One reform at least which might be brought about would be the frank and public repudiation by the twen-1y-one supporters of the Government of their Nationalist views in 1911 against personal service for the Em-

Another courageous act would be to vindicate the legitimate manufacturers of Canada by an investigation of the work of the Shell Committee, and the punishment of the middlemen and the mushroom companies, who should be made to disgorge their illegitimate profits. As for 'his own connection with shell making, he declared that the company in which he had but a small interest secured the order in the open market at a fair price, and had promptly Hon. Andrew Fisher Asserts turned out the munitions so urgently needed.
