Estimates given on all kinds of repairs and new work; also hardwood floors of all kinds. All orders will receive prompt attention. Shor to Queen Street socks for soldiers.

THE STRASSBURG CLOCK. Its Many Remarkable Features That Make it Famous

Strassburg, the capital of Alsace-Lorraine, is remarkable for the great ctock in its cathedral.

This clock, which is twenty feet in height, was made by Jean Baptiste Schwilgue in 1842. Besides various astronomical devices indicating true solar time, it has a great planetarum in which the revolutions of the planets are represented, so that the relative positions of each at any time can be seen at a glance. Then on a platform above are mov-

able figures representing the four ages of man. At the first quarter of an hour a child strikes the bell with a rattle; a youth in the garb of a hunter strikes it with an arrow at the half hour; at the third quarter a warrior strikes it with his sword, and at the fourth quarter an old man strikes it with his crutch. Then a figure of Death appears and strikes the full hour with a fleshless bone. On the highest platform is a natwings, ruffles his neck and gives three times a loud and perfectly natural crow.-London Standard.
