

YEAR 85, NO. 184

KINGSTON, ONTARIO, FRIDAY, AUGUST 9, 1918

SECOND SECTION

Careless Shampooing Spoils the Hair

If you want to keep your hair looking its best, be careful what you wash it with. Don't use prepared shampoos or anything else, that contains too much alkali. This dries the scalp, makes the hair brittle and ruins it.

LONDON DIRECTORY

(Published Annually) enables traders throughout the World to communicate direct with English Manufacturers & Dealers in each class of goods.

The London Directory Co., Ltd.

25, Abchurch Lane, London, E.C. 4.

The Telmann School of Music

Piano, violin and other stringed instruments; elocution and dramatic art. Pupils may begin at any date.

216 Frontenac Street. Phone 1610.

The inside of a violin needs cleaning once or twice a year. If a handful of dry barley, slightly warmed, is poured into the sound-holes and the instrument shaken carefully the dust will adhere to the barley and come out with the barley, through the sound-holes.

Music in the Home

Charm of String Quartet Music.

If a person were to offer a contribution of a five dollar cheque to every person found in this country at least who disliked violin music his bank account would not melt away very fast. Everybody enjoys good violin music.

Then comes the baritone of the quartet, the 'cello, with a range from soprano to bass. The tones of these four instruments blend perfectly, producing some of the very finest music available anywhere.

Study of Piano's Tonal Color. The pianist in his study of tonal effects is at a disadvantage in that he cannot remove to a certain distance to obtain the full effect.

Hints on Care of Violin. Dampness is the greatest enemy of violins. An accumulation of dust facilitates the entrance of dampness.

Feed Your Nerves. What tired nerves need is nourishment. Your blood has failed to supply this.

Berlioz Slept. One night Berlioz was awakened from a sound sleep. Something was tapping at his forehead, a feeling was gnawing at his heart.

Cannot Be Too Much Music. One of the few fields in which we have no need of the injunction to be moderate in all things is music.

And so to quote a third man who shows the right attitude: "music should not suffer during these war times. While a certain part of humanity seems out of harmony, temporarily, still the great universe preserves its eternal harmonious functions.

And so to quote a third man who shows the right attitude: "music should not suffer during these war times. While a certain part of humanity seems out of harmony, temporarily, still the great universe preserves its eternal harmonious functions.

HAD RATHER TAKE A BEATING THAN WORK

Toronto Man Felt Drowsy All the Time Before Taking Tanlac—Feels Fine Now

"When I began taking Tanlac I was actually too weak and rundown to stand on my feet or even to do a lick of work, but I am now putting in full time on my job and feeling better than ever."

"My trouble started about four years ago," he continued, "when I first noticed that my appetite was falling. I soon got so I didn't want to eat a thing and would bring half my lunch back home, and more than once I have actually gone for two whole days without eating a bite.

"I had been reading so much about Tanlac that I decided to try it and sent right away for a bottle. Before I had finished it my appetite came back, and I was eating and enjoying my meals like any normal person and that misery in my stomach was completely gone.

"Tanlac is sold in Kingston by A. P. Chown, in Florida by Gilbert Oster, in Battersea by C. S. Clark, in Fernleigh by Ervin Martin, in Ardock by M. J. Soullion, in Sharbot Lake by W. Y. Cannon.

"To fit a bridge properly is one of the most difficult things in violin repair. A cheap unfitted bridge is a poor investment.

"The pegs will tek and jump in certain weather. To remedy this take them out one at a time, rub a little chalk on and with the chalk a very very little soap. The trouble will then cease unless the pegs are so much worn that a new set is needed.

"The hair of a violin bow has minute teeth like a saw when observed under a microscope. These teeth wear away in time and the hair becomes so smooth it no longer grasps the strings. Then the bow needs re-hairing.

"If you have a spare room which you could rent—advertise it and get ready to buy more war bonds.

"To successfully string a violin a gauge should always be used. A new instrument will mature much more rapidly if the same size of strings are always used.

"When adjusting a new string it should be tuned up to pitch gradually.
