CHEAPER COST OF LIVING

PROPOSALS OF BRANTFORD TRADES AND LABOR COUNCIL.

These Will Be Considered by Local Committee, Which Will Hold Its First Sitting Saturday Evening.

The committee which has been appointed by the local Trades and Labor Council to inquire into the prices of milk, bread and coal and to consider the remedy to be adopted in Brantford Trades and Labor Council will meet Saturday evening. The Brantford council recently submitted a communication to the municipal council of that city, suggesting federal and local action. This communication has been sent to various Trades and Labor Councils with a view to securing concerted action. It points out that "bread made from Canadian wheat is cheaper in Britain than in Canada, although ocean freight and insurance charges are five times greater than they were before the war, an outlet which the Canadian profiteer in flour and bread entirely avoids." It contends that "no nation is justified in permitting the sale abroad of food produce which is needed at home."

Federal Action.

It suggests that the following representations be made to the federal government: (1) To prohibit altogether, or to regulate in the public interest, the exportation of food produce, natural or manufactured, to the extent the sufficient is available for sale in Canada to meet normal demands.

(2) To remove tariff barriers on food produce so that Canadian consumers may make goods from other sources any shortage of articles of food which may exist in Canada.

(3) To adjust the demand for butter to the supply by permitting the manufacture and importation of margarine or other butter substitutes under proper regulations.

(4) To fix, after adequate investigation of the cost of production, the price of wheat for the home market.

(5) To fix a fair price to be charged by millers for flour.

(6) To control the importation of coal at the points of entry and to fix the price of same at those points, and at Canadian mines, and regulate sales to dealers on an equitable basis, so that distribution may be free from monopolistic manipulation and conducted for the public advantage.

(7) To investigate the cost of production and to fix the price of canned goods, sugar and such other important articles of food as are believed to be subject to monopolistic control.

(8) To prevent, and, if necessary, to confiscate stocks of food in cold storage warehouses which have been or may be accumulated and held for the purpose of price manipulation to the disadvantage of the consumer.

Municipal Action.

The communication suggests to the Brantford City Council that it should seek the aid of other municipalities to procure legislation for all or any of the following purposes:

(1) The right to conduct municipal stores for the sale of natural and manufactured food produce.

(2) To conduct municipal coal yards.

(3) To have a monopoly of the sale of bread, milk, coal and such other commodities as may be thought desirable, and to engage in distribution or to grant exclusive licenses to private individuals for specific localities and periods, at fixed prices or a fixed percentage of profit on cost to be agreed upon.

(4) To conduct municipal bakeries.

(5) To appoint commissions of inquiry.

The Brantford Trades and Labor Council in its communication to the City Council states that its information would indicate that coal dealers were making a profit of \$3 a ton. It states further: "We are informed that people who control the coal from the mines supply only firms organized in local associations, and, therefore, able, if they feel so disposed, oppressively to fix prices to the consumer. Coal dealers not in the association are under the necessity of purchasing from mines working independently of coal combines, and of each other. At the present time independent dealers find it almost impossible to get supplies."

HAD BRONCHITIS FOR YEARS.

Bronchitis comes from a neglected cold and if neglected, will surely turn into pneumonia. The first symptom is a short, painful, dry cough, accompanied with rapid wheezing and a feeling of oppression or tightness through the chest.

The phlegm raised from the bronchial tubes is at first of a light color but as the disease progresses it becomes of a yellowish or greenish color and is very often hard to raise.

Dr. Wood's Norway is just the remedy you require as it loosens the phlegm and heals the lungs and bronchial tubes.

Mrs. Chas. Breen, Amherst, N.S., writes: "I was troubled for years with bronchitis, and could not find any relief. I was especially bad on a damp day. I went to a druggist and asked him for something to stop the constant tickling in my throat. He gave me a bottle of Dr. Wood's Norway Pine Syrup, which I found gave me instant relief. I think it is the best medicine for bronchitis I know of. I now take care that I always have a bottle on hand."

"Dr. Wood's" is the genuine, put up in a yellow wrapper, three pine trees the trade mark, price 25c and 50c.

LIBERALS HELD ANNUAL RALLY

(Continued from Page 5.)

In conclusion the president declared that the Liberals had made party affairs subordinate to the affairs of the Empire, and had shown that they were second to none in loyalty to the British flag which deserved and commanded the respect of the world.

Officers Elected.

Michael Sullivan, chairman of the nominating committee, presented the following nominations, which were unanimously endorsed: President, Dr. A. W. Richardson, mayor of Kingston.

First vice-president, Ald. Nicholas E. O'Connor. Second vice-president, Robert J. Wright.

Third vice-president, James Halliday, warden of Frontenac county. Treasurer, Ald. Neil Polson, Jr., Secretary, Leman A. Guild.

A committee consisting of the officers and the Liberal alderman were appointed to organize vigorous committees in the different polling sub-divisions.

On motion of Ald. O'Connor, the following were made honorary presidents, Hon. William Harry, ex-Mayor Polson, W. G. Craig and John McKelvey.

Confidence in Laurier.

It was moved by G. A. Bateman, seconded by John McDonald, and resolved:

"That we, the Liberals of the city of Kingston and the village of Portsmouth desire to express and place on record our continued admiration for and loyalty to our honored leader, Sir Wilfrid Laurier, and his supporters in the House of Commons. His course during the thirty years in which he has carried the banner of Liberalism has won the devotion of his friends and the admiration of his opponents. His devotion to his King, his consecration to the Empire is admitted by all and the esteem in which he is held by the King's representative was most delicately expressed in the presentation of a loving cup on his departure for England. We feel that our honored leader has a grasp of Canadian and Imperial questions unequalled by any in our land and that before long the common people will recognize his worth and reward his past services by once more entrusting to his wise care the guidance and direction of our country's affairs. This in our estimation will be the best evidence to the mother country of her oldest child's continued devotion, for it will be a pledge that our heads, our hands, and our hearts, all we have, are placed on the altar of our Empire. We rejoice in our leader's renewed vigor and recovered strength and pledge him our loyal devotion."

Mr. Bateman, in presenting the resolution said that if Sir Wilfrid Laurier's idea of a Canadian navy had been carried out, valuable assistance could have been rendered to the mother country in policing the high seas, especially those waters adjacent to the coasts of Canada. Recently it had been reported that one of the boats of the despised Laurier navy had sunk a German submarine, and if there had been a fleet of such boats think of the good that it could have done. "Today's papers," continued the speaker, "state that a submarine had been seen near our coasts, and what have we got to defend ourselves?"

Sir Wilfrid, when in power, had fostered the wealth of the country, had developed the natural resources, and had done more than any man before or after him to weld the various races into one harmonious whole.

Confidence in Rowell.

It was moved by J. M. Elliott, seconded by H. F. Norman, and resolved:

"That we the Liberals of Kingston and Portsmouth assembled in our annual meeting wish to place on record our admiration for the untiring zeal and devotion in the cause of all classes of our citizenship shown by our leader, N. W. Rowell, who has never wavered in his attitude towards any public question and has cheerfully placed his valuable gifts and qualities at the disposal of the government when in his judgment their course was in the interests of the whole people. We welcome the fact that he has grown immeasurably in the esteem and regard of all classes and that he stands today very high in the public regard. We pledge him our undivided support in all matters that make for peace and prosperity to the end that our province may be the banner member of our great confederation."

Mr. Elliott, in submitting the resolution, stated that the fact that on various occasions the government had adopted Mr. Rowell's platform, showed that he was a leader worth while, one who was worthy of their esteem and confidence.

This resolution like the preceding one was adopted with much enthusiasm.

On motion of R. J. Carson, President Richardson, N. C. Polson, Sr., G. A. Bateman, and Michael Sullivan were appointed delegates to attend the annual meeting in Toronto of the Ontario Reform Association. The meeting concluded with cheers for the King.

PURE RICH BLOOD PREVENTS DISEASE

Bad blood,—that is, blood that is impure or impoverished, thin and pale,—is responsible for more ailments than anything else.

It affects every organ and function. In some cases it causes catarrh; in others, dyspepsia; in others, rheumatism; and in still others, weak, tired, languid feelings and worse troubles.

It is responsible for run-down conditions, and is the most common cause of disease.

Hood's Sarsaparilla is the greatest purifier and carter of the blood the world has ever known. It has been wonderfully successful in removing scrofula and other humors, increasing the red-blood corpuscles, and building up the whole system. Get it today.

MAJOR PENSE ADDRESSES.

The Collegiate Institute Club on His War Experiences.

On Friday evening in the Y.M.C.A. parlors, Major H. E. Pense, of the 21st Battalion, spoke to the Collegiate Institute club, relating a few of the experiences of himself and his unit while in Belgium, and he referred briefly to the part the battalion took in the fighting about Courcellette at the Somme. The boys were much interested in the incidents he related of the life of the British soldier in the field. Major Pense paid a warm tribute to many of the officers and men he had been associated with, some of them having fallen in action, while others are still playing a noble part in our fight against the enemy. He mentioned having met a number of ex-pupils of the Collegiate Institute in Belgium, where the K.C.I. is so well represented, in some cases by boys who have not yet completed their studies at the institute.
