Backache Totally Gone!

Does your back ache? Have you a dull, sore pain, or sharp shooting pains that make life a misery and make you wonder what is going to happen next? Thousands have suffered just like you and after dosing themselves, and rubbing themselves, and applying liniments—all without relief—they have tried

Gin Pills FOR THE KIDNEYS

and found untold comfort in the healing, soothing, cleansing action of Gin Pills on the Kidneys and the Bladder—that is where the trouble lies. Read what Arnold Macaskell, of Nova Scotia says:—'I decided to give Gin Pills a trial. Before I had used one box I began to feel much better, and by the time I had taken two boxes all the pain was gone. I have never had any trouble with my back since.'

Look for the Drug Store in your Town or City with GIN PILLS in the window. EVERY DRUGGIST SELLS THEM

MOTOR PRICES HAVE SOARED

And Street Railway Company Will Not Instal.

UTILITIES COMMISSION

TO CONTINUE POWER SUPPLY AS AT PRESENT.

Campbell Power Agreement Goes to The People—Arrangement Being Made For the Lighting of Barricfield Camp.

Owing to the tenders being about fifty per cent. higher than estimated, the Street Railway Company does not wish the Utilities Commission to instal two motor generator sets to supply power for the cars. According to the arrangement made at a recent conference of the Company and Commission, the former was to be consulted in the award of tenders. The prices were so high that the Company did not feel that it could stand to foot the bill which it would have to pay, as the Commission was to instal the generators at the Company's expense.

H. W. Richardson, W. F. Nickle and H. C. Nickle, representing the Company, conferred with the Utilities Commission at its meeting Monday afternoon to further discuss the situation which had developed as the result of the very high prices, due to the increased price of copper. They explained that the Company could not afford to pay the prices asked by the manufacturers, and that the making of the proposed ten-year agreement, whereby the Company was to instal the generators and benefit in any saving in power cost when the city secured hydro energy, should be deferred, and in the meantime the Commission should continue to give the cars power at 1.20 cents a kilowatt-hour, and that the agreement should be signed when the Company signified its desire to have the generators installed, which might be fully two years hence. The Commission agreed to do this, being anxious to aid the Company in every way, knowing that it had no easy road to travel. The Company will therefore continue to receive power at 1.20 and the agreement will date from the time the generators are installed.

Lighting The Camp. General Manager Folger reported that he had a conference with Major C. J. Burritt, District Engineer, who asked that the city go ahead and provide for the lighting of the Barricfield Camp. Power for water supply was also wanted.

The Commission instructed the manager to prepare a statement of the cost of the materials required and submit it to the Civic Finance Committee and when it was ratified to proceed and purchase the materials, it being understood that the Camp Engineering Corps is to make the installation.

Mayor Richardson said that the City Council had been waiting for definite word from Major Burritt as to what he wanted, and that the delay that had ensued was not to be placed on the shoulders of the city. The District Engineer had told him he was very busy and that he could not complete the lighting arrangements any sooner. The Mayor intimated that as soon as the matter was prepared his estimate, the Finance Committee would see that the necessary funds were provided for the purchase so that the work of installation could be proceeded with without delay.

Campbell Power. The Commission decided to ask the City Council to submit to the vote of the people the Campbell power by-law. It does not want to do any dickering with the Hydro-Electric Commission on the matter, preferring that the people should give their sanction to a measure that will give the city an additional supply of power from the Kingston Mills water falls. It is desirable that the local plant get this auxiliary supply soon, and the manager was instructed to arrange for the purchase of the necessary transforming machinery so that the power could be secured at the earliest possible date after the people have passed upon the by-law. The submitting of the by-law is regarded as a mere formality, for the people will vote for a measure that is going to be of immense benefit to the electrical plant.

Mr. Folger stated that by making an agreement with the Locomotive Works for power supply, the plant had made a profit of \$500 in the first month. That was at the rate of \$6,000 a year, and he was desirous of strengthening the plant's power of production. The cost of production was now down to 1.25 a kilowatt hour, as against 1.44 a year ago. Pipe has advanced about twenty-five per cent. in price since last year, according to tenders received. The contract for the year's supply was awarded to the Gortshore-Thompson Company of Hamilton, whose tender was not the lowest, but which has the reputation of supplying first-class material and giving prompt delivery. Owing to big fluctuations in the water bills of the House of Providence, the Commission decided to strike a mean in the meter reading. The chairman and the manager were authorized to place \$10,000 insurance on the boilers of the plant. These accounts were ordered to be paid.

Letters to the Editor

Kingston, May 1.—(To the Editor). University avenue residents have another grievance and if they were not patient and long-suffering there would be something doing.

Excavations are being made by the Utilities Commission. There is a good wide street on which there is little traffic upon which the loose earth could be placed. Instead of doing it that way, the earth is piled several feet high on the walk with only a narrow path left for traffic. When wet there is a mass of mud tracked into the houses. But worse still, the fine lawns which have been carefully nursed for years are being ruined by piles of earth and rock.

The two men and the water boy on the job will be at it all summer, by the rate the work is progressing. The lawns will be spoiled, carpets and floors ruined, the good wives too angry to keep house while the free and independent elector whose vote is so important about election time will lose the last bit of his religion in "blessing" the powers-that-be, in having to grin and bear it. Protests to the City Engineer's Department bring the answer that he is not in charge. Surely that is what a City Engineer is for. Somebody should get busy.—University Avenue Elector.

Tichborne Couple Wedded. A pretty wedding was solemnized on Monday, April 24th at home of Rev. J. D. Boyd, when Miss Effie S. Genge, teacher of the Tichborne school, was united in marriage to Frederic Harris of that place by Rev. Mr. Boyd. The bride looked charming in a cream duchess silk dress trimmed with rose chiffon and pearls, and carrying a bouquet of pink and white carnations and ferns. The happy couple left the city on Tuesday for their home at Tichborne. The bride's travelling suit was battleship gray and an old rose hat. Many friends of Mr. and Mrs. Harris wish them many years of happiness and prosperity.

Lieut. Ian Macnaughton, son of Prof. John Macnaughton, Montreal and formerly of Kingston, has been killed in action. He was a graduate of the Royal Military College and born in Kingston. Pte. Harry Moore, of the 2nd Battalion, who arrived back two weeks ago from England, died at his home in Oshawa on Sunday.
