You don't like the cheap tea you are using. Do you?

Before the war so increased the cost of living, many people used to drink better tea than they are now using.

Perhaps, this is true in your case?

Of course, you are not drinking poor tea because you like it, but because you think it necessary to save money.

But are you really saving anything? Cheap, common teas only make about 150 cups to the pound. You are lucky if you can stretch them

out to 185 or 200. On the other hand, Red Rose Tea easily makes 250 cups. It goes further because of its fine quality, consisting chiefly of Assam teas, the richest and

strongest in the world. You may almost doubt if so many cups of tea can be made from a pound of even such good tea as Red Rose, but you can readily prove the economy of Red Rose without waiting for a package to be used up. Just use a few leaves less of Red Rose for a brewing than you use of common tea-the result we are sure will please and surprise you.
