

Canadian soldiers convalescing at Lewisham Military Hospital, England. The photograph shows the soldiers, with their friends and relatives.

Retreating Serbian soldiers passing through a hamlet on their way to a haven on Greek soil.

The large 16-inch coast defence gun which is now being tested at Sandy Hook, will be used to protect the Pacific entrance to the Panama Canal. It is expected that eventually all the smaller calibre guns in the coast fortifications will be replaced by monsters of this size, which far outclass any gun aboard the present-day battleships.

A snapshot made (Dec. 16) of Captain Karl Boyed (left) and Captain Franz von Pappen, the recalled German Naval and Military Attachees, respectively, walking on Fifth Avenue, New York City. Captain Boyed tried desperately to prevent the making of the picture, and it was made after much difficulty, and exclusively by a member of the staff of the American Press Association.

William Faversham, star of Sir Gilbert Parker's "The Right of Way," five act Metro Feature, at the Strand Theatre, Kingston, Jan. 17, 18, 19.

**CHANGE THE FUEL**

Frederick Scheindl, the clerk of the National City Bank of N.Y., who was arrested in connection with the plot to blow up the Welland Canal. The direct charge against him is for the alleged larceny of valuable papers from the City Bank which contained information useful to Paul Koenig and Leyendecker, who are now out on combined bail of \$50,000.

**Your Washing Done for 2c a Week**  
Electric or Water Power Will Do the Work

I have built a new "1909" power washing machine. I consider this machine the most wonderful washer ever put on the market. Built entirely of high quality sheet copper, it is the strongest and most durable machine made. It is constructed on a brand new principle, and I will guarantee that this machine will not wear clothes, break buttons, or fray the edges of the most delicate fabric. It will wash everything from heavy blankets to the finest lace without damage to the goods.

This new "1909" washing machine can be connected with any electric socket instantly, and is started and stopped by a "little twist of the wrist," and it will do your washing for 2 cents a week.

If you would consider fitting up your laundry room in the most complete and approved manner, let us call you also about our thoroughly practical motor-driven, self-heated ironing machines.

I also make a lighter power machine which can be run by water or electric power. On all of these machines the motor will run the wringer too. Just wringer will wring the water out as quickly and easily you will be astonished. It will save 50 per cent time, money and labor every week. The outfit consists of washer and wringer, and either electric or water motor, as you prefer, and I guarantee the perfect working of each.

I will send my machine on 30 days' free trial. You do not need to pay a penny until you are satisfied the washer will do what I say it will. Write today for illustrated catalogue.
