**THE BLATANT PAN-GERMANS**

**WIT L. DEMAND ENTENTE POSSESSIONS TO SECURE EMPIRE.**

Squeeze Out Rivals—Would Prevent Contiguous Opponents From Sending Men to Europe.

London, July 17.—In view of the triumph of the militarists in Germany as evidenced by the fall of von Kricheldorf, the Foreign Secretary, it is interesting to note what their leading newspaper, the Kreuz Zeitung, has to say about Germany's war aims. After remarking that "only weaklings can believe in the possibility of understanding with England proceeds:

"Victorious Germany will have no paper agreements. She will simply require of England, France, Belgium and Portugal the cession as an indemnity of such portions of their present possessions as she may need for the establishment of her Central African Empire in East Africa, Togoland, and South-West Africa. To be the corner pillars of this new colonial empire which Germany intends to develop into a great military power with carefully protected wireless stations, roads, railways, shore batteries and depots for raw materials, food and munitions."

The Kreuz Zeitung dangles before the eyes of the German public the idea of a great army of natives, remarking that the Hottentots especially provide excellent material for soldiers. It declares that in the military training of colored auxiliary troops Germany intends to take a great place among the nations.

The new policy will, says the Kreuz Zeitung, make that company of German Mittel Africans an armed and strong force of white and colored troops, which will never permit contiguous opponents to send a single man from African soil to the European seat of war unless they wish to abandon their own colonies.

**WEALTH OF SIBERIA.**

**Well Worthy Attention of Allies, Says Expert.**

London, July 16.—The potential wealth of Siberia is almost unlimited and the Allies should give the question of the current of its supplies their urgent attention, declared Herbert Woolmer, one of the chief authorities on the economic wealth of the Siberian regions, in an interview with Reuters' Limited.

Siberia, declared Mr. Woolmer, could export enormous quantities of cereals, livestock, fish, dairy products, precious and common metals, coal, shale, oil, timber, wool, skins, etc. The population was growing fast, the emigration into Siberia in the last decade being greater than that to Canada from outside sources in the same period. If Germany obtained control of the trans-Siberian line, he pointed out, it would not be very difficult for her to get food supplies and raw material from this territory—everything she needs, in fact, even to cotton from Tashkent.

As all this natural wealth must flow along the railway, he continued, the Allies should do their utmost to attract it northward towards Archangel and eastward towards Vladivostok by organizing and assisting the Russians to operate their railway, thus preventing the Germans from making use of these rich sources of revenue and supplies. The Allies, he insisted, should also make every effort to start again the work of enlarging the industrial plants of Russia, with a view of balancing the supply and demand in the country itself.

The chief object to keep in view, he said, was to satisfy the people most urgent needs and create a fresh among them the feeling of independence and the sense that they themselves were reorganizing their own country with the friendly help and assistance of their bid Allies.

**Telegraphic Staff Arrested.**

San Juan Del Sur, Nicaragua, July 17.—Robert Castro, for more than thirty years director-general of the telegraph lines in Costa Rica, has suddenly discharged all the telegraph operators at the central office in San Jose, the Costa Rican capital, and has had them arrested. The reason for the incarceration of the men is not known here.

The sum of \$18,693 was collected by the French Flag Day workers in Toronto.

**OTTAWA WOMAN SUFFERED 30 YEARS**

**Mrs. Bond Tells of Wonderful Improvement After Taking Tanlac.**

"I never thought I would let my name be used in a testimonial but Tanlac has done me so much good that I feel it my duty to tell others about it," said Mrs. Mary Bond of 42 Daly avenue, Ottawa, in an interview recently. Mrs. Bond has been a resident of Ottawa for thirty-five years and her statement will be read with interest by hundreds of people who know and respect her.

"I have suffered almost continually," she continued, "with my stomach for thirty years and had almost despaired of ever getting any better. Everything I would eat caused me to suffer agony. Almost immediately after eating my pain would begin. There was a gnawing sensation in the pit of my stomach and sometimes my suffering was almost beyond endurance. Many a time I sat down at the table and actually cried because I could not eat. Just as soon as I looked at the food I would turn sick and have to leave the table. I was troubled a great deal by the gas pressing on my heart, and for the past year now I have been unable to retain anything scarcely on my stomach. Even sweet milk disagreed with me. I never dared to eat meats or any of the more nourishing foods on account of the misery they caused me and had to live mostly on dry toast and other very light things. I would have attacks of vomiting that would completely exhaust me and my suffering, especially during the past ten years, just can't be described.

"I had very little idea that Tanlac would help me, just thought it was like everything else I had tried, but I had been taking it only a few days until I found it was making me feel better. I have taken five bottles now and am beginning to feel like a new person. My appetite is good and my stomach is so much better that I can eat most anything without it hurting me. I never had any indigestion now after meals and I have had a spell of vomiting since I began taking Tanlac. I sat down the other days and ate a big, nice piece of steak without it hurting me a particle and anyone can imagine how good I felt after having lived on such scanty diet for so long. Before I began on Tanlac I felt too weak and had to dress and go out anywhere, but I am so much stronger now that I can get around fine and my housework is a pleasure and I don't feel exhausted all the time. I have nothing but praise for Tanlac and I will gladly tell anyone personally just what it has done for me."

Tanlac is sold in Kingston by A. P. Chown, in Plevea by Gilbert Ostler, in Battersea by C. S. Clark, in Fernleigh by Erwin Martin, in Ardco by M. J. Scullion, in Sharbot Lake by W. Y. Cannon.

—ADVT.

**PUNISHED BY COMRADES.**

**Cadet Who Insulted Lady Tarred and Feathered.**

Toronto, July 17.—Following what his comrades considered unbecomingly conduct towards one of the young lady stenographers at Haydon House Barracks, R.A.F., a young cadet was seized and stripped of his clothing, his hands tied behind his back, and carried into the yard. The culprit appealed in vain for quarter. "We'll teach you to insult our girls," shouted one of the armen, and, despite his struggles, he was covered with what the men call "dope," and feathered, and then the fire hose was turned upon him.

He was admonished that a repetition of the offence would lead to more serious punishment.

**Will Apply For Divorce.**

Ottawa, July 17.—Notice appears in the Canada Gazette that William Lewis Evans, of Montreal, will apply to Parliament next session for a divorce from his wife, Dama-Mete Rogers, of New York.

**CASTORIA**

For Infants and Children  
In Use For Over 30 Years

Always bears the Signature of *Chas. H. Fletcher*

**BARRED FROM ENTRANCE**

**MATRICULANTS WITHOUT LATIN CANNOT ENTER COLLEGE.**

This Regulation Will Prevent an Abnormal Number of Applications—Men Will be on the Strength of C.A.M.C.

The announcement of the new regulations regarding the disposal of medical students have been received with much interest among the students of Queen's Medical Faculty. At present those who are liable for military service are in the Army Medical Corps at the various camps in the district. The new regulations will require them to remain in the army until they have completed their course when they will be granted commissions in the Canadian Expeditionary Force.

First year students who were not included in the previous order will now be called upon to report to the C.A.M.C. for service when they become liable to the M.S.A. and will be able to continue their studies at Queen's University during the winter months.

It is also the intention of the authorities to allow a number of matriculants to enter the medical colleges, and should their work be satisfactory they will be permitted to attend for the duration of the course, meanwhile being enrolled in the C.A.M.C.

The number who will be enabled to take advantage of this opportunity to continue their course in medicine without being drafted will be limited not only by reason of the regulations of the authorities, but also by the fact that a majority have not a full medical matriculation. It was stated that many had not completed their work in Latin at the high schools; and consequently as this is an essential subject they will be unable to enter the college. During the past few years pupils in the schools have shown a growing abhorrence for the "dead" languages and many have discontinued the study of them. This attitude has been apparent all over the province as well as at the K.C.I., and many youths otherwise fitted for a medical training will not be able to take up that profession, and will be liable for immediate military service when they become of age and are medically fit.

**SEVEN SENTENCE SERMONS.**

Dradgery is the grey angel of success.—Dr. Gannet.

This world and all our powers in it are far more awful and beautiful than even we know until some accident reminds us.—G. K. Chesterton.

For the love of God is broader Than the measures of man's mind, And the heart of the Eternal Is most wonderfully kind.—Faber.

You cannot dream yourself into a character; you must hammer and forge yourself into one.—Froude.

All thinking men and women get the main satisfaction of life, aside from the domestic joys, out of the productive work they do.—Charles W. Eliot.

Who steadfastly pursues his goal Despite what winds prevail, Nor loses courage from his soul Can never wholly fail. Susie M. Best.

The saddest sight in all the world is not a grave of the dead, grievous as that might be, but it is a grave of the living—humanity sepulchred while yet alive.—Frances E. Willard.

**JOE WELCH DEAD.**

**One of America's Best Known Hebrew Comedians.**

Bridgport, Conn., July 17.—Joe Welch, aged forty-five, one of the best-known Jewish comedians on the American stage, died here. He was walking around the ward of the hospital when stricken with a fainting spell and died in five minutes. He had been in the hospital about a month to recover his mental poise, and during the early period at the sanitarium showed signs of improvement, but of late suffered several relapses.

**BANK OF MONTREAL**

ESTABLISHED OVER 100 YEARS

For Tickets, Reservations, Literature and Information, apply to J. E. Brey, Station Agent, or M. C. Dunn, City Agent, or write R. L. Fairbairn, C.P.A., 48 King Street East, Toronto.

**CANADIAN NORTHERN**

**ALLIED LINE FROM ADRIATIC TO AEGEAN AND BERAT. CAPTURED ALBANIAN TOWN.**

**Polarine**

FRICITION REDUCING MOTOR OIL

"Makes a good car better"

**For Piston Pins**

PISTON pins receive the full force of every explosion. Unless their bearings are adequately cushioned with oil of correct body and lubricating qualities, they soon wear loose, with vibration that racks connecting rod and crankshaft bearings. Correct lubrication guards your motor against this danger.

**BEWARE OF "KNOCKS"**

Every "knock" in your engine is a danger signal. Knocks mean extra strain, excessive wear on moving parts. They foretell increased repairs—decreased intrinsic car value. And often the cause of these "knocks" is the use of the wrong lubricant. Don't wait for that metallic warning from a worn part before you realize that there is a great difference between lubricants. Help save your engine to-day from that possible breakdown of to-morrow by the use of

**Polarine**

FRICITION REDUCING MOTOR OIL

It has both body and lubricating qualities that minimize wear and friction. It flows freely at all temperatures—does not break down and run thin when your motor heats up. It lessens carbon trouble—softens vibration—keeps your car running smoothly and delivering full power day in day out.

Polarine is made in two grades—Polarine and Polarine Heavy. It is supplied in one-half, one and four gallon sealed cans, also in 12 1/2 gallon steel kegs, barrels and half barrels.

There are also Polarine oils and greases for effective transmission and differential lubrication.

Buy Polarine where you get Premier Gasoline—at the sign of the "Red Ball."

Write us at Room 704 Imperial Oil Bldg., Toronto, for interesting booklet on Polarine for Automobile Lubrication
