aily British

Ottawa, March 14.-Apparently from October 1917, not with the con- home, not for the soldiers at the there never was so great a reduction bo the Borden Government's idea is sent of the British Parliament, but by front. Rumor has it that the gov- spread over so large a population in never to spend one dollar on the war where two dollars will, do as well. Everything costs about twice as much as it should. In case of doubt throw another million to the

birds such is the policy. Only now the wasteful methods of recruiting are transpiring: According to the evidence of the Deputy Adjutant General, Colonel Charles but what are a few hundred thousand MacInnis-who has no particular, dollars to a government that is wish to hurt the Borden Government spending a million dollars a day? more and were then dropped as ining their average duration on the pay roll at a year fifty thousand unfits run into a tremendous lot of

It has been estimated that to recruit, equip, train and pay a soldier for one year costs one thousand dollars. It is therefore a simple problam in multiplication to figure out how much fifty thousand unfits cost. Fifty million dollars- about oneninth of the money we have borrowed for the war. Eleven per cent, waste. The Finance Minister is continually preaching thrift and economy. "Save your money and give it to me." One wonders what Sir Thomas has to say in reference to his eleven per cent, leakage which goes on right under his nose.

Despite Mr. Flavelle's assurances that this country is drunk with prosperity; nobody believes that the average citizen is suffering from too much money. It is not the salaried man's wife, nor the workingman's wife that is spending her money on fancy shoes, short skirts, sealskin sacques and passionate hats. She has enough to do paying the good man's good money out for the necessaries of life which are controlled by Mr. Flavelle and his food baron friends. No matter what Mr. Flavelle says the country is not lousy with money, though a favored few may be afflicted that way.

Canada realizes that now is the time for thrift. There will be hard times after the war and most Canthing against a rainy day. But the Borden Government does not act on its own advice. It still insists on pending two dollars where one dolneed the money. Sometimes the six-hundred-words-a-minute money that flows in from a forty per cent, tariff plus the borrowings at to blow in another million or two.

Another little trick is to announce the prairies will do their duty that money will be spent on one thing and then spend it on another. time has been extended to March feeling toward conscription in the 31st, with fair promise that it will hotbeds of loyalty in the East.

No doubt registration costs money.

phosphate before breakfast washes out poisons

To see the tinge of healthy bloom tongue or a nasty breath, in fact, to feel your best, day in and day out, just try inside bathing every morning for one week.

Before breakfast each day, drink a glass of real hot water with a teaspoonful of limestone phosphate in it as a harmless means of washing from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations. gases and acidity and gives one a splendid appetite for breakfast.

A quarter pound of limestone phosphate will cost very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the blood and internal organs. Those who are subject to constipation, bilious attacks, acid stomach, rheumatic twinges, also those whose skin is sallow and complexion pallid, are assured that one week of inside bathing will have them both looking and feeling better in every way.
