> The march is distinctive of military music. Formerly it was merely an air played in quick time. Now there are four kinds of military marches slow, quick, double-quick and funeral-and the greatest composers have expended their skill on these productions. . Handel, for example, wrote the regimental "March Past" for "The Buffs" and Queen Victoria's mother wrote the slow march of the "First Life Guards." Each regiment is the proud possessor of its own peculiar march, of interesting historical origin, to which it marches past on every oc-

The acquirement of a musical education is, or should be, comparatively easy, not only because of the smallness of the musical vocabulary consisting of only 88 tones), but also because of the universality of

The present system of musical notation, though perhaps not perfect, has this great advantage; namely, it is the same all over the civilized world, so that when one learns it in Canada, the musical thoughts of France, Spain, Germany, Italy or Russia are equally accessible.

A child learns to read English easly and well during the first six years of his school life (from age six to twelve); he might just as easily learn during the same time to read fearlessly and well the universal language of neusic.

We are all born with ears and they are formed for hearing as the eye is for seeing; they are, moreever, capable of hearing far more and better than they are accustomed to doing. We carry them about with us everywhere, but we pay very little attention to them. We are only just beginning to learn what the normal ear is capable of in the matter of positive pitch for instance; that is, ability to recognize and name musical tones.

The lay public has been accustomed to consider positive pitch as a gift wrapt in the exclusive tissue of genius and doled cut only to the ultra-musical. One who can enter a room where a musician is singing or playing, and say, "He is singing C, or baritone B," has bitherto been looked upon as a prodigy.
