

A choir composed of several hundred children from the Toronto Public Schools under the direction of Mr. Llew Rees sang for His Excellency the Duke of Devonshire at the Canadian National Exhibition opening ceremonies. Formed up behind the singers was a large detachment of uniformed School Cadets, creating a pretty effect.

Silver Now 90 1/2
New York Reports Sale of SILVER at 95.
DOLLAR Mark in Sight.
Record Cobalt Shipments

That the various Cobalt Mines are taking advantage of the present price of Silver is evidenced by the fact that nine Cobalt Companies shipped an aggregate of fourteen cars of ore last week, containing over one million pounds. This is a record for any one week during the current year.

ADANAC. No new developments are reported from the Adanac Mine. Stopping is still going forward as fast as conditions will permit, but it is estimated that it will be three weeks or a month yet before a full shipment of ore will be made up. Any delay in the initial shipment would seem to be advantageous to the Company owing to the continuous and steady rise in the price of the white metal.

McKINLEY-DARRAGH have cut a new high-grade vein averaging four inches in width on the 350-foot level. The extension of the famous Cobalt Lake fault vein has also been discovered on the 400-foot level, which gives every indication of developing into a large tonnage of good mining ore. The alterations to the mill are being pushed ahead as rapidly as possible, and within a short time the mill will be treating 250 tons per day.

NIPISSING. The directors of the Nipissing Mines Company are scheduled to meet about September 20th, for dividend action, and in usually well-informed quarters the belief prevails that an extra distribution to stock-holders will be ordered at that time. The belief is based upon the high prices for silver recently prevailing and to the strong financial position of the company.

OPHIR. The development work at the Ophir is progressing very favorably, and reports from the property show that they are drifting on a vein at the 410-foot level, which is heavily mineralized, and there is every indication that they will run into high-grade values.

Shrewd investors are now becoming alive to the wonderful profit making possibilities, and are quietly placing orders "at market." In our opinion a Bull market is imminent. Don't let this opportunity get by.

Wondophone and Record FREE
To any Boy or Girl

JUST think of owning a phonograph and record all your own. One that you can easily carry to your playhouse or "diggings" without fear of breaking it. Think of all the fun you and your chums and your family, too, would get from this phonograph. It's a dandy little machine, just like the illustration. The Wondophone is strongly made, light in weight and will stand a whole lot of rough handling. It reproduces a splendid tone and uses regular phonograph needles. When you want to play a record, put it on the dial plate, adjust the needle and turn the handle. You see with the Wondophone you play records by turning the handle, so there is no machinery to get broken, and you can play a record whenever you want to.

HOW TO GET IT. Any boy or girl can get this handsome prize without any expense and with very little effort. Just spend an hour or two introducing our famous Oleographs to your friends. They go like hot cakes at 15c each because the stores sell the same kind at 50c each. When you have sold only 24 send us \$3.00 and we will send you this handsome outfit. We also carry a good line of "season" post-cards—Thanksgiving, Christmas, etc.
