NO ARBITRARY MEASURES

But the Government Wants to Enforce Rest Day.
(Special to the Whig.)

If any further suggestions should be made from time to time they would receive consideration.

Stomach Medicines Are Dangerous.

DOCTORS NOW ADVISE MAGNESIA
Just how dangerous it is to indiscriminately dose the stomach with drugs and medicines is often not realized until too late. It seems so simple to swallow a dose of some special mixture or take tablets of soda, pepsin, bismuth, etc., after meals, and the folly of this drugging is not apparent until, perhaps, years afterward, when it is found that gastric ulcers have almost eaten their way through the stomach walls. Regrets are then unavailing; it is the early stages, when indigestion, dyspepsia, heartburn, flatulence, etc., indicate excessive acidity of the stomach and fermentation of food contents that precaution should be taken. Drugs and medicines are unobtainable and often dangerous—they have little or no influence upon the harmful acids and the wise doctors are disregarding them and advising sufferers from indigestion and stomach trouble to get rid of the dangerous acid and keep the food contents bland and sweet by taking a little pure magnesium instead. Disrupted Magnesia is an absolutely pure anti-acid which can be readily obtained from any drug store. It is absolutely harmless, is practically tasteless and a teaspoonful taken in a little warm or cold water after meals. It is absorbed and found quite sufficient to instantly neutralize excessive acidity of the stomach and prevent all possibility of the food fermenting.

IF YOUR BACK HURTS OR BLADDER BOTHERS, DRINK LOTS OF WATER.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean, like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys and to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness. Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.
