**ACIDS IN STOMACH CAUSE INDIGESTION**

Create Gas, Sourness and Pain How To Treat.

Medical authorities state that nearly nine tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach and not as some believe to a lack of digestive juices. The delicate stomach lining is irritated, digestion is delayed and food sours, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist a few ounces of Bisurated Magnesia, and take a teaspoonful in a quarter glass of water right after eating. This sweetens the stomach, prevents the formation of excess acid, and there is no sourness, gas or pain. Bisurated Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Because this is an era of high prices for merchandise does not signify that competition between stores has come to an end. You may, through studying the ads, secure just as great advantages in buying as you are accustomed to thus secure in peace times.

Smith's Falls is to have two captured German guns, claimed for that town by Lieut. Harwood McKimm, of the 2nd Canadian Battalion.

**CALVARY PRESENTATIONS**

TO REV. JOHN AND MRS. LYALL, THURSDAY EVENING.

Pastor Leaving For the West—The Congregation Expressed Its Appreciation of the Splendid Services He Had Rendered.

On Thursday evening a pleasant social time was held at Calgary church, when the members of the church and Young People's Society assembled to bid farewell to Rev. Mr. and Mrs. John Lyall and son, who leave on Monday for the west. The Ladies' Aid of Bethel church and Rev. Mr. and Mrs. Hayner, of the First Congregational church, were present. A selection was given by the choir, and a solo by Mrs. Morris. Miss Edna Revell, on behalf of the members of the church, read an address, and presented a purse to Rev. Mr. and Mrs. Lyall, as a token of their kind and helpful services during their work at Calgary church. Mr. Lyall responded, and wished the church every success in the near future. Then Rev. Mr. Rayner addressed the meeting, conveying the best wishes of the First Congregational church and the Ministerial Association of the city to Mr. and Mrs. Lyall in their new field of labor. After this George Allen, on behalf of the choir and Young People's Society, thanked Mr. Lyall for his help in the work, and presented him with an umbrella from the society. The meeting was closed with the national anthem, after which refreshments were served.

**Round Heads Menace Mankind**

**R**OUND heads and Alpine blood seem to be the trouble with the German people, according to a recent observation in the Medical Times. The comment, which is in the form of an editorial, calls attention to the generalizations made upon European peoples by writers such as Henry Fairfield Osborn, the well-known paleontologist, and Madison Grant, New York zoologist and explorer. The brachycephalic German, round-headed, it is declared, owes his origin to the Alpine invasion. The editorial continues:

"Skulls with an index of 75 or less—that is, when the width is only a little more than three-fourths of the length, or less, are considered dolichocephalic, or long skulls. Skulls of an index of 80 or over are round skulls, or brachycephalic (broad). The cephalic index is computed by multiplying the width by 100 and dividing by the length. The European population is divided into three distinct sub-species, one northern and one southern, both dolichocephalic or characterized by a long skull, and a central sub-species which is brachycephalic, or characterized by a round skull.

"Grant remarks that 'While the inhabitants of Europe betray as a whole their mixed origin, nevertheless the three main sub-species are each found in large numbers and in great purity.'

"The Nordic or Baltic sub-species is a long-skulled race, tall, fair-skinned, light-haired and blue-eyed. This group includes the Scandinavian and Teutonic peoples.

"The Mediterranean or Iberian peoples are long-skulled and have dark eyes, hair and skin. This sub-species is short in stature in comparison with the tall Nordics.

"The Alpines occupy all central and eastern Europe, extending through to Asia Minor. They are round-skulled, sturdy and of medium height. Their hair and eyes were originally very dark.

"The people of the British Isles are made up of a fusion of the long-headed Nordic and Mediterranean races. There are no round-headed Alpines. This fact, according to Grant, makes the desire of the Irish to separate themselves from their English brothers rather absurd on ethnic grounds, for the Irish belong to the Nordic group and are only a Celtic-speaking people. The true Celts were of Alpine stock.

"The rank and file of the German army is largely composed of a pure

or admired Alpine type or softer. The officers are everywhere recruited from the Nordic upper class. At least six-sevenths of the German people are not of Nordic or Teutonic stock.

"In comparison with the other white races, the intellectual qualities of the Alpine race have always been mediocre. While the Nordic race has furnished a brilliant succession of military leaders, statesmen, explorers, organizers, aristocrats and inventors throughout its entire history, the Alpine race has consisted always of peasants, and has never been a seafaring people, which means that they have not developed one kind of bold initiative nor acquired that which intercourse with the peoples who dwell on the shores of the Seven Seas has made part of the Nordics' intelligence and equipment.

"And so the argument runs that the overwhelming of the Nordic stock in Germany by the Alpine invasion has resulted in intellectual and moral deterioration, while there has been a military development along lines of unparalleled brutality. Thus the otherwise inexplicable barbarity of the German armies finds a plausible explanation.

"A few hundred years ago the so-called Germanic peoples were preponderantly Teutonic, but the Alpine stock has steadily crowded northward, supplanting the Nordic stock as it underwent degeneration in the course of inter-racial strife in past centuries and during the terrible slaughter of the Thirty Years' War. To-day the majority of the Wurtembergers, Bavarians, Austrians and Tyrolese are merely Teutonized Alpines who have exerted but little influence upon European culture. The rank and file of the Prussians are nothing more nor less than Teutonized Wendes and Poles of Alpine extraction. Their round, broad heads betray their origin.

"The revolution of 1848, viewed ethnically, was really a revolt against the intellectual insolvency and moral bankruptcy of a government brutalized by the decadent influence of the race substitution that we have outlined. The revolutionists were liberty-loving Teutons of the old Nordic strain, representing the vigor, valor and manhood of chivalrous progenitors.

"We are at war with hordes of round-headed Alpines led by Nordic stock which has rejected all the ideals and sentiments which have characterized intellectually the Teutonic peoples of centuries. Viewed in this light, the distinction between the German people and the German Government seems worse than academic.

"Hindenburg himself personifies dominant and brutal force, devoid of idealism and with little or no imagination, for he is of round-headed Alpine extraction.

"The truth of the matter is that the so-called Germanic race has been ethnically bankrupt for over one hundred years. The present military outbreak is but the evidence of this intellectual insolvency and moral bankruptcy, and the time has arrived for the whole world to sit as a solemn court of judgment and appoint a civilized receiver to either wind up or reorganize the national Germanic military establishment."

Since the convoy system was successfully adopted some 20,000,000 tons of food and 35,000,000 tons of munitions have been brought in convoy to England and the food lost have been reduced from nearly ten per cent. to one per cent.

Thousands of Germans are expressing their approval of Prince Liepowsky's version of the origin of the war and are demanding that the false prophets and wrong-headed leaders of Germany shall be banished.

It is not always the truest patriot who makes the biggest demonstration every time he sees the flag.
