When out on patrol one night, Wood and another soldier were at a listening post up in No Man's Land. When he turned round, Fritz's men were only forty or fifty yards away and he was out in No Man's Land alone. He picked up his bombs and rifle and started for another shell hole, but before going far he fired a Mills bomb, and wounded eight out of thirteen 'of the attacking party. Two out of the remaining five started after him, while the others went to attend their wounded. They came so near that he had to manoeuvre to keep out of their way. He succeeded in killing one, and the other attacked him with his bayonet, giving him a slight cut,
