**More Trains for the Exhibition.**  
 It is customary each year for the Canadian railways to give special rates to the Canadian National Exhibition. This year there has been no public announcement regarding the intention of the railways in this respect, but it is understood that the local agents have received a circular giving them instructions regarding the matter and anyone applying to them will find the information available. The traffic congestion has been immeasurably improved since this time a year ago and prospects at the present time are that there will be a larger and better train service from all points to Toronto and return.

Albert J. Sly, Seely's Bay, has purchased the furniture and undertaking business of A. W. Burtch, Lansdowne.

**THE REO MOTOR CARS**  
 "The Gold Standard of Value."

**THE REO**  
 "All Seasons" Touring Car  
 (SEVEN PASSENGER)

When you buy a Reo Six you do not speculate—you invest in a product whose value is definite. You do not experiment—you know when you buy a Reo Six that you have received the car that is, at its price and in its class, the "Gold Standard of Value."

Could more be said of any automobile?

The very fact that the Reo engineers, the oldest organization in this industry and—as proven by the product they have made—the most progressive and the safest engineers—could find no place for improvement even in small details, is to say more than could be encompassed in a volume of laudatory matter.

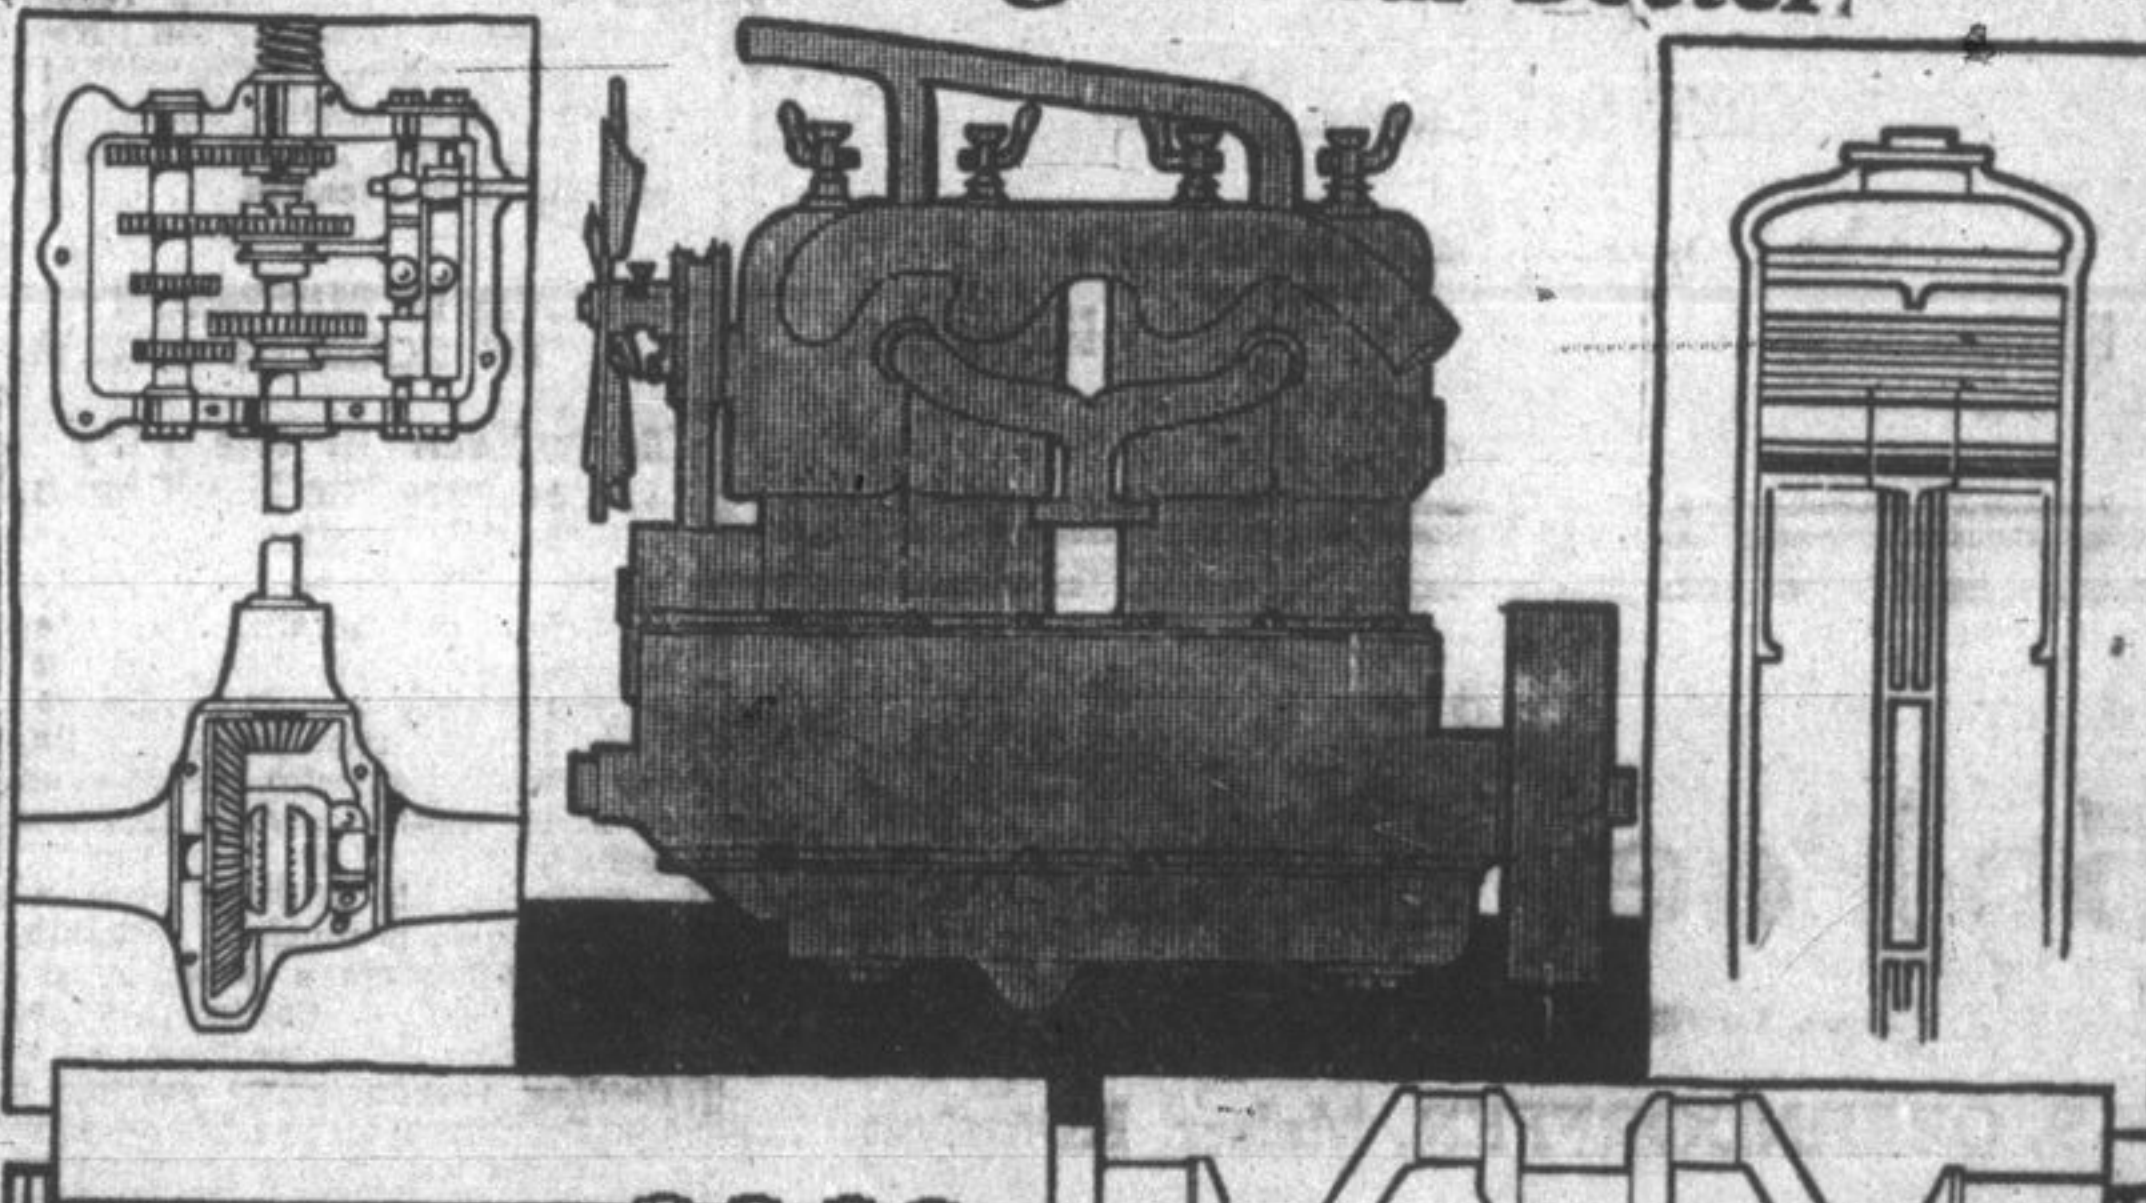

A few minutes in our showroom will convince you that the Six is "some" car.

**Polarine**  
 FRICTION REDUCING MOTOR OIL  
 "Makes a good car better."

**What's the Exchange Value of Your Car?**

**ENGINE** wear measures the worth of every car—determines its sale or exchange value. And lubrication largely governs wear.

Correct lubrication keeps a motor as good as new—cylinders smooth as glass, bearings in good condition, timing mechanism and valves working accurately, piston rings tight and compression good—every part of the motor running smoothly with the least possible wear.

**Polarine**  
 FRICTION REDUCING MOTOR OIL

cushions every friction surface with a wear-resisting oil film that does not break down and run thin when the motor heats. It flows freely in low or high temperatures—maintains the piston ring seal—insures maximum power from every drop of gasoline. It keeps motors fit—as good as new.

Polarine is made in two grades—Polarine and Polarine Heavy. It is supplied in one-half, one and four gallon sealed cans, also in 12½ gallon steel kegs, barrels and half-barrels. There are also Polarine oils and greases for effective transmission and differential lubrication.

Buy Polarine where you get Premier Gasoline at the sign of the "Red Ball."
