It is made without a lining, the back extending over the shoulders on the fronts, forming a yoke effect. The fronts are rolled to form revers and gathered at the shoulders. A large square collar with deep points in front finishes the open neck and simply one immense button shows in the adjustment. In medium size the waist requires 2 3/4 yards 36-inch material.

Well, they died a noble death. My boy was killed at Vimy Ridge. He had only been in the trenches for three days. Harold has just returned from doing five months at the Somme front. GREEK PROCLAMATION JOLT TO THE ALLIES

Youthful Monarch to Carry Out "Brilliant Policy" of His "Revered Father."

London, June 20.—The publication of the proclamation of the new King Alexander of Greece comes as a shock to England, France and Italy. The new and youthful monarch pledges himself to carry out "the brilliant policy of his revered father," the notoriously pro-German Constantine, and uses the language of an absolute monarch. The press of the Allied nations demands to know if it has been hoodwinked, and if another German diplomatic trick has succeeded in the Balkans.

There is a universal demand that if King Alexander attempts to follow any such course as did Constantine, he be instantly ejected without ceremony; that the Allies take direct control of the country, establish Venizelos in power, and keep him there by force if necessary.

LIGHTNING CUT OFF POWER

FIREMEN WERE CALLED TO THE POWER PLANT.

The Kingston power plant suffered severely in the electrical storm on Tuesday night. About 10.30 o'clock the wire from the Campbell power plant at Kingston Mills was struck.

The extra current travelled to the local plant and played havoc with the intricate mechanisms installed. The breakers, motors and dynamos were all put out of business and the switch board caught fire. A call was sent in for the firemen, and the Ontario street fire-fighters responded. The blaze was soon extinguished and Manager C. C. Folger had a squad of men repairing the damage done. Within a few minutes he had the house lights and the store lights again in commission. Power could not be supplied to the street railway company, however, and its cars remain at the places where they stopped on Tuesday night.

Speaking to the Whig on Wednesday morning, Mr. Folger expressed his appreciation of the work of the firemen, stating that for a time matters looked very serious as it was feared that the turbine might be put out of commission thus taking off a source of power. He also remarked that he hoped everything would be fixed up by Thursday, although there is much work to be done.

THE NEWSPAPERS AFFECTED.

The Whig was sorely hit by the storm. All the direct current motors were put out of commission with the result that only a few of the linotype machines, which set up the matter for the paper, could be used. The press, which is operated by alternating current, was able to perform its usual functions. The indulgence of subscribers is sought for the scantiness of local and telegraphic news in today's issue as it was impossible with the equipment to get nearly all the matter set up before press time.

Telephones in Trouble.

The Bell Telephone Company suffered slightly by the storm on Tuesday night in the city. In the country, however, the lightning damaged the rural systems, especially around Glenburnie. Some of the wires were struck and the carbons in the boxes burned out.
