THE LATE SAMUEL KNAPP.

A Well-known Battersen Resident Passes Away. Samuel Knapp was born in Battersea on Nov. 9th, 1853, and depart-

ed this life on May 11th, 1917. He was soundly converted to God over forty years ago, and from the hour ering trust and confidence in Christ. He was a local preather, and while in health did splendid work in the church of his choice. He was also a teacher in the Sunday school, and being a great lover of sacred song was organist and choir teacher for a

convictions, of high ideals and strict integrity, one who never failed to register his disapproval of wrong, and was ever ready and willing to On June 17th, 1885, he was mar-

ried to Annie E. Mathews, who surof Toronto; and Ernest, of Saska-toon. There are also left to mourn Mrs. John Ruttan, Battersea; and six brothers, Reuben, of Camden, N.Y.; Anderson and Amos, of Batter-sea; Henry, of Seeley's Bay; Charles, of Kingston; and Erwin, of Bradon,

The services were of a most impressive character, and were conducted by the pastor, Rev. A. W. Stewart, assisted by Rev. Mr. Carson, of Inverary. The church was filled with relatives and friends of the deceased, showing the high esteem in which he was held. Six nephews acted as pallbearers-William Knapp, B. It is good to be wise, but it is weather is now needed to make rapid

A Change Is Badly Needed

A trip by either motor car or horse-drawn vehicle through almost any section at this time of year, will show you the terrible road handicap that adds to the Canadian farmers' burden.

Every rock and rut in the old-style road is a menace -an obstacle to progress. Every uneven surface in it represents waste of taxpayers' road money. Every bit of "rough-going" in it is a source of so much needless wear-and-tear upon motor cars and trucks and vehicles in general.

Consider in contrast the many advantages of

Permanent Highways of Concrete

They are the modern, permanent pavements-and their very evident superiority is bringing them into universal use. No projecting rocks in this kind of pavement to damage motor cars-no muddy ruts to delay traffic-and no dust.

You can, by boosting for Concrete, hasten the adoption of this, the only proper road material, in your locality. To be a "booster," you need to know the facts. We have them for you, in books that will be sent free if you write.
