Camp was spector-General of the Eastern Can- of the Y.M.C.A. becaking in a reptransferred to Barriefield to carry on adian forces, was to arrive to-day resentative rugby team formed by the athletic sports here and since then (Wednesday) and proceed to Barrie- soldiers of Barriefield. The favorite "things have boomed." At the open- field Camp to inspect the infantry- fall sport seems to be association terest. The battalions would not take hold of themselves however, and with so much work along other lines to demand his attention, the colonel had to resign. Mr. Fisher has taken his place however, and by devoting his whole time has already had several successful athletic contests carried

He is now planning a series of events, one on each night for the whole camp. On Wednesday there will be the individual championship awarded for the hop-step and jump open to the camp and on Thursday night a potato race or possibly sprint will take place.

In organizing baseball and football games, Mr. Fisher has been very successful. A schedule for the season as follows has been drawn up and games will be played on grounds that whave been laid out correctly to avoid disputes about boundaries. The schedule will be as follows:

Football: September 16th. 156th vs. 155th; Q.F.A., vs. 154th. September 23rd-155th vs. 154th; Q.F.A., vs. 156th. September 30th-Q.F.A. vs. 155th; 156th vs. 154th. fession a complete one, and though a October 7th-155th vs. 156th; 154th cavalry officer, he is well acquainted game being organized between the

Bring Smiles

New Post Toasties were perfected to overcome the defects of old-style corn flakes. And the hearty weleome they have received is ample proof that their superiority is recognized.

New Post Toasties have a self-developed, inner-flavor-the rich flavor of choice Indian corn. Try a handful dry -they're mighty good that way, and the test will prove that, unlike common flakes, they do not depend on cream and sugar for their palatability.

New Post Toasties do not "chaff" in the package, and they don't mush down in cream like common "corn flakes." The New Post Toasties are identified by tiny "bubbles" on each flake-produced by the quick, intense heat of the new process of manufacture, which also develops their wonderful new flavor.

Have your grocer send a package for tomorrow's breakfast.
