BRITISH BIG GUN HAD A RE-MARKABLE JOURNEY.

She Had a Big Train Drawn by a Huge Gasoline Tractor and an Army of Men to Take Care of Her-Her Range is "Fifteen All Day Long.

HE young newcomer to the billet sat up, with a start and stared in wonderment while the ground rocked

"Needn't be alarmed, sonny," quoth an old-timer there as he unconcernedly lighted a "fag," "that's only 'Hefty Annie' doing a cough and spit at the Boches. Never heerd big guns barking before, I s'pose?" The youngster admitted that he

"Well, you'll soon get used to hem here, an' then you won't mind them no mor'n if they was your mother singing y' to sleep. It's fine music, m' boy, fine music when it's made by your own side, and damned unwelcome when it's made by the other." Having delivered himself of this terse description of gun-fire the old-timer stretched comfortably and whiffed his "fag" with great enjoyment.

"Hefty Annie" lay out in the fields nearby cunningly screened from the sharp eyes of the hawkmen from over the barbed-wire border who were always trying to locate Phones: Office 68; Res. 874 her whereabouts, with the sinister motive of compassing her destruction. Official documents, in their cold, unimaginative way, described her as "Howitzer, 15-inch, mark ," and so on. But to the more understanding minds of the men who "Annie" was a creature with a soul, something that could be talked to and had a truly feminine way of cylinder of steel which alternately labored and slept. But then officialdom, dry as dust and dull of vision, does not understand the psychology of guns as the men who work them

> "Hefty Annie" was not only hefty" in herself but she demanded the same useful quality from the 'court" over which she queened it with most exacting autocracy. No room there for unmuscular weaklings nor any slow of foot.

When "Annie" started upon her travels she did so in almost royal state. Her train spread over quite a considerable length of roadway. A huge-petrol tractor led the van-a strange-looking contraption with rear wheels almost as high as an omnibus' knife-board; then came "Annie" herself in solitary grandeur upon her special carriage and robed tarpaulins-the scarlet and ermine of her line. After her rolled the "pill-boxes," otherwise the ammunition wagons (so called because the battery humorist had chalked "Pills for the Kaiser" on their dull grey sides); then the "wireless" truck and sundry other vehicles all designed for the specific purpose of ministering to "Annie's" needs. These trundled along at a good pace under the persuasion of the tractor, which, although a queer-looking affair in itself, was indubitably "hefty" when it came to pulling.

"Somewhere in France" at last, and "Hefty Annie" was settling down to "own a bit of the earth." Dexterously, yet carefully, her "subjects" went about the task of erecting her throne. First, they laid the bed plates which formed the base of it; when all was ready tackles were rigged and "Annie" was enthroned with somewhat less pomp, perhaps, but with far greater solicitude for the permanency of her seat than is usually shown towards monarchs. Just what was done, how it was done, and why it was done would make an interesting story. Doubtless history will tell us all about the matter one day. This narrative, not being history, must stop at arousing curiosity

and not go on to satisfy it. Suffice it, therefore, to say that everything that had to be done was done-swiftly, deftly, and correctly, as the work of well-trained hands always is. Its completion found "Hefty Annie" sitting grimly on her seat and poking an ugly round snout contemptuously towards the enemy.

don Daily Mail.

"Fifteen miles or a bit more, sir, replied the "sub," whereat the subterranean voice rumbled back an expression of great satisfaction. And so it was that "Hefty Annie" began her reign. At intervals she coughed, a deep, raucous "hoof" that ripped its way through her whole body. Sometimes she did this just once or twice, at others quite a long paroxysm seized her. As "Annie" coughed she spat from her iron lips great mouthfuls of bright yellow flame, from the midst of which was ejected a huge shell that shrieked viciously away to a place so far off that only the observers aloft and in the lairs ahead could get
