din has been delivering? It is certainly is remarkable to find the man who, five years ago, was going around telling the people that it was sometimes necessary to shoot holes in the British flag in order to breathe the air of liberty, now starting out to stump the province calling for recruits to protect the flag. Will this inspire recruits to come forward, or

will it injure recruiting? Le Canada refuses to believe in his sincerity. It remembers that Mr. Blondin was one of the most energetic of the Nationalist orators in seeking to imbue the people with res the idea that Canada should refuseceived no requests for prayer for an- to participate in an Empire' war under any circumstances whatever. Le Canada adds: "Our French Canadians are logical. They knew Mr. Blondin for a man who; in opposition, fulminated against any participation in war, and declared that we owed nothing to Great Britain. And to-day they see this man, in office, waxing eloquent in favor of slch participation. Can they do otherwise than to attribute his convers-

A BETTER IDEA OF WHAT WE MEAN

It is the business of Sarrail's army advancing from Saloniki to shatter this new German Empire into pieces; to restore the Balkan nations and free them from German control; and to provide a future for the lands now under the Turkish Sultan in which the Prussian will have no part. If German military domination in these areas is broken, there will be a natural re-adjustment of the situation in the Balkans. No Balkan State desires to be a vassal of Germany, In Bulgaria, a Slav people, have been betrayed by Germanized rulers and by an army staff

which accepted without question the legend of German invincibility. If the Saloniki offensive is effective, the connection between Berlin and Constantinople will be broken; Bulgaria will be conquered; Turkey, cut off from supplies of money and material which keep her going, wi offer a steadily-lessening resistance to the Russian and British armies and the end of the season will find a third army menacing Austrian terri-

CHARLES AND I.

I met Charles Hughes in Estes Park, where large and rocky mountains be, and I shall treasure each remark that this great man addressed to me. The gems of thought from great men's lips are pearls we humbler men should prize, nor can the passing years eclipse the observations of the wise. "I shall be glad when summer's ceased," he said; "the heat has been a strain; but now the wind is in the east and I predict we'll soon have rain. In May and June it rained too much, and then the siege of drouth began; wheat shriveled at the hot wind's touch, and corn appears an also ran. The talk of Issues never stops, and Issues oft have little worth; I think the weather and the crops are all that count for much on earth. If we have rain when rain's desired, and sunshine when such shine we need, man gets all things he has desired, and

probably by friends on the outside way in favor of one who has the time him, then they pass; give us a million dollar rain, and nothing else will cut Court Service Come Dack Marrie

greatest American industries is to gather at an icecream parlor and order everything that looks as if it would cool the parched neck of the consumer.

A great change has come over the ice cream business in the last few years. Formerly there was only one kind of ice cream made, this being a rich, lumpy product which could be tasted for several hours after passing hence. Great care was taken to insert plenty of salt in the cream in the original rock formation, and one dish was usually sufficient for a man with a hard constitution. People formerly used ice cream as a pastry whereas nowadays it is ordered in feverish relays and consumed with

graphophone accompaniment. Plain ice cream is not used any more, except by the lower classes. The ornamental concoction known as the sundae has crowded it off the little round table. The sundae is ied under flavoring extracts, canned not want to drag her husband out to a near-sighted employee. When time to recuperate.
