\$12,000 IN GEMS STOLEN

New York Woman Victim of a Daring Robbery.

Scranton, Pa., May 1.—Mrs. Robert Sweeney, of New York and Scranton, sister-in-law of Captain Sweeney, who has done such valiant service in the aviation corps of the French army, was robbed of \$12,000 worth of jewelry here this morning.

Mrs. Sweeney, who has been spending the week-end with her children here, was departing for New York. Going to the Lackawanna station she had her hand baggage taken to the parlor car while she secured her tickets. A few moments later, on going to the car, she found that the bag containing the jewel case had been cut open and the case gone.

THE CONFESSIONS OF ROXANE

(By Frances Walter)

SYLVIA AND I HAVE AN INTIMATE TALK

(Copyright, 1916, by the McClure Newspaper Syndicate.)
"Roxane," said Sylvia, "suppose we do find Edward. What will you do then?"

"We had just finished dinner in a little restaurant and were ready to depart. Sylvia had been unusually quiet during the evening, and I noted with a pang that the circles under her eyes were growing larger and darker and that she was becoming a more pathetic figure each day. She was of the kind of woman who bears her troubles silently, and like such women, her nature was peculiarly sensitive to suffering. Ever since our search for Edward began she had been patient, though not as hopeful as I had been, and had borne her share of the vigil with the fortitude of a martyr. Her question as we sat there that evening revealed two things: First, a doubt that we ever would find her lover, and second, the suspicion that even if we did our work might all have been in vain. Therefore, I tried to throw a double meaning into my words as I replied to her question.

"I have very definite plans," I told her. "We shall find Edward in a very short time, I am sure, and when we do the happiest one of us three will be Edward himself."

She did not raise her eyes from the tablecloth. She had become accustomed to my efforts to cheer her up, and no claim that I might make now would surprise her.

"I hope you are right," she said, with a little smile.

"I am quite sure that I am right," I replied. "I am confident that Edward has sought you at your uncle's home ever since you left, and if you would only permit me I would make inquiries there. Undoubtedly he has left his telephone number or his address so they could notify him in the event you were found. Why not let me make inquiries?"

"Because I do not want my uncle to know that I am alive," she said. It was the reply she invariably made to the oft-repeated question. "He would not understand as you do, Roxane, and it would only bring additional pain to him to learn of the trouble which I have brought upon myself. By this time he must think that I am dead. We will allow him to continue thinking that I am. Whatever sorrow he felt when I first left has passed, and I do not wish to revive it."

"But I think I could make inquiries in such a way that no one would suspect that I was acting on your behalf."

"It is your goodness of heart which makes you say that, but you know that it is not really true, Roxane. How would it be possible for you to make inquiries of one who has been asking for me without revealing that I was still alive? You know that it is impossible."

"Well, there is nothing left for us to do except to continue coming here," I said. "He is certain to appear some evening, and we shall

keep taking dinner here until we find him."

"And when we do?"
"I shall take him home with us and we will all have a little talk. We will learn just why he left you that evening without an explanation, and after that we will send for the minister and have a marriage ceremony performed. The only thing that really worries me is the possibility that Edward will want to take you away from me. Of course I shall not permit any such thing, but if he is a headstrong young man he may cause a lot of trouble."

Sylvia smiled and reached over and patted my hand.

"It does not seem good to be headstrong where women are concerned, does it? The women must have their way."

"Then the smile died from her lips as she realized the hollowness of her words. In her own case it was very evident that the woman had not had her way."

"I shall certainly have my way in this matter," I hastened to say. "I shall not allow Edward or any one else to take my little sister away from me. I need her too much, and I believe she needs me."

"Indeed I do need you, Roxane," she cried, as the tears filled her eyes. "I seem to lean on you more every day. Whatever would I do without you?"

"You shall not need to do without me," I told her. "We shall stay together, no matter what happens."

Again her hand stole across the table and touched mine with a tender caress. I could hardly see her face for the mist which had gathered before my vision. I realized that this little girl had become very dear to me.

(To Be Continued.)

CROP TO PLANT LATER

Provide for Winter as Well as Immediate Needs.

CABBAGE AND OTHER THINGS

Good Food Products Can Be Secured by the Amateur by a Little Labor and a Small Expenditure.

(By S. C. JOHNSTON, Vegetable Specialist, Ontario Department of Agriculture, Toronto.)

Besides growing many vegetables for immediate use the backyard garden should produce some vegetables which can be stored for consumption during winter months. Some, of course, do not need to be planted as early as the plants which were described last week. Possibly a week should elapse from the time the lettuce is planted before these should be sown.

BEETS, CARROTS, PARSNIPS, AND SALSIFY. These include the most important members of the root vegetables. They are usually grown for winter purposes, though beets and carrots are relished by many in their earlier stages of growth. All these demand practically the same attention. The seeds should be sown in straight rows at a depth of about three inches. When the plants have reached a height of two inches they should be carefully thinned out so that they stand, beets and parsnips three to four inches apart, carrots and salsify two or three inches apart. It will be found that the crop is very slow growing, and for this reason it is sometimes advisable to plant a few seeds of lettuce with the parsnip seeds so that they will serve as a marker. The young beet plants may be used as spring greens. It is necessary that the soil be cultivated at intervals during the summer months so that the crops may grow. They do not as a general rule require as heavy watering as some of the other vegetable crops. In the fall the beets should be pulled up and the tops twisted off close to the head, not cut off with a knife as in the case of carrots, parsnips, or salsify, which should have the tops cut about one-half inch from the roots preparatory to storing for winter use.

CORN. In planting corn holes about two or three inches deep should be made with a hoe. Five or six kernels of corn should be sown in this and covered with soil, which should be gently firmed by tramping on it. When the shoots are about three inches high all excepting the three sturdiest should be pulled out. The soil should be drawn up around the stalks so they grow, to give them support. When the kernels on the cob appear full of milk they are ready to use. It is also a good practice to cultivate the soil often around the corn, for example, to keep the weeds from growing and cabbage faster and better when plenty of cultivation is given.

CABBAGE. Cabbage is one of the most widely grown vegetables. The cabbage plant requires a supply of moisture, and yet if the cabbage soil is too wet the plant will be injured. Cabbage does particularly well on new land, and some growers claim that the cabbage grows without an abundant supply of manure in the soil better than many other vegetables. It is considered a good practice for backyard gardeners to purchase plants which have been grown in hot-beds or hot-houses and transplant them directly into the permanent bed. This saves considerable trouble. It is necessary when setting cabbage plants to set them fairly deep so that they will not be whipped about by the wind. They may be set eighteen inches apart, and there should be quite a good deal of soil around the roots. When they are ready to be set out a hole may be made with a dibber or a sharpened stick. The roots may be watered after they have been set. One of the most important features of growing cabbage consists in the attention given to cultivation of the soil. There may be some occasions when the head will split, this may be stopped or prevented if the head is taken in the hands and turned forcibly from one side to another.

CAULIFLOWER. The cauliflower is treated in much the same way as cabbage, the plants being grown and set out in the same manner outside. They are treated practically the same as cabbage until it is noticed that a little white flower has commenced to grow. The dry leaves of the plant should be brought together at the top and tied with a piece of string so that these little white flowers are protected from the rays of the sun and the rain. All cauliflower heads should be covered in this manner when they are about two inches in diameter.

BRUSSELS SPROUTS. Brussels sprouts are perhaps the most hardy of the cabbage family. It is impossible to secure brussels sprouts plants a few seeds may be planted about May 15 and should be about one inch. These should be transplanted to the permanent bed about the 15th of June. They should be set eighteen inches in the row and two feet between the rows. It is well to keep the patch clean, and the surface soil should be stirred frequently. It is unnecessary to trim off the leaves as the plants grow in the garden.

SWISS CHARD. Swiss chard can be grown easily from seed, in rows twelve inches apart, the young plants being thinned to six or eight inches apart. The advantage of this plant is that the leaves may be pulled off close to the root and new leaves shoot up, which may be consumed during the season. The roots are used for greens and the stem of the leaf as asparagus. A few plants should be sufficient for a small family.

Neuralgia and Sciatica

There is no mistaking neuralgia, with its sharp, stabbing almost unbearable pains. In a large number of cases poor-blood and a run-down condition of the system is responsible for neuralgia. The nerves are actually starving. To cure neuralgia it is necessary to build up the blood and improve the general health, and for this purpose there is nothing better than Dr. Williams' Pink Pills.

Sciatica is nothing more than neuralgia of the nerve, and those who suffer from it undergo excruciating torture. If you are afflicted with neuralgic or sciatic pains do not waste time or go to great expense for treatment until you have tried building up the blood. The chances are very strong that the treatment with Dr. Williams' Pink Pills is all that you will require. Hot applications and liniments may be used at the same time to give temporary relief, but that is all you can expect from them. The trouble can only be cured by enriching the blood, thus feeling and strengthening the nerves. Dr. Williams' Pink Pills give the blood the elements that the nerves need. In this way they remove the cause of the pain.

You can get Dr. Williams' Pink Pills from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50.—From "The Dr. Williams' Medicine Co., Brockville, Ont.

Papers Are Suppressed

Amsterdam, via London, May 1.—The Lokal Anzeiger of Berlin publishes a Vienna despatch, saying that no German newspapers have been published in Bohemia since Thursday. Apparently they have all been suppressed.

Fears Hunger Peace

Berne, via Paris, May 1.—Herr von Brettreich, minister of the interior of Bavaria, has begun a campaign of circularization, according to advices received here from Munich, urging farmers to hold out for the short time which remains before submarines have compelled a victorious peace, in order that Germany herself may not have to conclude a "hunger peace."

Backache, Lumbago and Rheumatic Troubles

Dear Mr. Editor:—I wish to state that I suffered greatly from backache, lumbago and rheumatic troubles. I used "Anurie," the latest discovery of Doctor Pierce for backache and kidney troubles, and I can cheerfully recommend the "Anurie Tablets" to anyone suffering from any of these maladies.

Yours truly,
J. F. GARBER.

It is now asserted with confidence that these painful effects due to uric acid in the system are entirely eradicated. A new remedy, called "Anurie," has been discovered by Dr. Pierce, and is the cause of a drainage outward of the uric acid with which it comes in contact with the body. It will ward off backache, headache, and the darting pains and aches of articular or muscular rheumatism—of those diseases which are caused by too much uric acid, such as gout, asthma, sciatica, renal calculus. "Anurie" prolongs life because old people usually suffer from hardening and thickening of the walls of the arteries due to the excess of uric acid in the blood and tissues.

Dr. Pierce, who is director and chief physician at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., has been testing this wonderful medicine for the relief of over-worked and weakened kidneys. The relief obtained by sufferers has been so satisfactory that he determined to place "Anurie" in the principal drug stores in town where people could get this ready-to-use medicine. "Anurie" is not harmful or poisonous, but also nature to throwing off those poisons within the body which cause so much suffering, pain and misery. Scientists assert that remedy is 37 times more potent than Hilke's and 10 times more potent than Hilke's.

"Anurie" is building up a reputation as good as Dr. Pierce's other well-known medicines which have been proved reliable during nearly fifty years, such as Doctor Pierce's Favorite Prescription for the use of women, Doctor Pierce's Pleasant Pellets, the Liver Regulator, and Doctor Pierce's Golden Medical Discovery for real blood.

The Whig's Daily Menu

Menu for Wednesday

BREAKFAST
Stewed Prunes with Lemon
Cream of Oatmeal
Creamed Omelet in Bread
Case
Pancakes and Syrup
Cocoa Spice Cake
Tea or Butter Milk

LUNCHEON OR SUPPER
