That is a very gratifying condition, and if it can be maintained we should conclude the year with at least \$100,000,000 to place against the cost of the war.

AFTER THE MEASLES

Measles is a disease that is very hard on children, and it generally leaves the system in such a debilitated condition that it is liable to attacks of some other trouble. One of the most common of these is bronchitis, which starts with a short, painful, dry cough, a feeling of tight ness through the chest and difficulty of breathing, accompanied by wheezing sound from the lungs.
