The Simple Truth About Corns

A corn today is just as needless as a spot of dirt. It can be ended almost as easily, as simply and completely as a spot of dirt. The way is scientific. It was invented by a famous chemist. It is prepared by makers of surgical dressings, whom physicians respect. It is called Blue-jay. You apply it in a jiffy, and usually—but once. There is no muss. The pain stops instantly and forever. The action is gentle. It is the B&B Blue-jay Corn Plasters. Stop Pain Instantly. End Corns Completely. 25c Packages at Druggists.

How Blue-jay Acts
B is the B&B wax, which gently undermines the corn. Usually it takes only 48 hours to end the corn completely.
C is rubber adhesive which sticks without wetting. It wraps around the toe and makes the plaster snug and comfortable.
Blue-jay is applied in a jiffy. After that, one doesn't feel the corn. The action is gentle, and applied to the corn alone. So the corn disappears without soreness.
