NOVA SCOTIA SOUND.

The Murray government has been sustained in Nova Scotia by the people and upon its merits. For thirtyfour years it has been in power, using that power aright and doing so well that a conservative print admits there was little at isue between the parties. This is another way of saying that there was little to complain of, and the electors had really no reason to withdraw their confidence from the government. The most that could be said was, "It is time for a change." Well, the old servant is sometimes the good servant, and it is not a cause for rejection that he has been long and faithfully at work

Two comments only are invited One is that there was no federal in terference in the election. Really? Is it posisble for the federal government to abstain from butting in Lyon is the most unassuming of them when there is any apparent advantage and to Lyon is due the splendid serto be gained? NEW MEXICAN OUTBREAK.

The government has been advised their own greatness. that President Carranza has despatched a note in which his demand is very peremptory, and if the Americans do not immediately move from Mexican soil they will be regarded as intruders and fired upon.

One has to recall the fact tha when President Wilson succeeded to office Mexico was in a turmoil. There were three claimants of the presidency-Huerta, Carranza and Villa The first named was a usurper. He seized the reins of government upon the assasination of Madero. Wilson hesitated before he acted. Then he regarded Carranza as the ruling authority or the one whom the United States would recognize. Huerta presently retired and Carranza assumed the presidency. It has a population of perhaps 20,000,000. The whites are in a great minority; the Indians come next; and the half breeds are overwhelming in their number. These half-breeds are uneducated and uncivilized. They are fighters, however, and very hard to

EDITORIAL NOTES.

What difference does it make on what date Dominion Day is observed if it is to be one of absolute idleness? Our national anniversary is the least honored of all the days of the year, point, past understanding.

The Federal Government is still truckling to the Nationalists. Does it still fear them? Does it expect another coup with their aid and assistance? Or is it simply providing for as many of them as possible before the day of reckoning comes?

The average annual expenditure on the streets is about \$3,590, and the estimated amount required to repair these street and approaches was \$10,000.

The by-law to fix the assessment of the Napanee Curling and Bowling Club was also defeated. The vote was: For the by-law, 191; against Raspberries will be a splendid crop 172, the majority of 19 not being enough to carry the by-law.

The funeral of the late John Mc-Callum was held Monday. Deceased was 61 years of age, and was for a number of years employed as switchman at the diamond by the G.T. Railway Company. He leaves one brother, Thomas, and one sister, Anne, both of Napanee.

Ernest Walker received a telegram from the Militia Department yesterday morning announcing the death in action of his son, Pte. Frederick Walker, of the 8th C.M.R. Fred enlisted with the aforementioned unit, when they marched through Napanee other sons serving with the colors, one in the hospital in France, where he lies wounded, one in England, and one in Ottawa.

HOT WEATHER

You say, "Great Scott! The day is hot! The solar rays are pelting, on my old form, till I'm so warm that all my lard is melting!" And when you meet, upon the street, some other panting duffers, each has his say about the way he sizzles, sweats and suffers. The more you think you're on the blink, the more you will be fretting; when ills abound and throng around, there's nothing like forgetting. We fume and curse, and pet and nurse our every punk affliction, when, if we'd smile and josh awhile, 'twould leave our jurisdiction. When heat is hot, I say, "I wot, no kick of mine will change it; the weather man pursues his plan and roars will not derange it. I did not weep when snows were deep, and in the blast I shivered, and I'll not sulk because in bulk the heat is now delivered. It does not help to howl and yelp, there is no good in snorting; I'll think of floes and
