MYSTERY OF THE REGINA TRENCH IS SOLVED.

The Official Eye Witness Tells of Successful Action on Saturday Last—Trench War Within Ten Minutes.

Ottawa, Oct. 26.—Lieut. General Sir Sam Hughes has received the following report from the Canadian War Records Office:

"Canadian Corps Headquarters in France, Oct. 22 (via London, Oct. 25).—The mystery of the Regina trench is solved. The resistance of the Germans at this point has been finally broken, and the British are now in possession of a line to which the enemy attached considerable tactical importance.

Wounded men who returned claimed that the enemy rifle and machine gun fire came from behind the trench and that in counter-attacking the Germans appeared to spring from a concealed position immediately in the rear.

Success Last Saturday.

In the big advance of October 21, which carried the British line forward on a frontage of 5,000 yards and to an average depth of 500 yards, the Canadians, with other troops, advanced in such a manner as to make a flank attack. They were successful.

In the general assault the task of the Canadians was a minor but a very important one. Their actual objective was only a length of 600 yards of the Regina trench immediately to the west of the village of Courcellette.

During the night of October 20-21 the assaulting troops took up their position. The night was clear and frosty.

Shortly before noon the enemy, suspecting perhaps the imminence of an attack, began a heavy artillery fire upon our front line.

Won Within Ten Minutes.

Shortly before noon the enemy, suspecting perhaps the imminence of an attack, began a heavy artillery fire upon our front line. About noon our own guns opened with the full fury of their massed batteries.
