It immediate-

preparations for considerable naval operations for considerable naval operations cannot be doubted. It may be permissable and profitable to consider the possibilities of Germany. From Borkum, the most southerly of the Frisian islands held by Germany, to the Elbe and the western entrance of the Kiel canal is a little over seventy miles. Naval operations behind the eastern Frisian islands are impossible. Shoals and sand-banks cover the mouths of the Ems, the Weser and the Elbe, making Germany impregnable to attack from that side, and sand wastes, veiled by the fringe of Frisian islands Borkum, Juistt, Norderney, Langeoog, Spikeroog, and Wangeroog, with their northerly flank resting on Heligoland, make a safe retreat.

GETS IN FREQUENT BLOWS AT GERMAN FLEET.

"The Germans may wish to fight off the dangerous eastern Frisian littoral, but the British navy can ultimately select, the waters whereon to fight the battle with this pretender to our kingdom of the sea."

SURFEIT OF OFFICERS.
