Crawford's Grocery,

Phone 26. "Headquarters For Soldier Boxes."

### Consider all Interests

First-Consider your personal interests first. The Victory Bond is the best and safest place on earth to put your money. You get 5 1/2 per cent. interest, payable every six months-the 1st of June and the 1st of December. Absolute safety and a liberal rate of interest ought to be good enough for any man's money. And the chance of a rise in the bonds after the war is not to be

overlooked.

Second-Consider the country's interests. With the money the Government gets from you it helps to prosecute the War, and helps to maintain prosperity in the country. Without money Canada could not help England to buy our grain and munitions, and, not only would there be great depression in the agricultural districts, but hundreds of factories would

have to close. The Imperial Munitions Board alone spends a million dollars a day in Canada, and that expenditure would stop-if Canada could not advance the credits to England, and only by the money received from Victory Bonds can these credits be continued.

Third-It is Imperative that you should Buy Victory Bonds!

AND THE DOCTORS SAY HE CAN-NOT LIVE

## Letters to the Editor

Let the Record Speak.

Darlingside, Nov. 10 .- (To the Editor): When is a union government frot a union government? When it is composed of two sets of men of strongly opposing principles in which the principles of one set are abandoned as a condition of attaining office. Union properly means compromise. Mutual concessions on the part of opposing principles constitute true union. But in the case of the new Borden Government concession has been all on one side.

The policy of the new Government has been announced. It is a pious declaration of good will in regard to many matters of public interest and importance but it does not differ in any essential particular from the like declaration made before the elections of 1911 on behalf of the Conservative party by the same man who has just made the announcement of policy on the part of the so-called union government. The promises made then sounded well as far as they went. So do the promises made for the purposes of the election of 1917. But the promises of 1911 were forgotten as soon as the Borden Government attained power. The promises made for election purposes in 1917 have no right to be considered valid in view of what happened to those of 1911 at the same hands.

The so-called Liberals who have joined hands with Premier Borden in his disfranchisement policy, in his C.N.R. steal, in his shielding of the food profiteers cannot claim exemption from Liberal criticism on the ground that they are Liberals, now that the new government's molicy has been declared. Without challenging them or their motives, they have gone over to the enemy with the result that the forces of reaction in Canada are strengthened-if indeed under such circumstances men do give strength to the cause with

which they associate themselves. Hon. Mr. Rowell, late leader of the Liberal opposition in the provincial legislature of Ontario has traded on his temperance principles during the whole of his public life. He enters a government that specificially refuses to legislate to advance those
