A PICTON MERCHANT WRITES

Boosting Industrial Fair and at Same Time Making Good Suggestions.

R. J. Bushell has received a letter from W. J. Carter, of Carter Bros., hardware merchants, Picton, in which he is warmly congratulated on the success of the Industrial Fair. "There is one thing sure," says the writer, "if you had not taken hold of the show when you did it would have been defunct long before this, and why on earth the City of Kingston does not get behind such a 'live wire' as yourself is utterly beyond me. The merchants of Kingston must be short-sighted or they would see what a great thing it would be for Kingston to have a world ace what a great thing it is, so that you could have a week's fair, having one day an American band and an excursion from the other side. Give specials for the Amherst Island people so as to get them interested. I trust that Kingstonians will wake up this coming year to what they can make the Kingston fair by providing proper buildings."

A TOUCHING LETTER

Soldier in France Sends Thanks to Mrs. Howell, Bath.

Mrs. Howell, Bath, has received a letter from France which expresses "heartfelt thanks for your most acceptable gift of a pyjama suit which was received through the Canadian Red Cross Society." The writer says: "The suit was issued to me at the baths in place of underwear, and I must say that it is a pleasant change to the ordinary issue of army clothing. I was also delighted to find the package of tobacco, which I found sewed up in one of the pockets. It is a great encouragement to us boys to know that we are remembered by those in our native land by the gifts and comforts so frequently sent to us. I have been in France since the first contingent arrived here and the next best thing to seeing Canada, which we left so long ago, is to hear from those whom we left." The writer was Pvt. Sheldon McBratney, No. 1 Canadian Field Ambulance.

Letters to the Editor

How to Get a Candidate.

Kingston, Oct. 26.—(To the Editor): A number of citizens have attempted, so far without apparent success to nominate a candidate who should carry the "win-the-war" banner in the forthcoming elections in Kingston. It seems to me that a practicable way of solving the problem would be for these citizens to meet with the executives of the three political parties and seek with them to agree upon a candidate who should be the unanimous choice of all shades of political opinion in Kingston. If because of party differences no agreement can be reached in this way, then the Mayor might call a public meeting of all the citizens who are prepared to support the Union Government and at this meeting the citizens who have endeavored to replace party strife by mutual agreement on a "win-the-war" candidate might present a full report of their efforts and submit the names of one or more candidates for the selection and approval of the meeting. A candidate nominated at such a meeting would have perfect right to call himself the candidate of the "win-the-war" forces in Kingston and to claim the support of the Union Government in Ottawa. Mr. Nickle might conceivably be the nominee of such a public gathering of the citizens, but until he is so nominated he can not offer himself as the "win-the-war" candidate for Kingston and that I take it, is what he wishes to be. Yours sincerely, L. P. Chambers.

GERMANS CONTROL MINING PROCESS

Alien Enemies in New York Demand a Prohibitive Royalty.

Cobalt, Ont., Oct. 26.—In the course of an address here Hon. Frank Cochrane, nominated as with-the-war candidate for Temiskaming, said that the use of the flotation process in Cobalt mines was very important, and mining operators had called the attention of the Government to disclosures regarding the ownership of the patents. "I understand that the flotation patents are still controlled by Germans in New York, and they are demanding such a royalty on the process that the mines in this country can not use it," said Mr. Cochrane. "It will be my business to see Sir Robert Borden on this question when I return to Ottawa, with a view to bringing the patent owners to their senses and try to get him to cancel these patents for the benefit of the mining community. "We must, however, be fair in the matter, for I believe in being fair even to an enemy alien, and the mines must be prepared to pay a fair royalty if it is proven that the patent owners were not German controlled." Hon. Mr. Cochrane asked the
