IN VERY BAD STATE
Farmers Have Trouble in Making Trip to the City.
Farmers who are not compelled to make a trip to the city these days do not care much about making the journey, for the reason that the roads are in a terrible state, as a result of the recent snow storm.
"Snow is piled up five feet high in some places," one farmer remarked on Tuesday morning. "I had quite a time getting into the city to-day. The snow had commenced to go down, but Sunday's storm made conditions even worse than they were before."

Coal Near Here?
There is a possibility of there being a deposit of coal in this county. A resident of Battersea district has brought into the American Consulate some samples of slate which, according to authorities, are a sure indication of coal. The slate appears to be very close to coal and it would indeed be a splendid thing to find this heating material so close to Kingston.

What Will Happen if Japan Intervenes in Russia
Delicate and momentous questions of Allied diplomacy charged with the gravest military possibilities are raised by the proposal that Japanese troops intervene in Siberia to save from Germany's clutches the great military stores accumulated at Vladivostok and along the Trans-Siberian railroad, and to forestall the German penetration of Asia.
Such intervention, of course, might produce friction, if not hostilities between Japan and Russia, and Germany is quick to see the advantage, for it would soon lead, in the opinion of the Cologne Volkzeitung, either to a Russo-German agreement against Japan or to an undertaking between Japan and Germany. On the other hand, the Boston Transcript suggests that "perhaps Japan's sword will avail where America's pen has failed either to help Russia or hinder Germany's operations against Russia."
The leading article in THE LITERARY DIGEST for March 16th takes up this latest phase in the Russian situation and summarizes expert opinions in Japan and America.
Other topics of immediate national interest in this number of "The Digest" are:
