WORK ON THE HARBOR

WILL RECEIVE SPECIAL ATTENTION OF BOARD OF TRADE

Will Appeal to Government to Meet Needs of Welland Ship Canal - Question of Wharf Line To Be Decided Upon.

That the question of harbor improvement, to meet the demands of the Welland Ship Canal, will receive the special attention of the Kingston Board of Trade, was manifested at a meeting of the Board held on Tuesday night. Several matters of importance were dealt with at the meeting. The newly-elected president, Frances King, occupied the chair, and the other members present were Messrs. Robert Meek, R. D. Sutherland, W. T. Minnes, John Sowards, William Cook, John Donnelly, E. A. Rees, J. G. Elliott, J. M. Campbell, R. J. Carson, H. C. Welch, R. J. Rodger, F. R. Anglin, J. W. Power, and J. Minnes.

At the opening of the meeting, the president, Frances King, took occasion to thank the members for the honor conferred upon him at the last meeting. He said that he regarded his election as a compliment to the legal profession. Regarding the work of the new year, he said that the Board could not, in view of the war, look for a year of great success. A record year could not be looked for in the industrial world, as the chief industry was that of making war munitions. If we could break even in the year's work, it was all that could be expected.

Mr. King referred to the good work which had been accomplished by the Railway Committee, and complimented the chairman, J. M. Campbell. He appealed to the committee to keep up the good work.

The president also referred to the power question, stating that it would be before the members just as prominently as ever. The question for the city now was "How soon are we to hook up with the Hydro-Electric Commission?"

Perhaps the most prominent question to be considered was that of the improvements to the Kingston harbor, to receive the ships from the Welland Ship Canal. It was to be regretted that the Government, at Ottawa, was just at this time tied up with heavy expenditures in account of the war. Every department of the Government had to cut down their expenses. The work on the canal however, was proceeding, and it was necessary that the Kingston harbor receive attention. War or no war, the Government might be expected to meet the needs, although the speaker was led to believe that there would be no immediate work undertaken. As a result of the recent resolution passed by the Board, soundings had been taken in the local harbor.

The President stated further that he did not think the Government intended to undertake a large development scheme until it was known just how far capital was to be expended on elevators and docks. It would be the duty of the Board to approach the Government, and see what development could be expected. Then it would be up to the Board to get the Government interested, through representation from the Board of Trade and the City Council. The speaker, through his connection with the Dominion Marine Association, had the matter at heart. The question of the harbor improvements would have to be dealt with immediately, as the Canadian Locomotive Company had made application for permission to extend a wharf three hundred feet. The chief engineer of the Department of Public Works had asked that the matter be taken up, stating that the district engineer would come to Kingston for a conference, so that the wharf line might be decided upon.

The president also made reference to the camp at Barriefield. He had this matter under consideration. While a big camp was assured for this summer, a still larger camp could be assured provided there was ample space so that the training could be conducted under order instead of battalion, and also if better lighting facilities and better roads could be secured.

It was afterwards decided that the president, with Mayor Richardson, John Donnelly, Ald. Hughes, chairman of the Civic Property committee, and a representative of the locomotive works, form a committee to meet Mr. Chapleau, chief engineer, and Col. Anderson, district engineer of the Department of Public Works. This conference will be held in the course of a few days. At this meeting it is hoped that the new wharf line will be settled satisfactorily to all concerned. While the Locomotive Works ask to have the wharf extended three hundred feet, it is claimed that to extend it further than one hundred and fifty feet would interfere with navigation.

Resolutions Endorsed.

The members had before them several resolutions from different Boards of Trade, asking for support. One came from G. Y. Chown, on behalf of the Forestry Commission, asking for better protection from fire in the forests, which was heartily endorsed.

Mr. Meek said that it was a resolution that should be supported. He recalled a wonderful story told at a recent meeting of the Associated Boards of Trade, in which it was stated that there had been enormous losses of valuable timber, as the result of people going through forests.

The Cause Of Anaemia.

It is universally known that iron is a very important element of the blood, and lack of it is the direct cause of run-down conditions and anaemia. It may interest our readers to know that the Mahood Drug Co., Limited, of this town, has in Vinol a reliable, constitutional remedy for such conditions. Vinol supplies iron to the blood in its most soluble state then there's the nourishing properties of beef peptone and the medicinal curative extractives of fresh cod livers, without oil, all dissolved in a pure native tonic wine. That's what makes Vinol so successful in overcoming run-down and anaemic conditions.

on either business or pleasure and causing fire. He moved that the resolution be supported. R. J. Carson seconded the resolution, and it was carried by a unanimous vote.

The Board of Trade, of Welland, asked the support of the Board, in their movement to have the charge of ten cents, imposed by express companies, for manifesting on shipments to and from the United States, eliminated.

R. J. Carson said this was something which should receive the support of the Board, and he asked that the members co-operate with the Welland Board of Trade in the matter. He said the charge was not just to dealers, on the suggestion of J. G. Elliott, the matter was referred to the Railway Committee.

A memorial from the Fort William Board of Trade, appealing for help to have unoccupied lands in Ontario laid out, with the community idea, was referred to the Agriculture Committee.

The Sherbrooke, Que., Board of Trade, submitted two resolutions for support. One was to promote Russian trade, and the other for a change to be made in the conditions governing the bonds of government contractors. Both were sent to the Legislation Committee that after the war their resources would be gone, and they looked to Canada as a place where they would have greater opportunities. He felt that the federal government should be prepared to aid these people as far as possible. It was agreed to send the matter to the Agricultural Committee, for consideration.

The Board has a special committee, dealing with town planning, and the resolution from the Commission on Conversation, dealing with this matter, was referred to this committee. Prof. O. D. Skelton is chairman of this committee, which has been quite active.

J. G. Elliott said that there has been a falling off in the membership of the Board of Trade, and advanced a campaign to secure more members. He said Kingston should have three or four hundred members on its Board of Trade. His suggestion met with the hearty approval of all the members. Mr. Elliott moved to have the matter taken up by the Membership Committee, and the members agreed.

THE CANADIAN WEST

DESCRIBED BY REV. E. R. McLEAN AT COOKE'S.

In an Illustrated Lecture on Tuesday Evening - Mr. McLean Showed Views He Had Taken With a Camera.

The slogan "See America First" might well be changed by Canadians to "See Canada First," and the lecture given by Rev. E. R. McLean in Cooke's Church lecture hall on Tuesday night would certainly justify the phrase.

Mr. McLean, when he graduated from university in 1911, was assigned to Sunday school work in Saskatchewan, Alberta and British Columbia, and with a horse and wagon travelled between Edmonton and Prince Albert, covering over 3,000 miles with this means of locomotion. During that time he had always with him a splendid camera, and he was constantly taking pictures of interesting objects. These have been put on slides. An exhibition of them was given on Tuesday evening, and was one of the best treats of the season. The proceeds will be used in the purchasing of new slides for the stereoscopic lantern recently bought by the Sunday school.

In opening his lecture, Mr. McLean showed the Sault Ste. Marie river and canal and views along the Canadian Pacific to Winnipeg. At this point he started on the prairies as a subject. The views shown were taken by Mr. McLean while on his travels organizing Sunday schools, and for this reason he was able to secure settlers in all stages of their western life development. The settler comes to the west, according to the pictures shown, without hardly a dollar. His first home is to "throw together" a house of canvas and rough boards. In a very short time he has broken some of the land, and the next view shows a more respectable dwelling, though still representative of a settler's home. Successive pictures give the stages of life that the settler passes through until, after nine or ten years, he owns a beautiful residence of the most up-to-date kind, surrounded by fields of grain.

The next set of pictures is that referring to the home life of the early settlers; the scenes around the first cabins, pictures of the children - one of five children in a row, all dressed in the same kind of cloth for economy sake. One picture is that of a little cemetery in the "Frog Lake Country," where men who were brought out to Canada by the Hudson Bay Company to build flour mills were murdered by the Indians. This cemetery is about seventy-five miles north of Lloydminster.

The remainder of the scenes deal with views of British Columbia. These are shown as the views of a trip into the western province by the Crow's Nest branch, returning over the main line of the C. P. R. Many other pictures, however, that could not be taken along the line of rail were flashed on the screen.

Mr. Preston, of the Y. M. C. A. staff, arranged a splendid musical programme. Vocal solos were given by Miss P. Devlin and Miss Rosevear, a piano duet by Misses Angrave and Tierney, and a violin solo by P. Richardson. All were splendidly rendered and much enjoyed. D. A. Shaw presided.

Capt. Jukes Now Major.

Capt. A. H. Jukes, of the 9th Gurkha Rifles at Kingston Royal Military College graduate, has been gazetted brigadier major. He received the D. S. O. when serving in the Canadian Brigade.

Not Enough For Two.

Young Harold was late in attendance for Sunday school, and the minister enquired the cause. "I was going fishing, but father wouldn't let me," announced the lad. "That's the right kind of father to have!" replied the Reverend gentleman. "Did he explain the reason

SAGE TEA DARKENS HAIR TO ANY SHADE

Don't stay Gray! Here's an Old-time Recipe that Anybody can Apply.

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grandmother's time. She used it to keep her hair beautifully dark, glossy and attractive. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect.

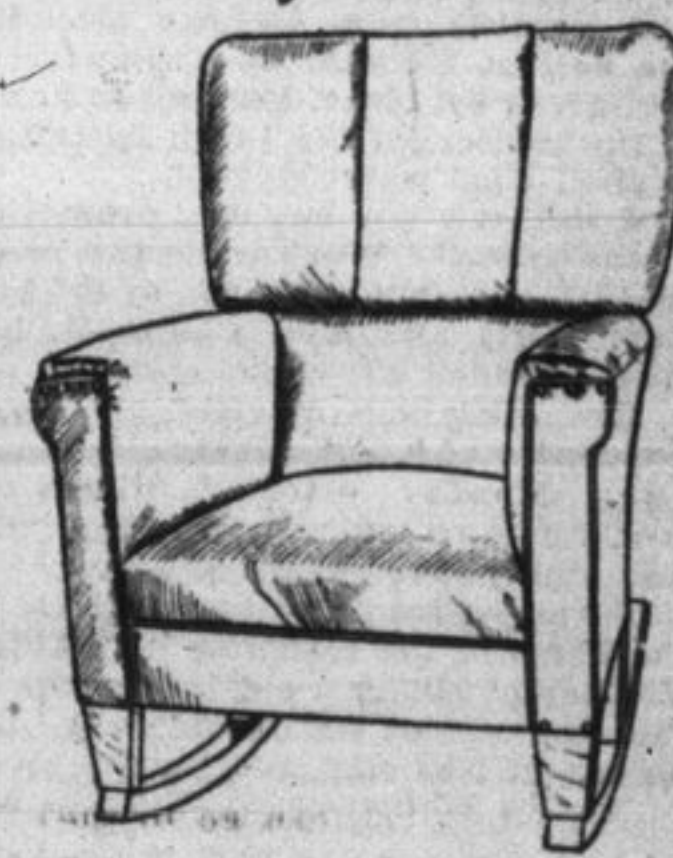

But brewing at home is messy and out-of-date. Nowadays, by asking at any drug store for a 50 cent bottle of "Wyeth's Sage and Sulphur Compound," you will get this famous old preparation, improved by the addition of other ingredients, which can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says it darkens the hair so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through your hair, taking one strand at a time. By morning the gray hair disappears, and after another application or two, it becomes beautifully dark and glossy.

Wyeth's Sage and Sulphur Compound is a delightful toilet requisite for those who desire a more youthful appearance. It is not intended for the cure, mitigation or prevention of disease.

"Why he would not let you go?" "Yes, sir. He said there wasn't bait enough for two!"
