

Worthy Your Consideration

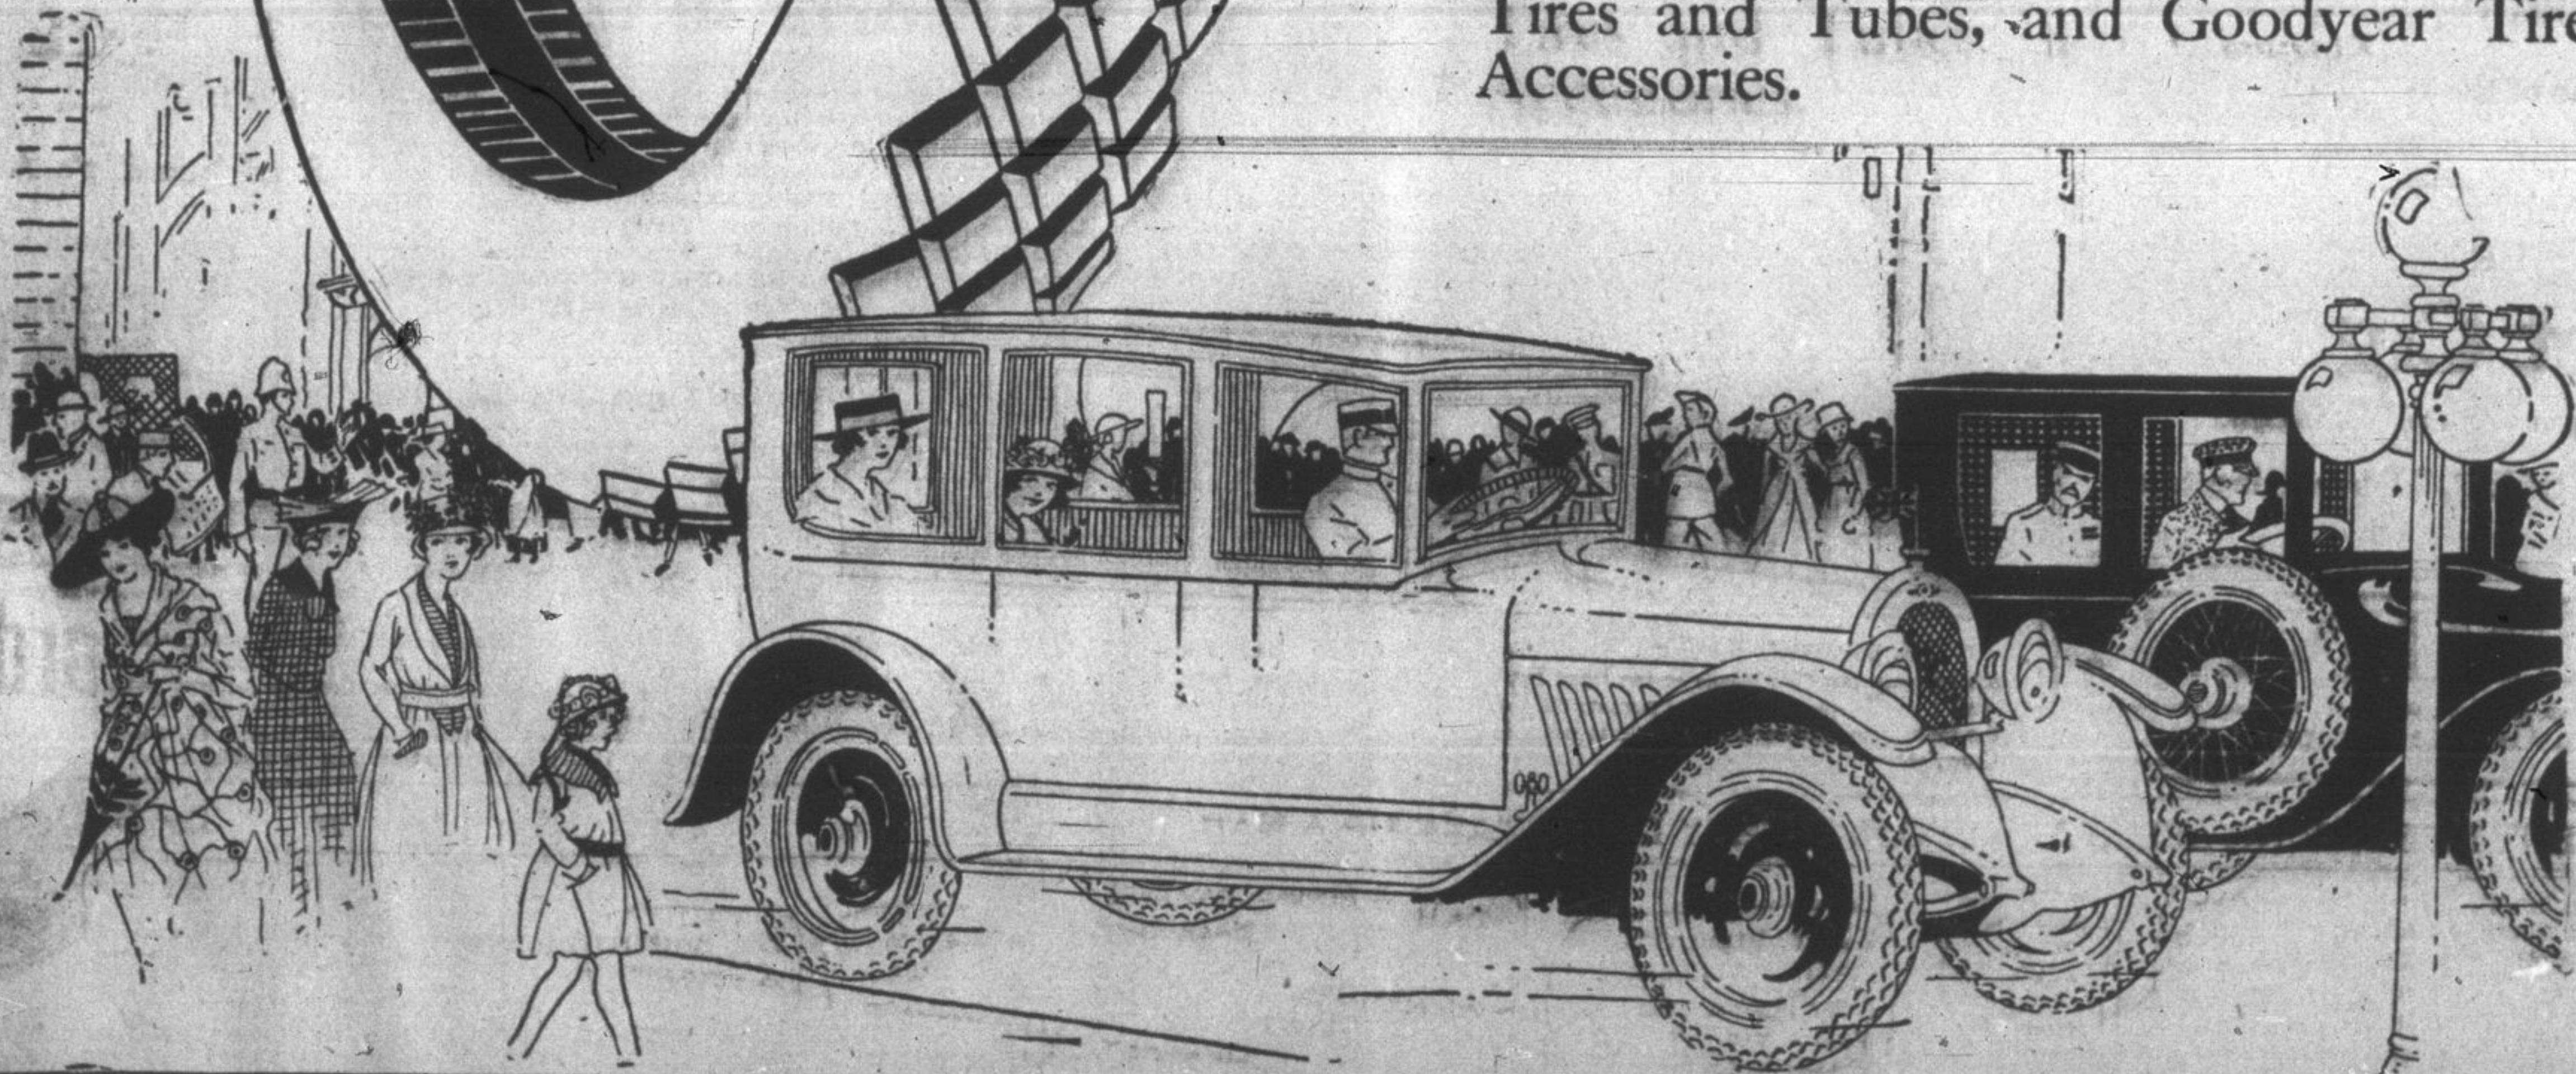

The tread on Goodyear Tires is indeed worthy your consideration.

It is the best guard against tire troubles man has been able to devise. It is double-thick and densely tough, studded with big, rugged, sharp-edged blocks—an effective barrier to most punctures, and a vigilant resistant to skidding. It is as sure-footed as a malamute in mud, or wet, and as serviceable as your car itself.

In the Goodyear laboratories, where the All-Weather Tread was evolved, were also developed the various Goodyear features—the On-Air cure, the No-Hook bead, the Rubber-Rivet construction, the Braided Piano-Wire base—all focused to the aim of giving you extreme mileage and freedom from trouble.

In our stock are the needed sizes of Goodyear Tires and Tubes, and Goodyear Tire-Saver Accessories.
