Are you giving aid and comfort to the enemy?

Any householder in your neighborhood who has a garden plot, or who owns a piece of suitable vacant land that is not being put under cultivation in order to increase food production, is (though he or she may not believe it) giving aid and comfort to the enemy in restraining food production, as really as is the Submarine Commander who sinks an Allied ship laden with food.

The difference is only one of degree, not of kind.

Look around you! Look around you!

If you have not yet decided to plant a vegetable garden make up your mind to do so now. You will not regret it. There is still lots of time. Potatoes and beans may be planted up to June 1st and these are the best substitutes for wheat and meat.

For good, practical advice upon how to lay out and cultivate a Vegetable Garden, write for a free copy of the booklet entitled: "A Vegetable Garden for Every Home." This has been prepared by the Ontario Department of Agriculture for the guidance of citizens who will respond to this call for increased production.
