# Factors in Winning the War That Every Farmer Should Know

COME IN AND LET US SHOW YOU HOW YOU CAN MAKE MORE MONEY AND PRODUCE MORE FOOD FOR THE BOYS WHO ARE FIGHTING "OVER THERE."

THE FORD ONE-TON TRUCK.

One motor truck can do the work performed by several horse-drawn deliveries. Motor delivery service has proved to be cheaper than the use of horses, to say nothing of the better service to customers.

And the commercial car is an advertisement for the business man. It shows him to be progressive and will actually mean an increase in his patronage. For the farmer for cross-country trips, for hauling produce, grain and vegetables to market and mill—the motor truck is ideal. The "distance to town" is a handicap no longer.

And you can now get a Ford One-Ton Truck. This means you can buy a serviceable commercial car of one-ton carrying capacity and which embodies the desirable qualities of Ford sturdy construction and low up-keep expense.

The frame is built of heavy steel and is designed to carry one ton. The wheel base has been lengthened to 124 inches. The standard Ford motor, transmission and ignition are embodied in the truck. The present wide-spread Ford service arrangements may be enjoyed by all Ford truck owners.

A worm-drive rear axle system is used, geared down sufficiently to provide ample power for transporting a one-ton load at moderate speed. The emergency brakes on the rear wheels are strong and entirely adequate for truck requirements. The rear wheels have been equipped with solid tires.

It is to your advantage to see the new One-Ton Truck. This newest Ford model is now on display at the Ford headquarters in your town.

Whether you want to spend forty dollars or four hundred—whether your business requires the carrying of pig iron or cut flowers—you can have a body designed for your individual needs. You buy the chassis and then equip it with exactly the type of commercial body best suited to your requirements.

In many instances, if you were compelled to buy your truck with a stock body you would be unable to get the style of equipment you desire.

Your range of selection for bodies to fit this Ford One-Ton Truck chassis is practically unlimited. This advantage gives you the privilege to own, at low cost, a really "custom made" truck.

THE FORDSON—HENRY FORD'S LATEST TRIUMPH.

In developing the "FORDSON" Tractor, the aim has been to produce a small tractor which will be low in first cost, reliable, and above all—efficient.

Being small, light and economical, the "FORDSON" Tractor is adapted for use on small farms, as well as on the largest. It will pull all farm implements and do the work generally done by horses on farm. In addition, by "FORDSON" a truly universal tractor.

In design and construction the "FORDSON" takes a long step in approaching the ideal tractor. The simplicity of its operation and construction will at once appeal to the farmer.

Special devices were perfected to keep out the dust and dirt. All moving parts are enclosed and thoroughly lubricated. The number of lubricating points requiring attention are very few and easily gotten at.

The motor, transmission and rear axle are assembled together, forming one rigid unit, which, combined with the three-point suspension, relieves these parts of all strain.

The absence of any frame gives accessibility to all parts for making adjustments or repairs, and allows the tractor to be taken apart in a few minutes.
