An English veterinarian says careless or improper feeding is the prime cause of colic. The stomach of the horse being small, the digestion is limited, and if the horse is hungry and overfed, or is allowed to gulp down a big feed, colic is the result. Also, if musty hay or musty, sour feed is used, or if fresh-cut grass wet with dew or rain is hastily eaten in large quantities, colic is often the Bran or linseed meal added to the horse's sation aids in regulating the lessening the liability to disease. cur when the mud has been allowed 1.10 to dry and then brushed off without the application of water.
