WESTERN FOSSIL MINES

GRAVEYARDS OF PREHISTORIC ANIMALS YIELD TREASURES

Red Deer Valley in Alberta is fabulously well off in remains of Palaeozoic Monsters whose skeletons are in so great demand in Museums the World Over—How the Find Was Made.

THERE are some parts of the world—South Dakota, for instance—where a large income is derived from the mining for the fossil bones of animals that lived before Noah's flood.

According to Mr. Barnum Brown of the American Museum of Natural History, there are localities in Alberta where the soil actually yields successive crops of these interesting and valuable bones.

Mr. Brown, who is fairly well known to many westerners, says that he first heard of the old animal graveyards while at his work in New York.

A visitor to the museum, while examining the large fossil specimens in the reptile hall, remarked that he had seen many similar bones near his ranch in the Red Deer Canon of Alberta," he says. "After talking with him for some time he extended an invitation to me to visit his home and prospect the canon. Accordingly, preliminary trip was shortly after made to that locality.

From Dierberg, a little town north of Calgary, we were driven eastward ninety miles through a portion of the newly opened grain belt of Alberta. Near the railroad the land is mostly under cultivation and comfortable homes testify to the rich nature of the soil.

"A few miles eastward the brush land gives way to a level expanse of grass-covered prairie dotted here and there by large and small lakes probably of glacial origin. Mile after mile of the road follows section line, and there is rarely out of sight of the house of some 'homesteader.'

"It is through this level farm land that the Red Deer River winds its way flowing through a canon far below the surface. The canon was prospect and so many bones found that it appeared most desirable to extend the search to the river.

"Usually fossils are found in 'barlands,' where extensive areas are denuded of grass, and the surface eroded into hills and ravines. A camp site is located near some spring or stream, and the collectors ride or walk over miles of expanse in each direction till the region is thoroughly explored.

"Quite different conditions are found on the Red Deer River. Cutting through the prairie land, the river has formed a canon two to five hundred feet deep, and rarely more than a mile wide at the top. In places the walls are nearly perpendicular, and the river winds in its narrow valley, touching one side, then crossing to the other, so that it is impossible to follow its course for any great distance, even on horseback.

"The conditions appeared so favorable to the fossil-hunter that a camp was established and a flat boat, built on lines similar to a Western ferry-boat, twelve by thirty feet in dimension, and having a carrying capacity of eight tons, was constructed.

"Supplied with a season's provisions, lumber for boxes, and plaster for encasing bones, we began our fossil cruise down a canon which was at one time in the fur-territory of the great Hudson Bay Company.

"No more interesting or instructive journey could be taken. High up on a plateau buildings and haystacks proclaimed a well-settled country, but habitations were rarely seen from the river, and for miles traveled through picturesque solitude, unbroken save by the roar of the rapids.

Especially characteristic of this canon are the slides, where the current, setting against the bank, has undermined it until a mountain of earth slips into the river, in some cases almost choking its course. In one of these slides we found several small mammal jaws and teeth not known before from Canada, associated with fossil clam shells of the Eocene age, a geological period estimated to have begun about 3,000,000 years ago.

"Along the upper part of the stream fossil shells and mammal jaws were obtained, but near the town of Content, where the river bends southward, a new series of rocks appeared, and—in these our search was rewarded by finding dinosaur bones. Specimens were found in increasing numbers as we continued our journey, and progress down the river was necessarily much slower. Frequently the boat would be tied up a week or more at one camp, while we searched the banks, examining the cliffs layer by layer, that no fossil might escape observation.

"As soon as a mile or more had been prospected or a new specimen obtained, the boat was dropped down to a new convenient anchorage. Box after box was added to the collection, till scarcely a cubic space remained unoccupied on board our fossil ark.

"On account of the heavy rainfall and frequent sliding of banks, new fossils are exposed every season, so that in a few years these same banks can again be explored profitably.

Where the temperature is not infrequently (heavily) 40 to 60 degrees below zero in winter, it is difficult to think of a time when a warm climate could have prevailed, yet such a condition is indicated by the fossil plants.

"As a result of the Canadian work, the Museum is enriched by a magnificent collection of Cretaceous fossils more than 3,000,000 years old, some of which are new to science."

Gordon Main, son of T. L. Main, and Clarence Sibary, son of Mrs. T. S. Sibary, Renfrew, are among the Canadians missing after the recent severe fighting in France. It may possibly be that they are prisoners.

"ROBIN HOOD" DELIGHTED

Large Audiences At the Grand Opera House on Saturday.

That ever popular comic opera, "Robin Hood," was heard by appreciative houses at the Grand Saturday afternoon and evening.

The company is a capable one. The principals all have good voices and the chorus is well trained. Herbert Watrous, in the part of Will Scarlet, was heard to splendid advantage, his magnificent bass voice delighting all.

The part of little John was in the efficient hands of James Stevens, who rendered "Brown October Ale" and other numbers in a charming manner. Phil Branson made a rollicking sheriff of Nottingham. Fred Walker was well cast as Friar Tuck, while Sol Solomon as Guy of Gisbourne made the most of his part.

The title role was taken by Ralph Brainard, who, besides being a capable actor, possesses an excellent tenor voice, and sang with ease and artistic finish.

"Auld-A-Dale" was played by Cora Tracey, who, besides having a pleasing stage presence, has a contralto voice that is exceedingly smooth and her singing of "O Promise Me" was a decided hit.

Carolyn Andrews appeared as Anabel, and sang her numbers in a most pleasing manner. Ivy Scott was a charming Maid Marlon, and has an exquisite soprano voice.

Three Hundred Fox Companies.

The solid and stable character of the silver fox breeding industry in Canada is attested by the manner in which Canada's fox companies have during the past two years stood the stress and strain of war conditions, closed markets and diminished values. Not one of the three hundred companies engaged in fox breeding has sought relief in liquidation. On the contrary, they are carrying on their business at the old stand and increasing their production from year to year. While temporarily suspending the payment of dividends, they have increased the numbers of their breeding stock and added largely to their productive capacity.

The pioneer silver fox breeders "budded better than they knew." They created a new industry necessary to commerce and capable of vast expansion. It is especially adapted for extension in every one of the nine provinces of Canada and the ten or twelve border states of the great American Republic. Any farm throughout these regions might profitably add a fox ranch to its equipment. Fur farming as an adjunct to agriculture adds a profitable factor to the ordinary farm, without displacing or disturbing any of the ordinary activities.

The grove or wooded lot furnishes the site and supplies the lumber for ranch construction. No farmer who adds a fox ranch to his establishment need keep fewer horses, cattle, sheep, swine, or poultry on that account. A small ranch will hardly require any addition to the number of farm help.

Canada and New Zealand.

The exports from New Zealand to Canada are in excess of the imports. The following table shows the value of the exports from New Zealand to Canada during the last six years:

Table with 2 columns: Year, Value. 1910: \$ 806,910. 1911: 977,335. 1912: 2,711,355. 1913: 2,823,319. 1914: 2,978,055. 1915: 4,239,115. Increase 1915 over 1914: 1,261,060.

In consequence of the higher prices obtained for exports, larger shipments and decreased imports, the balance of trade for 1915 amounts to the large sum of \$10,020,078. The following table shows the figures for four years:

Table with 3 columns: Year, Exports, Imports, Surplus. 1912: \$21,770,581 / \$20,976,574 / \$794,007. 1913: 22,890,672 / 22,286,279 / 604,393. 1914: 26,261,447 / 23,256,895 / 3,004,552. 1915: 31,748,912 / 21,728,834 / 10,020,078.

The fact that the exports during 1915 exceeded the imports by \$10,020,078 ensures a plentiful supply of money for all legitimate purposes. The only trouble anticipated is a shortage of shipping so that the export ports may be continued upon the same scale.

Located at Brantford

Deseronto, June 17.—R. H. S. Bedford, son of Henry R. Bedford, Deseronto, who has lately been with the W. C. Edwards Co. of Ottawa, has secured a position with the Schutz Brothers Company of Brantford, where he will have charge of the department of packing cases and novelties. Mr. Bedford was for some time with the Rathbun Company during which time that firm were making boxes for the Quaker Oat people of Peterboro.

John Mackay, Renfrew, has sold his summer home at Calabogie to Thomas F. Bame.

The Racking Pains of Sciatic Rheumatism

Were Well-nigh Unbearable—After Five Years of Suffering Cure Was Effected by Dr. Chase's Medicines.

For downright excruciating pain few ailments can be compared to sciatic rheumatism. Since this condition of the sciatic nerve denotes exhaustion of the nervous system, the logical cure is found in the use of Dr. Chase's Nerve Food to nourish the starved nerves back to health and vigor.

Reports are continually coming in to us regarding the splendid results obtained in the treatment of sciatic rheumatism by using Dr. Chase's Nerve Food after each meal and Dr. Chase's Kidney-Liver Pills occasionally as a means of arousing the action of the liver, kidneys and bowels and thereby keeping the system freed of pain causing poisonous impurities.

W. J. Talbot, Edenwald, Sask., writes: "It is a great pleasure for me to recommend Dr. Chase's Kidney-Liver Pills and Nerve Food as a cure for Sciatic Rheumatism. The pain I have suffered has been well-nigh unbearable. It would start in the hips and run down the legs to the toes, gradually getting worse. The nerves contract until one is practically useless. My doctor tried only other relief for a time. "For about five years was subjected to this trouble with severe attacks which would last about two months. The last attack I had was shortened to two weeks by the use of Dr. Chase's Kidney-Liver Pills and Nerve Food. This treatment was continued until I was satisfied that the cure was lasting." This statement is endorsed by H. E. Woolley, J.P. Dr. Chase's Nerve Food, 50 cents a box, six for \$2.50. Dr. Chase's Kidney-Liver Pills 25 cents a box, all dealers, or Edmanson, Bates & Company, Limited, Toronto.

CEREMONY OF ORDINATION

IN ST. GEORGE'S CATHEDRAL ON SUNDAY MORNING

Two Priests Ordained by the Bishop of Kingston—Sermon Preached by Rev. Mr. Swayne, Athens.

An ordination service was held in St. George's Cathedral Sunday morning. It was most impressive, and was conducted by the Bishop of Kingston, assisted by Dean Starr, Rev. Cecil F. Whalley, two were ordained priests, Victor O. Boyle and Cecil Winter. The parish of St. George's is Coe Hill, while the second has Shannonville for his parish. The candidates for ordination were presented by Ven. Archdeacon Dobbs. The ordination sermon, an able one, was preached by Rev. Mr. Swayne, rector of Athens. He said that ordination was a divine act, and required a divine agent. He referred to the sacredness of the Christian ministry, and said that the gifts of God were dispensed by men duly qualified to perform that sacred work. The sacraments of God were not appreciated, as was evidenced by the neglect of the holy communion and of the holy rites of baptism. It was not unusual to find whole families that were not baptized. The people did not seem properly to appreciate the necessity of ministers. As officers were necessary to an army, so ministers were necessary to the church's performing its sacred work. Parents endeavored, if possible, to have their sons who join the army qualify for commissions, in order that they might better fight for their country. God and the right. Was the same anxiety displayed about the Christian ministry?

The people should try to realize the great necessity of having faith in God, and should earnestly endeavor to accomplish the work that God would have them do. They should hold up before them the example of realizing the sacredness of their office, and should help them in every way that they might not be hindered by worries of an unnecessary kind.

The preacher called upon those to be ordained to show, by their life and character, that they had a lively appreciation of the glorious fact that they had been called to be ministers of Christ and stewards of the mysteries of God.

DARLINGSIDE NEWS OF VARIOUS KINDS.

Will Not Build a Barn This Season—Some Poetic Effusions.

Darlingside, June 17.—Robert McCullough was in Brockville Friday. Fred. Aikens, of Larue Island, was in Lansdowne Thursday. Frank Houston, Arnprior, visiting his sister, Mrs. James Chisamore, has returned home.

J. D. Latimer has disposed of his entire herd of dairy cattle, owing to ill-health.

Owing to scarcity of labor and the extremely wet season, Frank Tilton has decided not to build a barn this summer, but hopes to do so next season if conditions are favorable.

Fred. Warren, Lansdowne, has been busy this week crushing and distributing stone on the roads in this vicinity. The extremely wet weather makes it very difficult work, especially getting in and out of the piling grounds.

That remounts for the British army are to be bought in Canada this summer will be good news for the Canadian farmers. If our Government wants to give the general public an additional thrill of satisfaction in connection therewith they will take timely steps to see that T. de Witt Foster et al are not allowed to interpose themselves between the farmers and the British treasury.

Sweden, Norway and Italy have adopted the daylight saving plan, and a bill with similar purpose is before the United States Congress. Getting up early in the morning seems to be getting popular, provided one does it under a misapprehension that it's not early.

Darlingside Drippings. There's a world-wide world to greet you. And a thousand chances meet you. When you take the road of dreaming And go forth to win your way. You're welcome with your effort. As the sun is to the blossoms, And the whole world loves a faller With the true dream in his bosom! You're welcome, always welcome. To the chances time is giving; You're welcome, always welcome. To the toiling and the thriving.

There's a world-wide world to cheer you. And a thousand comrades near you. When you face the call to duty In this life that leads to luck. You're welcome, every moment.

God keep us restless Rather than dead; Give us instead, The hunger for growing, With energy glowing, By love ever led!

Uncle Sam Disappointed Syracuse Post-Standard. About six hundred men joined the army during the last week, bringing new enlistments up to 9,428, not quite half the desired number. More than half a million patriotically inclined citizens have paraded in different American cities under the banner of preparedness. Yet out of America's millions a mere handful have presented themselves to the recruiting agencies.

Lieut. Charles A. Wilson, Edmonton, aged 28 years, has been killed in action in France. He was a grandson of the late Charles S. Wilson, Picton.

Mrs. William Mackay, Renfrew, is offering her down town residence for sale. A bank may be erected on the site. And if the wife is untidy the husband may try to untidy.

Fetching New York Summer Dresses

In a great assortment of charming new styles made of awning striped silkenfil and voile, meadowbrook embroidered crepe, silverbloom muslin, floral voile, Georgette crepe, crepe-de-chene, taffeta and printed Marquisette.
