Spray For the Onion Maggott

· As onions constitute a valu-

able winter crop particular care should be taken this year to protect them from the onion maggot. Before they lay their eggs the adult flies may be destroyed by feeding upon the following poisoned bait spray: Sodium arsenite-one-quarter ounce; cheap molasses—one pint; boiling water-one gallon. The sodium arsenite is first dissolved in boiling water and the molasses is then added. When the mixture has cooled it may be applied from an ordinary watering can with a small rose. The idea is to deposit the poisoned solution on the growing crop in the form of coarse drops. The first application should be made when the plants are about three or four inches high and four or five further applications should be made about a week apart. Bright, calm days should be chosen for this work, if pos-

THE BABITANT COUNTRY.

New France! The change from the Maritime Provinces or Ontario comes suddenly. In a moment, as it were, one is surrounded by French Canada, by French faces, French farms, French songs and language. In all America, there is no more picturesque and old-world region of the white man than this Habitant Country beloved of the poet, Drummond, and occupied by peasants who form the only important offshoot of the French people to be found. The "No, indeed. I have missed you section has an isolated, quaint, aldestroying the portrait so I could gay French chansons echoing from peasant cottages, home-fashioned hay This foolish sentence affected me carts and furniture, lofty wayside "calvaries," tumble-down little Nordormer windows, like those of France "That would be silly," I retorted, 300 years ago, scarlet sashes and bright, knitted hoods, high, twowheeled carts or caleches, and lowrunning sleighs or burleaux, speak eloquently of a day long past. So, too, speak the leisurely, old-world courtesy and the simple gayety and conand his people," amid whom hospitality reigns supreme and smiles are universal. The villages are long and strag-

gling. They often begin with one make common cause. Pass out of the ovens, where peasant women daily bake bread, with a crowd of children slope, crowned by a lordly monastic establishment, invariably comes to view. Lawrence, once the only highway, lies the true heart of the Habitant Country, the spot where settled the lineal descendants of those who, centuries before, pentrated the "paya d'en haut" with a sublime courage and inspiration, to lift the veil from the unknown West. Here are the historic farms, measuring their precious river frontage by feet and their depth by miles, their houses ranged, in colonial days, in rows that their occupants might the better fend off the attacks of the American Indian. "Jean Courteau" clings with an almost desperate love to the pictur-

lesque riparian villages of the St. Lawrence, stretching all the way from the "gates" of the Habitant Country at Riviere du Loup, beyond the core of Drummond's adopted Habitant world at Trols Rivieres to that outer western edge at Bord a Plouffe, which hugs the banks of the beautiful Riviere des Prairies. Here is the haunt of the gladiators of the saw log who, from the square lumber raft, sing their odd ditties, "Trois beaux canards," or "Par derriere chez ma tante.

Bord a Plouffe is on de reever, Bord a Plouffe is on de shore, An' de family of Plouffe dere all aroun'."

It was Voltaire who, at the fall of Quebec, contemptuously remarked that England and France were fighting for a few acres of snow. But the Habitant knows better. Happy and contented, his country, for him, is the most precious possession in the world, and many a citizen in less happy lands might envy the spirit which sings:

"But I tole you-dat's true-I don't go on de city, If you geev de fine house an' beaucoup d'argent-
