are telling the Neolin story now through their salesmen—they will use Neolin in their own products. Neolin has taken the virtues of leather and carried them still further. Where leather was deficient Neolin has created new virtues. It is not like anything that you have ever tried, or known, or heard of. Here, then, is a new element of ease and economy. Familiarize yourself with the name—because it is destined to be a household word—Neolin. Better than Leather. The Goodyear Tire & Rubber Company of Canada, Limited Toronto, Ont.
