

THE CHIEF CHARM OF LOVELY WOMAN

Soft, Clear, Smooth Skin Comes With The Use Of "FRUIT-A-LIVES".

NORAH WATSON, 86 Drayton Ave., Toronto, Nov. 10th, 1915.

A beautiful complexion is a handsome woman's chief glory and the envy of her less fortunate rivals. Yet a soft, clear skin—glowing with health—is only the natural result of pure blood.

"I was troubled for a considerable time with a very unpleasant, disfiguring rash, which covered my face and for which I used applications and remedies without relief. After using 'Fruit-a-lives' for one week, the rash is completely gone. I am deeply thankful for the relief and in the future, I will not be without 'Fruit-a-lives'."

NORAH WATSON.

50c. a box, 6 for \$2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-lives Limited, Ottawa.

Dame Fashion Hints to Motorists.

Smart extra coats are shown in a large number of models. One, of yellowish tan Bolivia cloth, has a full raglan back with a double-breasted front, with a four-inch waist gathered at either side and belted with a buttoned strap. The sleeves have deep cuffs with ruffles of the cloth finishing the tops. The collar is a convertible model, and the coat is lined with wine colored satin. At the bottom of the front there are two three-inch wooden buttons with cord loops. Another coat is of the new plaid twilled gabardine. The plaid is black, white, green and a red line making an overplaid. The model is a pleated raglan with a wide girdele belt.

Sweater suits are an innovation in the sport suit class. The skirts, many of them side pleated or kilted, are made of khaki kool silk. The sweater is chosen in the ground color of the silk and is finished with collar, cuffs and sash of the silk. The hat is chosen of the same color as the sweater and the brim and trimming are made of the silk. Again the silk appears in the parasol and wrist bag. White silk shirts are worn with the costumes. Some of the suits are made of plain wool, with silk fibre sweaters.

Rubbered silk air pillows and hot water bottles are touring conveniences. They come in small envelopes to match. Ice bags come in the same style.

Very convenient models, in pigskin or in beaver leather, in writing cases are shown for touring use. The cases are flat when closed and open right and left. In one side there are places

for paper, postals and envelopes, and on the other side are other deck conveniences. In the middle are the blotter pad and the pens.

White chiffon veils, with hem-stitched hems of colored silk, and black chiffon, with light colored borders, are featured again for spring wear. Large polka dotted veils, the dots being of beads, are popular but not very becoming, for they hang heavily and do not drape softly about the head. The gold and silver embroidered net veils are used over small velvet toques, but are not suitable for anything but limousine wear. The white Shetland with the striped or Scotch plaid border, is very much used with the plain white or black sailor hat.

Early spring will show a goodly sprinkling of black net parasols flower trimmed in flat-bouquet fashion, with hats to match. One very pretty example is of black with old blue forget-me-nots grouped in flat bunches about the size of a silver dollar. The hat, a high English turban, has a satin band covered with a stiff scant ruche of black net caught with bunches of the flowers.

Other parasols are also making their appearance and one little model is especially attractive. It has leather handles and wrist ring, and a frame with hinges so that one may bend it in any position. The covering is of Havana brown silk entirely covered with narrow fringed ruffles.

For the woman who runs her own car black dogskin gloves with tan trimming are among the latest suggestions.

NEWEST NOTES OF SCIENCE

An engine run by sewer gas is the invention of an Australian engineer. Woven wire poles for electric wires or lights have been invented by a Chicagoan.

Experts have estimated the iron ore deposits of Sweden at about 1,300,000 tons. Folding covers, easily put into use have been invented for protecting plants from cold.

Floating buoys made of concrete for mooring vessels have been invented by an Englishman. By using a new jack with a rocker-like base an automobile can be made literally to lift itself.

Russia's annual production of salt, which a government monopoly controls, exceeds 2,100,000 tons. A novel bath tub stool has but two legs, hooks that engage the rim of a tub helping to support it.

A gum that yields from ten to twenty per cent. pure rubber has been discovered in the Malay peninsula.

For indoor target practice a pistol from which a ping ball is shot by a spring has been patented.

In Italy a process has been invented for making sidewalk tiles of screening from old brick pavements. Ladders outside a new gas range move a broiler inside to any desired position with relation to the heat.

Side wind shields to be fastened to automobile doors so as to swing with them, are an English invention.

Within the case of a new clock of the grandfather type are concealed a phonograph and cabinet for records. Pitchblende has been discovered in India and a syndicate has been formed to exploit the deposits for radium.

A recently invented textile for undergarments stretches lengthwise, but not across the weave of the material.

From France comes a two pronged hatpin, the prongs being so shaped as to act as springs to hold it in place.

Aerial propellers driven by portable motors have been placed on the market for bicycles, canoes and ice yachts.

Demands for telephone service in Japan are about 150,000 ahead of the government's ability to supply equipment.

Of recent invention is an electric heater that can be inserted into any household water tank to heat its contents.

Australian inventors have perfected an automobile tire made of coir fiber for use on bush tracks and overland routes.

More than 600 flour mills in the United States are using electric power in preference to steam, gas or even water power.

There are more than 85,000,000 sheep in Australia and nearly 25,000,000 in New Zealand, or more than eighteen for each resident.

For running an ice cream freezer an electric motor has been invented that can be supplied with current from a light socket.

The germ theory of the transmission of contagious diseases was entertained as far back as 1657, when the plague ravaged Rome.

Whalebone strips replace bristles in a new hair brush that is intended to last for years and to stimulate the scalp of a user.

Of English invention is a magnifying glass that may be attached to a pencil or engraving tool to aid a craftsman or engraver.

A periscope to be attached to field glasses and provided with lazy tongues to regulate its height is the invention of a New Yorker.

An artificial butter coming into use in Europe to replace the creamery variety is made of cocoanut oil and hydrogen, blended with milk.

Mounted on a new polishing machine for jewelers is a suction fan to catch and save the particles of precious metals that are thrown off.

The thinnest of drawer fronts will contain a new German furniture lock the entire mechanism of which is contained in a cylindrical tube.

A pin to be thrust into the centre of the fruit enables a new grapefruit knife to be passed around close to the skin easily and accurately.

Deaf patrons of a London theatre have been provided with head telephones, the sounds being gathered on the stage by megaphone transmitters.

One half of a new shoe brush is composed of bristles and the other of sheep's wool plisher, while the top holds a collapsible tube of polish.

A system of shorthand writing for the Chinese language has been invented by a native of that country, who has attained a speed of 140 words a minute.

Time saving is the chief feature of a new ironing board cover that can be quickly strapped to clamps permanently attached to the under side of a board.

In normal times the Spice Islands of Zanzibar produce about 90 per cent of the world's supply of cloves, an average crop approximating 16,000,000 pounds.

A machine has been invented that registers passengers as they enter a street car and shows the number of uncollected fares until the conductor gets the money.

Power to operate the fog signals and light in a German lighthouse is controlled by electricity from a switchboard safe on land, 1 1/4 miles distant.

One of the newest forms of harness to carry an umbrella over a person's head employs a belt and shoulder straps to hold the rod up and the centre of a user's back.

That growing plants will turn toward radium emanations as they do toward light has been proved by a Vienna scientist after a series of interesting experiments.

A machine that permits very close comparisons to be made between genuine and counterfeit money for the detection of the latter is the invention of a Chicago man.

A distance record for radio telegraphy was established recently when a steamship near Australia picked up messages sent from a station in Germany 11,500 miles away.

The backs of the brushes in a new toilet case are so shaped that they fit together when the case is closed and avoid the necessity for pressing the bristles together.

The Peruvian government has appropriated \$25,000 a year for the next three years for the establishment and maintenance of a civil and military aviation school at Lima.

To lessen scrubwomen's labors an inventor has patented a metal ring mounted on casters that can be clamped to the bottom of a pail to enable it to be moved about a floor.

Target practice without ammunition has been made possible by an Englishman who has invented a camera to be attached to a rifle to photograph a target as the trigger is pulled.

The propeller of a new motorboat of extremely shallow draft operates in a solid body of water as it is mounted in a tunnel above which is a vacuum tube into which water is drawn.

An English scientist has figured that 30 per cent of cigars, cigarettes and smoking tobacco remains after smoking in the form of ashes, from which twenty per cent. of potash can be extracted.

To enable ushers in motion picture theatres to signal to one another an inventor has patented electric lamps to be attached to their finger tips, supplied with current from a dry battery.

Pulmonary tuberculosis is being treated by a Danish physician with air that has been subjected to the action of ultraviolet rays, which seems to have a healing effect when inhaled through the mouth.

To aid in the capture of automobile thieves a Los Angeles man has invented a clamp to be locked about a tire which makes a loud noise each time it strikes a pavement and leaves an easily followed trail.

By teaching firemen to handle coal scientifically a Hamburg society with more than 500 members aims to produce the highest possible efficiency from steam boilers with the least possible emission of smoke.

Concrete in a burning building in Philadelphia was little damaged by the changes of temperature from the intense heat of the fire to that of icy water used by firemen, while granite was practically ruined.

Platinum thrown away by early Spanish explorers, ignorant of its value, often is found in excavating foundations for new buildings in Colombia, sometimes in sufficient quantities to pay the cost of a building.

BREAKING OUT ON BOY THREE YEARS

Healed by Cuticura Trial Free

"My little boy's trouble started with a rough spot kind of dry and scaly. It lasted for three years becoming larger and he had had face more covered with it. The breaking out was red and inflamed and itched more at night and when he was being washed. He was very cross at times. Then I tried Cuticura Soap and Ointment. In a month's time he was healed." (Signed) Mrs. Bert Sutton, 56 Paisley St., Guelph, Ontario, December 20, 1915.

Sample Each Free by Mail With 22-p. Skin Book. Address postcard: "Cuticura, Dept. J. Boston, U.S.A." Sold throughout the world.

DON'T WEAR A TRUSS!

After Thirty Years' Experience I Have Produced An Appliance For Men, Women or Children That Cures Rupture.

I send it on Trial. If you have tried most everything else, come to me. Where others fail, where I have my greatest success. Send attached coupon today and I will send

The above is C. E. Brooks, inventor of the Appliance, who cured himself and who is now giving others the benefit of his experience. If returned write him today at Marshall, Mich.

You free my illustrated book on Rupture and its cure, showing my Appliance and giving you prices and names of many people who have tried it and were cured. It gives instant relief when all others fail. Remember, I use no salves, no harness, no ties.

I send on trial to prove what I say is true. You are the judge, and once having seen my illustrated book and read it you will be as enthusiastic as my hundreds of patients whose letters you can also read. Fill out free coupon below and mail today. It's well worth your time whether you try my Appliance or not.

FREE INFORMATION COUPON

Mr. C. E. Brooks, 2221 State St., Marshall, Mich. Please send me by mail in plain wrapper, your illustrated book and full information about your Appliance for the cure of rupture.

Optimism consists in asking for cream at a boarding house.

McLAUGHLIN

"WHEN BETTER AUTOMOBILES ARE BUILT - McLAUGHLIN WILL BUILD THEM"

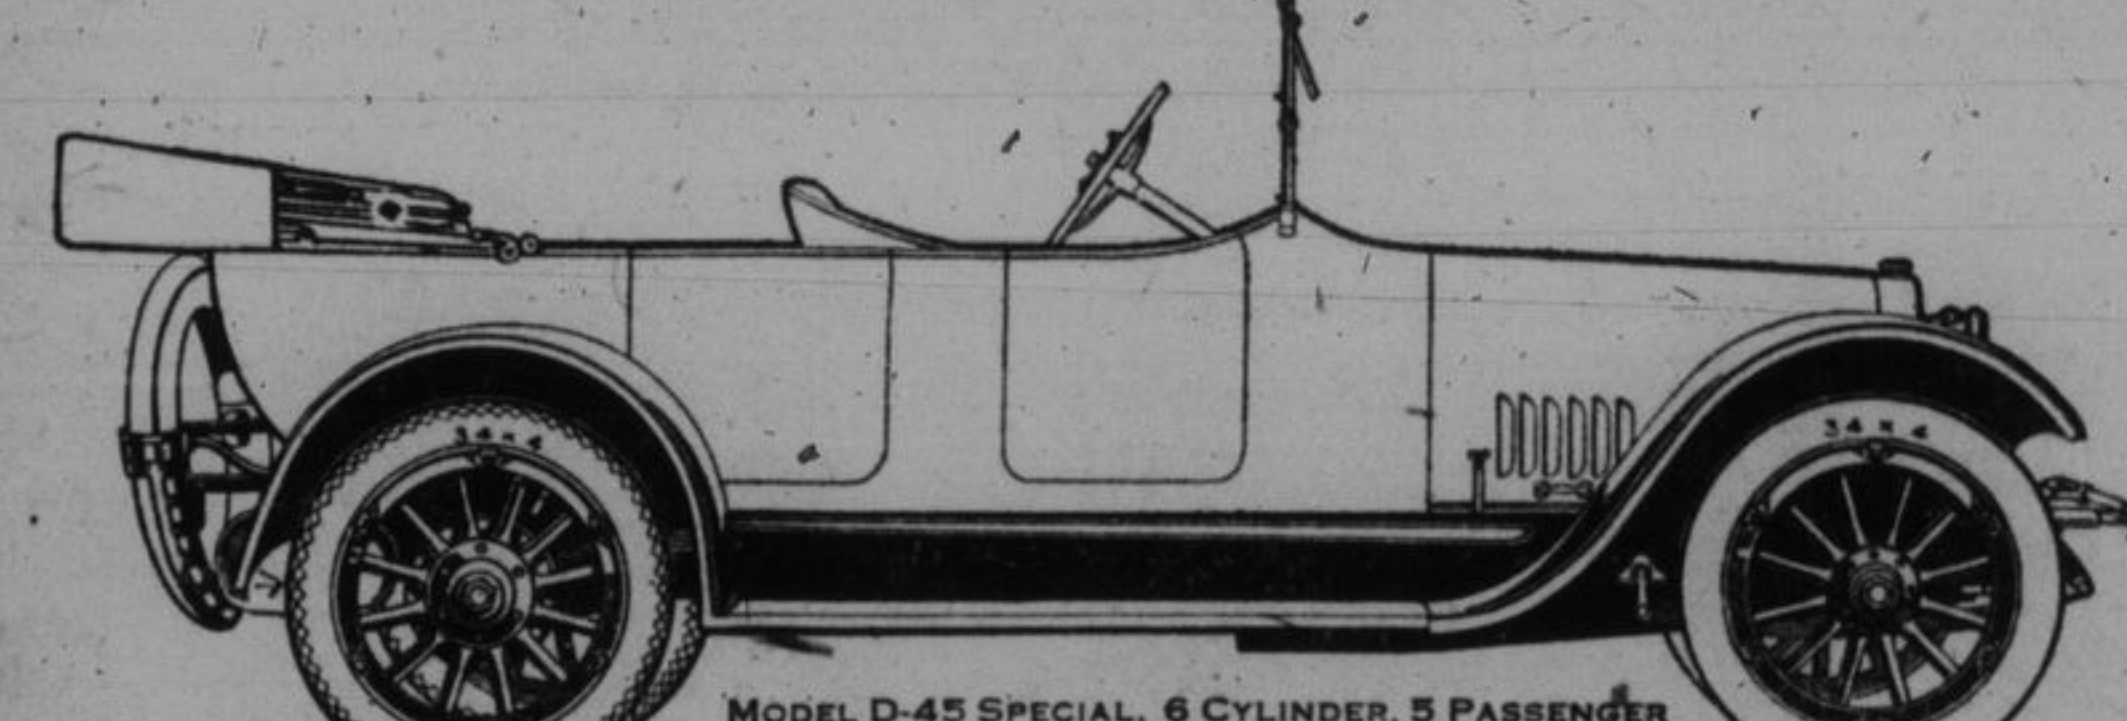

THIS appropriate phrase is more than a working motto, more than a stirring slogan—it is a promise backed by performance.

McLaughlin builders have won today's undisputed leadership on a Big Idea—a right principle, rightly applied, the famous McLaughlin Valve-in-Head Motor.

But McLaughlin science, skill and building honesty, is ever ready to make that "better" automobile whenever it can be built.

The constant aim toward the greater service is the way McLaughlin builders prove their appreciation of Canada's endorsement.

Send for new Catalogue "A" showing complete line to The McLAUGHLIN MOTOR CAR CO., Limited, OSHAWA, ONTARIO.

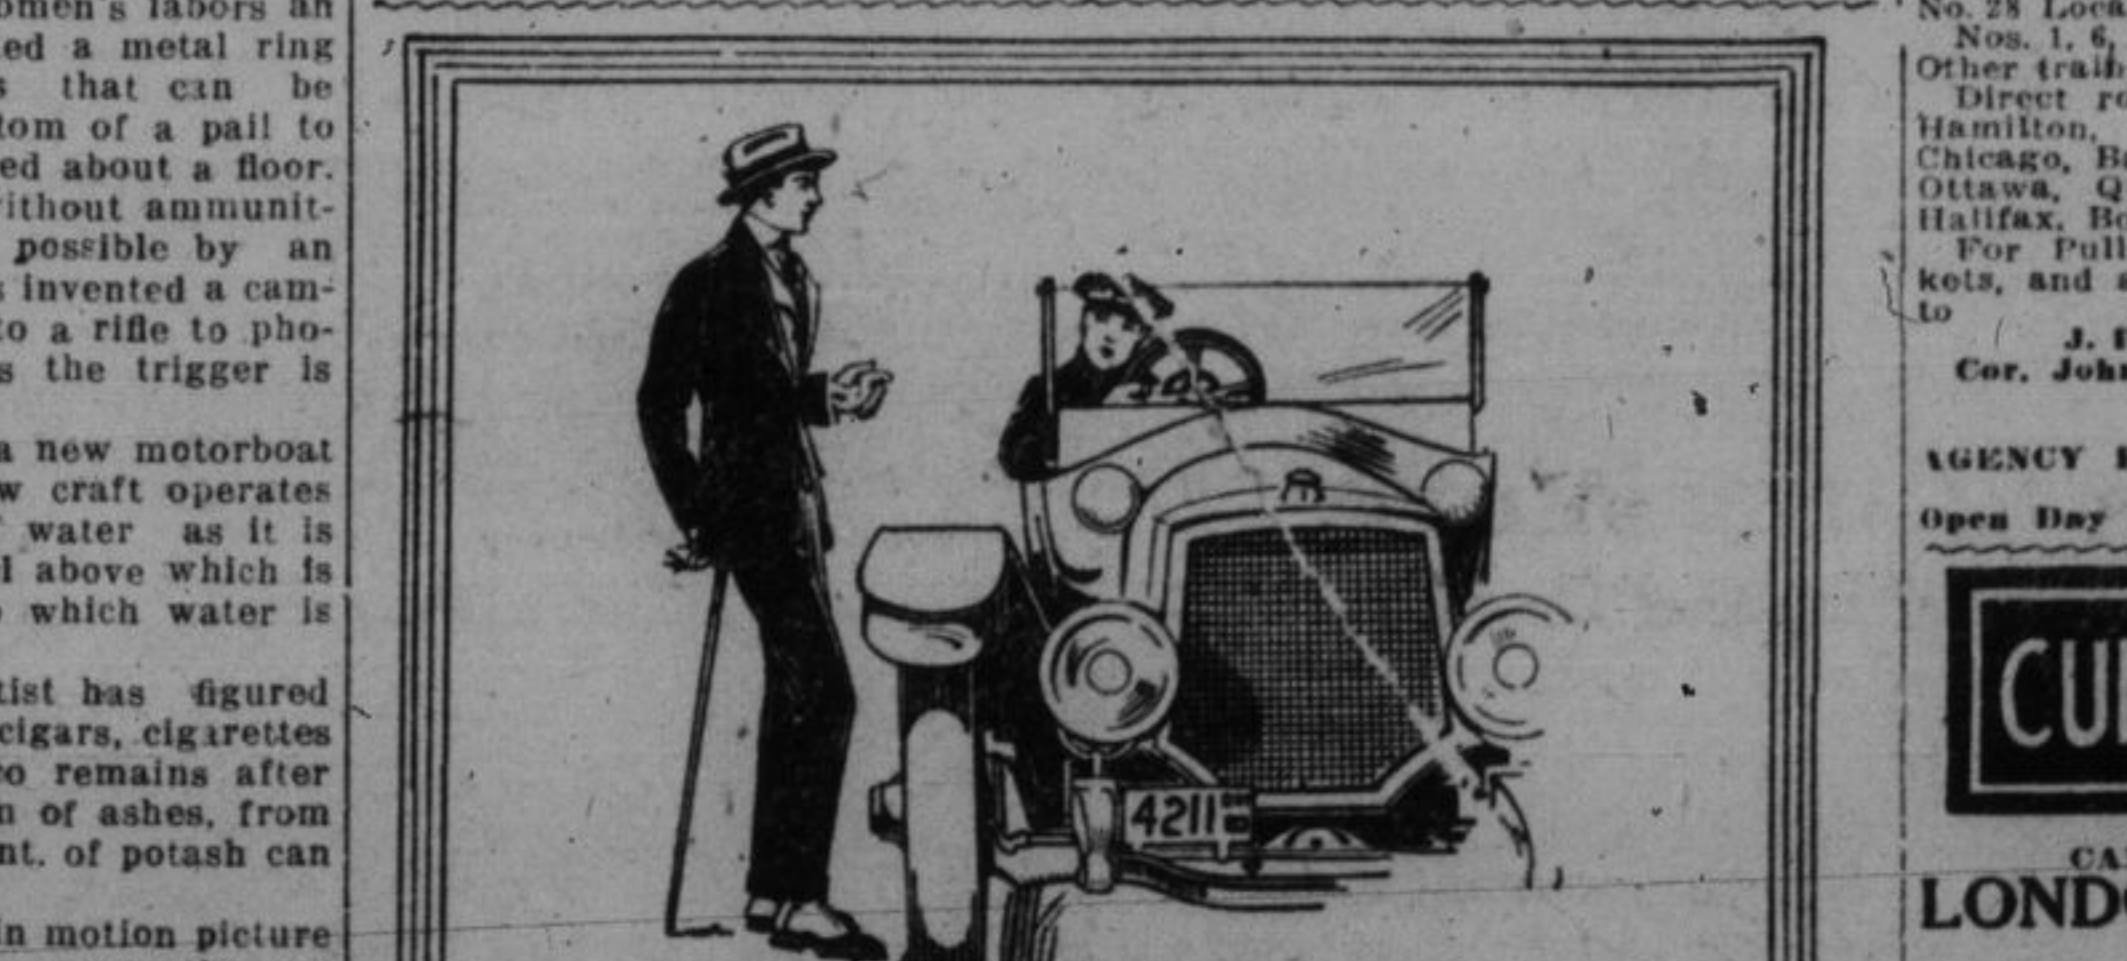

The McLaughlin Series include 6 and 4 cylinder cars in Touring, Roadster and Sedan types, ranging in price from \$895. to \$2350.

Will Their Standard of Living Change?

HARRY: "New car Bert? How do you like it?" BERT: "Fine. The wife thinks it great. She'd hate to be without one now." HARRY: "I suppose you carry sufficient insurance to enable the wife to live as comfortably as you are now doing should anything happen to you?" BERT: "Well hardly, you know insurance costs money." HARRY: "You've the wrong idea Bert, insurance conserves wealth. Another thing you've overlooked is that adequate life insurance enables you to enjoy the pleasures of life. It relieves you of anxiety regarding the future of your dependents. Furthermore the longer you carry a policy the more it increases in value." BERT: "Jump in Harry and on our way down town we will call at the office of The Manufacturers Life and get full particulars of their Monthly Income Policy. I am going to make certain the standard of living for my family after I'm gone."

The Manufacturers Life Insurance Company HEAD OFFICE, TORONTO, CANADA M. G. JOHNSTON, Manager, Kingston.

Even though your congressman is a vegetarian, he may have a hanker for "pork." Never count a girl whose father is a pessimist, for he always has a hank coming.
