Avoid waste of Fuel

Unless you KNOW positively that a cheaper furnace will heat your home without waste of fuel, there is small satisfaction in saving a few dollars on its purchase. The Sunshine Furnace saves coal because it is well made and because every part has been carefully thought out.

LOOK IT OVER. Any one can see that the greatest heating factor in a furnace is the fire-pot; that a pot with straight walls like the Sunshine fire-pot will give off more heat than one that must often have an outer lining of ashes.

Doors and dampers that are tightly fitted will certainly hold the fire longer than those that are loosely fitted. The wider air passages and larger radiating surfaces of the Sunshine must heat the air much more readily. These Sunshine Furnace features are coal-savers that mean much in mid-winter.

If you are looking for economical heating, you must see clearly that it will take a good modern, well-made furnace to supply it. You will naturally think well then of

McClary's Sunshine Furnace

Saving coal interests you, of course. Then you will want a copy of our booklet. Send the coupon to-day for a copy. If you want information about the cost of heating your home, we will let you have it promptly and without charge. If you will write to our Heating Engineer, he will show you how to plan your heat distribution so as to get the utmost warmth with the least expenditure. Write him, giving the size and number of rooms in your home—a floor plan of the upstairs and downstairs—and he will give you the probable cost of putting in a system that will give you the heat you want where you want it. Fill in and send the coupon direct to the factory.

A DEAD NERVE CELL CAN NEVER BE REPLACED

The human body is composed of millions of tiny cells of various kinds. With the single exception of the brain and nerve cells, there is a system of dividing up of cells to form new ones. In this way the blood cells, the tissue cells, the cells of the stomach, liver, kidneys and other vital organs may be increased so as to make up for loss or injury. But not so with the cells of the nervous system. You have a certain number at birth, but never any more. A feeble, poisoned nerve cell may be restored, but a dead cell can never be replaced.

For this reason complete paralysis can never be cured, but the person who is partially paralyzed may be greatly benefited by restorative treatment such as Dr. Chase's Nerve Food, which nourishes the feeble, wasted nerve cells back to health and vigor.

This, undoubtedly, is the strongest reason why everybody should be familiar with the symptoms which tell of exhaustion of the nerve cells and know the best means of restoring the vitality of the nerves before they become dead to all treatment.

Sleeplessness, restlessness, irritability, nervous headaches, nervous indigestion, loss of energy and ambition, feelings of discouragement and inability to concentrate the mind are among the most common warnings. Later developments are known as nervous prostration, locomotor ataxia and paralysis.

It is easy to neglect treatment in the early stages, but that is the time when a few boxes of Dr. Chase's Nerve Food will do wonders for you. Preventive treatment, which is so good in all ailments, is practically the only method to be applied to diseases of the nerves, because of the fact that a dead nerve cell can never be replaced, whereas a feeble, wasted nerve cell can be restored by such nourishing medication as is afforded by Dr. Chase's Nerve Food. Should you desire further particulars about this great food cure, kindly write for booklet.

50 cents a box, 6 for \$2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappear.
