### John McMillan

M R. J. McMILLAN, who has initiated many notable improvements since he became General Manager of the C.P.R. Telegrams eighteen months ago, has just decided to inaugurate an important service entirely new to Canada over the hundred and ten thousand miles of wire under his immediate control. In the name of the day letter which may now be sent between points in Canada on the Canadian Pacific system at a rate very much reduced as compared with the usual commercial rush telegram. Mr. McMillan is convinced that many of those who send telegrams would be quite satisfied if these arrived on the same day, where as a proportion of the cost of the rush telegram is due to the cost of speedy delivery. The day letter of fifty words will be rated at one and a half times the cost of a regular rush message of ten words and can still bring an answer the same day, which is as quick as many people desire. There are sixteen hundred C.P.R. telegram offices throughout Canada, at each of which the new service will be in force, so that this will be a Dominion-wide service stretching from Loughsburg, Nova Scotia, to Victoria, B.C. Messages will be taken in either French or English, code words not being permissible.

Mr. John McMillan owes his success to a genial and tactful disposition which made him one of the most popular C.P.R. officials in the West, where his work centered until he was called to the head office in Montreal last year. Although less than fifty years of age, he joined the C.P.R. at its inception, working on construction in 1853. After acting for a number of years as operator at Donald, B.C. he became Inspector of Telegraphs at Nanaimo in 1892, Assistant Superintendent at Winnipeg in 1913, and finally Manager of the whole telegraph system in March, 1914.

## GOVERNMENT TO TAKE OVER CANNING PLANTS?

### Picton Manager Has Heard Nothing—Prices Are Likely to Advance.

T. W. Kinney, manager of the Old Homestead Canning Company, Picton, told a Whig representative, who was in that town on Wednesday, that he had heard nothing of the rumor that the Government intended to take over the canning factories in order that the output, which is below that of other years, might be conserved. Mr. Kinney explained the reduced output on the grounds of scarcity of labor and material. Asked if the prices of canned goods were likely to advance in price, he replied that undoubtedly they would. The factories had to pay more for their vegetables and fruits and also for their cans and labels. The cans alone were costing from \$5 to \$10 per thousand more than they did. In view, therefore, of the increased cost of production it naturally followed that the prices would have to be increased.
