War Garden Bulletin

Practical Daily Guide For Vacant Lot and Backyard Gardeners Enlisted in Greater Production Came "

Issued by the Canada Food Board in collaboration with experts on the staff of the Dominion Experimental Farm. Booklet That Will Help.

"Canada's war gardeners and all classes of people who have engaged in food production this year have done splendid service. The response to the call for more food has been magnificent, and there is every prospect of a bountiful har-

Such is the statement made by Henry B. Thompson, chairman of the Canada Food Board, in a prefatory note to the new booklet dealing with the canning, drying and storing of fruit and vegetables, which has been issued by the Board for the benefit of war

He goes on to say: "By eating fruit and vegetables freely while they are in season, and by canning, drying and storing our surplus for winter use, we can release more wheat and other foods for shipment overseas. At the same time we can reduce our own cost of living. Fruit and vegetables are conductive to health, and greater and more regular use of them throughout the year would have positively beneficial effects."

Those who want to make the best use of the produce of the war gardens should write either to the Food Board direct or to its provincial committees, asking for a copy of the fruit and vegetable booklet. A sister publication; which will be equally valuable, contains vegetable recipes. Five cents must be enclosed for each copy.

far times are teaching us that there is no economy in buying the cheapest goods nor the fancy high priced ones. We are depending on the solid values of the good standard brands—the brands that were good in peace time and have doubly proved their worth in war time.

Red Rose Tea-costing today only about 4 of a cent per cup—is one of the solid war time values that anyone can afford-and that everyone will enjoy.
