

YEAR 83, NO. 260

KINGSTON, ONTARIO, WEDNESDAY, NOVEMBER 8, 1916

SECOND SECTION

BRITAIN'S FORESIGHT SAVES WORLD FROM BIG INCREASE IN THE PRICE OF RUBBER PRODUCTS

Financing and Fostering of Rubber Plantations in Her Colonies Now Proving a Boon to the Consumer in Keeping Prices Down.

The beneficial results accruing to the sagacity and foresightedness of the British Government in its promotion of the rubber industry and its subsequent "friendly" cornering of the crude rubber market are just now making themselves manifest in the manufacturing end of the industry.

When Great Britain began the fostering and financing of rubber plantations in 1893, the rubber world did not stand aghast, but smiled cynically.

To-day South America is producing about the same quantity of crude rubber and it constitutes only 23 per cent. of the world's supply.

In 1910 the demand for rubber began to increase materially. The world's production, both wild and plantation, for that year was 70,500 tons, and the cost three dollars a pound.

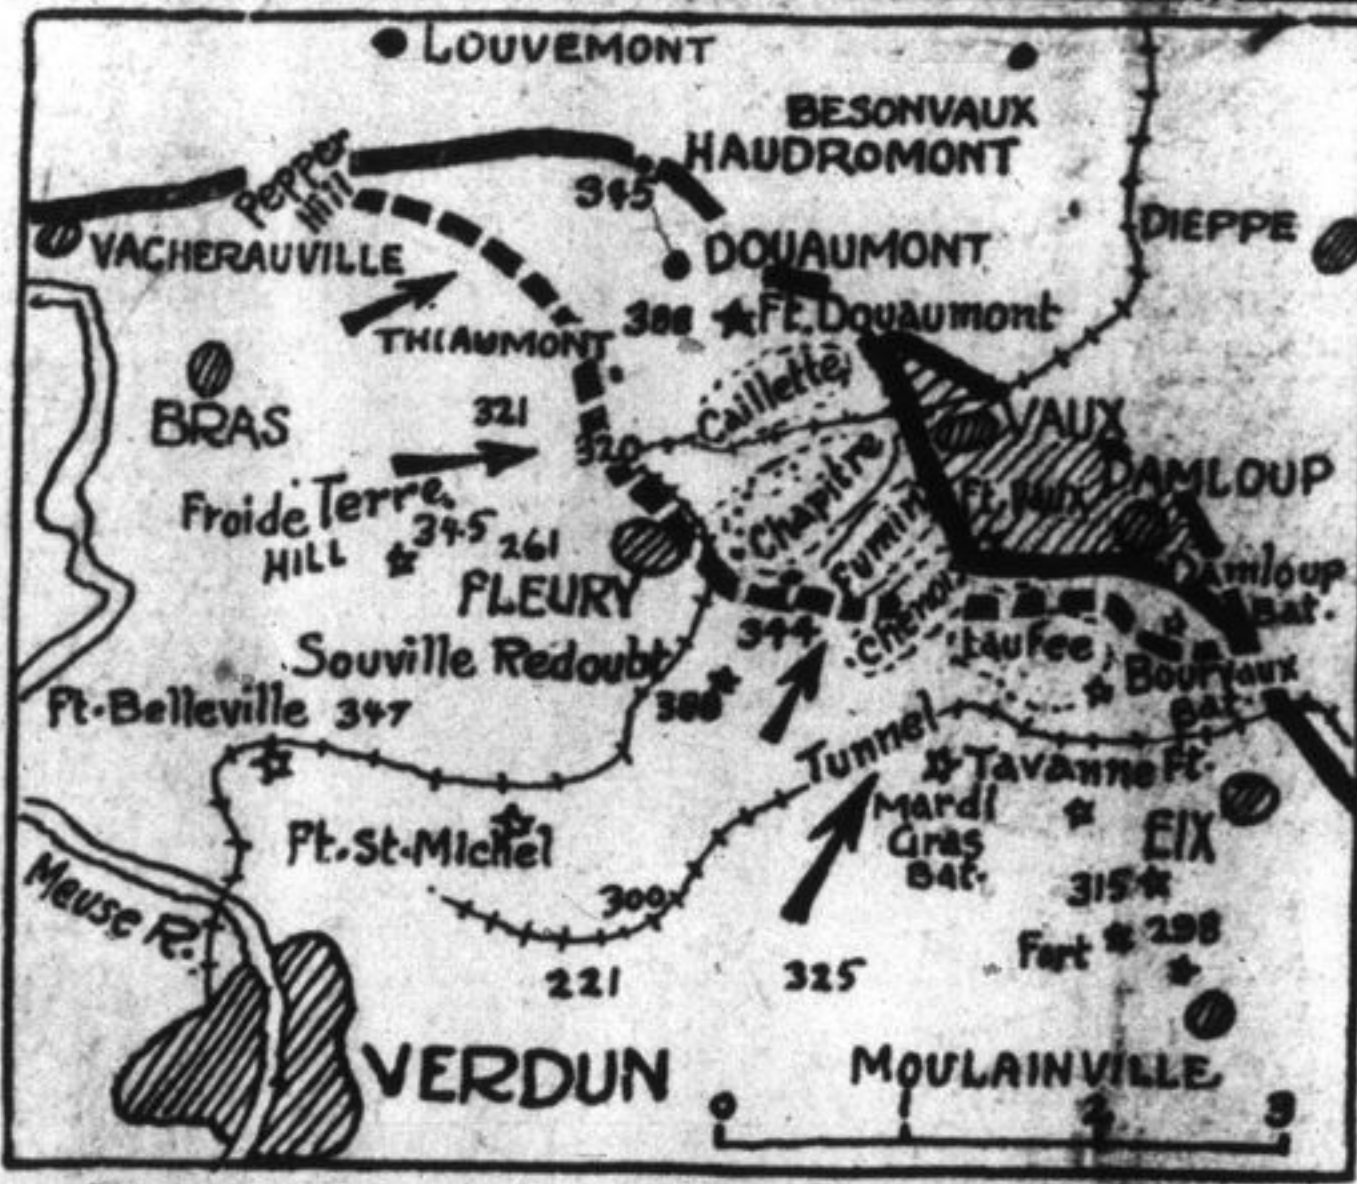

GERMANY'S WICKED SPIRIT AGAIN

Montreal News. The German Government intends to expatriate more French unfortunates from the occupied territories.

the master of the world. He cares little or nothing about what the Allies do to his own people.

That is a good suggestion, and it might be accompanied by an official declaration to Germany that the lives of its rulers shall guarantee the lives of the Allied prisoners now held by that country.

Two-thirds of the so-called society "400" are ciphers.

ALLIES MAKE BIG GAINS IN VERDUN SECTOR.

DAIRYMEN FIGHT CHEAPER BUTTER

Will Strenuously Oppose Attempt at Removing Prohibition in Oleomargarine

Ottawa, Nov. 8.—Protest against proposals which have been made to have oleomargarine placed on the free list are being received by the Government.

GENERAL PIERRE HOQUES, French Minister of War, who has reached Salonika on an important mission.

BELIEVE GERMANS HUMBUNGGING POLAND

"Independence" Only Effective After War and Offer Not as Good as Russia's.

London, Nov. 8.—The Times comments upon the Teutonic proclamation of an independent Poland under the heading "A trap for the Poles."

"Russia held out to the Poles as a reward for the sacrifices and exceptional danger she called upon them to face the abolition of the boundaries which have severed the living body of the nation since 1772, national freedom under the sceptre of the Czar, freedom of faith and self-government."

WELCOME TO COBOURG DOCTOR

Town Turns Out to Greet CHISEN From the Front. Cobourg, Nov. 6.—Dr. John R. Irwin, a well-known Cobourg physician, who has served for a year with the Imperial Medical Corps and was decorated by the King at Buckingham Palace for conspicuous bravery and attention to duty in going down into a mine shaft to give treatment to some men who had been buried by the explosion of a mine, returned from the front Friday.

TRADERS "TALKING PAR"

Mark Workman's Return From Sydney Causes Flutter. Montreal, Nov. 8.—Mark Workman returned from Sydney. His statement regarding the Dominion Steel Corporation is of a rosy sort and the rise of the security to 7 1/2 was an apparent reflection of the president's views.

Nothing pleases a fat woman more than to have some man call her his little girl. Yes, an artist isn't necessarily dangerous because his designs are bad. The factory hand that sings at his work lets up with the machine.

IN FIVE MINUTES NO SICK STOMACH, INDIGESTION, GAS

"Pape's Diapepsin" Is the Quickest And Surest Stomach Reliever.

If what you just ate is souring on your stomach or lies like a lump of lead, refusing to digest, or you belch gas and eructate, why dyspeptic troubles of all kinds must go, and why it relieves, sour, out-of-order stomachs or indigestion in five minutes.

Ask your pharmacist to show you the formula, plainly printed on these fifty-cent cases of Pape's Diapepsin, America. And who to attend to all the peptic troubles of all kinds must go, and why it relieves, sour, out-of-order stomachs or indigestion in five minutes.

Get some now, this minute, and rid yourself of stomach misery and indigestion in five minutes.

DARLINGSIDE NEWS AND ALSO COMMENT

Correspondent Thinks People's Incomes Should Be Protected From Food Boosters

Darlingside, Nov. 7.—Miss Melville, teacher, near Gananoque Junction, whose home is on Howe Island, and who is attending the Teachers Institute at Lansdowne, was a weekend visitor at J. Patterson's Larue Island.

Henry Hunt, Larue Island, has rented his farm for a term of years to R. Chisamore. Mr. Hunt has built up a splendid trade for his summer resort, which requires all his attention.

Miss Jennie Kirker, was a visitor at Darlingside Thursday. Mrs. Robert Beaubien, and daughter Dorothy made a visit to Howe Island, Saturday.

Butter, being scarce and high in price all over the country, and liable to get scarcer and still higher in price the proposal is made that the law be amended to allow the importation and manufacture of margarine, and unless the consumer of limited means is to be left to eat "dry bread" it may come to that.

"Tie to the pen and press we mortals owe. All we believe, and almost all we know."

A Manchester judge has jailed two Government inspectors who passed inferior goods, thus allowing the manufacturers to make huge profits out of the war fund. If in England, why not in Canada?

A Lethbridge farmer has a crop of wheat averaging more than 53 bushels to the acre, and there was a thousand acres of it. That lucky man will clean up a fortune on the season's operations. But he is not making it out of the war.

These are times when the citizen at home is called upon to make sacrifices in the common cause, different but just as real as those which are being made so heroically by the citizens who have enlisted. When contributions are urgently needed for the Patriotic fund, the Red Cross fund, the Belgian relief fund, and when the Government is appealing to the public to subscribe successive

war loans of hundreds of millions of dollars, it is important that the income of the citizen be conserved to the last degree. His ability to meet those calls for money depend on what margin he has left after paying his household expenses. If these expenses are swelled by artificial manipulation, the funds must suffer accordingly.

GERMAN HATRED OF U. S. BITTER

Failure to Win War Attributed to America's Munition Supplies.

LONG TO DEAL BLOW

AT UNCLE SAM FOR HIS OPPOSITION TO THEM.

New York Newspaper Man Writes of Sentiment as He Found It—Yankees Made the Sacrificial Goat.

New York, Nov. 8.—Herbert Bayard Swope, staff correspondent of The World, tells in The World of Germany's hate for the U. S. and the reasons inspiring it.

"Throughout Germany to-day the hatred for America is bitter and deep. It is palpable and weighs you down. All the resentment, all the blind fury Germany once reserved for England alone have been expanded to include us and have been accentuated in the expansion.

"The Germans have an outlet for their feelings against England—they express themselves on the battlefields and through the Zeppelins and submarines, but against America they lack a method of registering their enmity. And so this bitterness that cannot be poured out has struck in and saturated the whole empire.

"The chagrin and humiliation of their failure to end the war before now through victory are visited upon America. The failure gave birth to hatred. Throughout the length and breadth of Germany the belief is certain and unqualified that had it not been for American moral and physical help to the Allies the war would have been long since over.

"It is a common thing to hear in Germany that America has a secret alliance with England, under which she is operating now; it is even more common to hear that America is deliberately seeking to prolong the war and circumvent peace for the 'blood money' she is making out of the struggle.

PECULIAR FATAL MISTAKE

Quebec, Nov. 8.—A most unusual accident caused the death of Nap. Hebert, a youth from Yamachiche, at Three Rivers. The lad, who worked at the Wayagamack paper mills, was strolling along the street and, to prevent a fall, laid his umbrella against the wall, and one of the wires entered his nose, forcing its way out through the forehead, causing almost instant death.

Child Killed by Swallowing Bean

St. Catharines, Ont., Nov. 7.—Picking a bean from the floor on which he was playing, Emory, three-and-a-half-year-old son of Wilbert Branscombe, swallowed it before his mother could prevent him. Before a doctor arrived the child was dead.

Don't keep a leap year girl waiting for an answer. She may have another engagement in view. A woman does as she pleases before marriage, and after marriage her husband does as she pleases.

LIQUOR DISPENSARIES IN SASKATCHEWAN

Will Not Be Closed Before People Have Voted on Question, Says Premier.

Regina, Sask., Nov. 8.—The dispensaries in Saskatchewan will not be closed until the people have declared their will at the coming referendum, Premier Martin declared this morning.

"I believe the liquor stores will be voted out by a large majority," said the Premier, "but I am not in favor of closing them until the people have expressed their preference. I know that a large number of people in this province are opposed to the Government being in the liquor business, but after the study I have been able to make of the conduct of the system, I believe that properly controlled stores afford the most desirable means of dealing with this remnant of the traffic."

Premier Martin said further when asked if the Government would introduce a direct prohibition bill this session; that the question of further legislation had not been decided. There would have to be some liquor sold for medicinal purposes, he said, and whether this would be sold by druggists under the control of a central Government authority had not been decided.

CLIMATE LESS SEVERE

What Study of Larger Glaciers Has Revealed.

Dr. Charles D. Walcott, secretary of the Smithsonian Institution, and Mrs. Walcott have just returned to Washington after several months' field work in Canada. Accompanied by only a packer and cook, they spent most of the summer and early fall on the continental divide, which forms the boundary line between Alberta and British Columbia, south of the Canadian Pacific Railway, studying the cambrian rocks containing the fossil remains of the earliest animal life.

Some years ago Dr. Walcott found a remarkable fossil fauna in boulders which had been carried into Kicking Horse canyon by glaciers that have long since disappeared. This season he located the source of these boulders high up in the mountain cirque, where a portion of what must have been a great hanging glacier is still active.

Mrs. Walcott, formerly Miss Mary Vaux, of Philadelphia, who has studied glaciers for several years, and is well known as an Alpinist, visited Glacier, British Columbia, where she measured the position of two large glaciers and determined that the front ice foot in each case had retreated at the rate of 100 feet a year during the past two years. Steel plates were placed on the ice on the present surveyed boundary lines. The plates will be buried beneath the winter's snow, but, since their positions are relatively low as to altitude, the snow will be melted off next summer, and their locations then will indicate the amount of forward flow of ice during the year.

Mrs. Walcott's studies prove that the ice has been steadily retreating during the past six years. Her measurements agree with observations made in Alaska, and indicate that the climate is not as severe as on the Pacific side of the continent as it was a decade ago.

Occasionally riches fly away from an honest man and roost on the perch erected by the other fellow. It takes more than a wooden head to produce thoughts that will burn.

Grape-Nuts Flavor

Grape-Nuts food is probably the most appetizing form in which honest whole wheat is utilized as food.

But to whole wheat is added malted barley in making Grape-Nuts, and the sense of taste quickens at once when a spoonful of the food is eaten with cream. For the barley has a rich, individual taste which, blended with the sweetness of wheat, creates a rare flavor recognized by the palate as unusually new and delicious.

Aside from its wonderfully vitalizing value as a food, Grape-Nuts has a flavor that has made it a favorite everywhere.

"There's a Reason"

Made in Canada.

Canadian Postum Cereal Co., Ltd., Windsor, Ont.

Successful use by millions of women for generations and expert scientific opinion have thoroughly established the superior merits of

ROYAL BAKING POWDER

Absolutely Pure

No substitute exists for making biscuits, cake, muffins and pastry of equal quality and healthfulness.

Royal is made from Cream of Tartar, derived from grapes—a natural food element—as contrasted with materials from mineral sources used in cheaper baking powders.
