John Ashley Is Like New Now Since Taking Tanlac-Gained 30 Pounds

The best evidence of the merits of a medicine is what people who have actually taken it have to say about it. And this is true and beyond all question when such statements are made by people of high character and published right in the community | ual meeting on Wednesday evening where each fact can be investigated to elect officers. A number of young

"The best proof I can give that Tanlac was the right medicine for me is the way it has relieved my suffering and built me up. My normal weight is around one hundred and result of a bad stomach and other troubles until I was getting to look fike a skeleton. Why, when I first started on Tanlac I weighed only one hundred and seventeen pounds and 1 now tip the scales at one hundred and forty-seven. Think of it; I have actually gained thirty pounds and have only taken four bottles of Tan-

"Last June my stomach got all out of order so that I couldn't eat without also badly constipated, suffered from a sluggish liver and would often have dizzy spells when my head seemed to be going round and round. I was under treatment for several months but in place of getting better I was going down hill rapidly. I couldn't work and simply felt all rundown and miserable all the time.

"Finally one of my neighbors advised me to try Tanlac and almost as soon as I commenced taking it I started to straighten up. il have taken four bottles now and without going into detail about my wonderful improvement with each bottle, I'li just say I am like a brand new man. I haven't lost a day from work in two months. Tanlae is great medicine for the stomach and, for constipation. I have never run arcoss anything as good as the Tanlac Laxa- are on the way to recovery. Science Saves Teeth

By Applying a Digestant Nowadays

All Statements Approved by High Dental Authorities

That Slimy Film Is What Wrecks Teeth

Millions of people who brush teeth daily find that they still discolor, still decay. Tartar forms, and pyorrhea often gets a start. Every few weeks a dental cleaning becomes

Statistics show that tooth troubles have been constantly increasing, despite the wide use of the tooth brush.

Science finds the reason in a film. That slimy film which you feel with your tongue causes most tooth troubles.

That is what discolors - not your teeth. It is the basis of tartar. It holds food substance which ferments and forms

acid. It holds the acid in contact with the teeth to cause decay. Millions of germs breed in it. The dental name for this film is "bacterial plaque." Those germs, with tartar, are the chief cause of pyorrhea. They also lead to other serious

That film clings to the teeth. It gets into crevices, hardens and stays. The ordinary dentifrice cannot dissolve it. Soapy tooth pastes even help to make it cling.

That is why the tooth brush has proved disappointing. It removed food debris, and the teeth seemed clean. But the great tooth destroyer - which is film - was left to do its

Now dental science has evolved an efficient film combatant. Clinical tests under able authorities have proved this fact beyond question. Now the method is embodied in a dentifrice called Pepsodent, and leading dentists everywhere are urging its adop-

To hasten this we are supplying this 10-Day Tube

for home tests.

The New-Day Dentifrice

See for Yourself What This New Way Does

Pepsodent will prove itself to anyone who tries it. So we supply this 10-Day Test Tube free. And we urge you to try it, for your sake and your children's sake, and see for yourself what it does.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it.

Pepsin long seemed impossible. It must be activated, and the usual method is an acid, harmful to the teeth. But dental science has evolved a harmless activating method. Five governments have already granted patents. In the opinion of experts, that method - used in Pepsodent - will bring about a dental revolution.

To avoid mistake, able authorities have submitted Pepsodent to many careful tests. They have watched the results in thousands of cases, and watched them for years in some.

Now the time has come when everyone should know it, and at once. So we have supplied free 10-Day Tubes to the stores named below. And we urge every household to get one there this week.

Use it like any tooth paste and watch results. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how the teeth whiten - how they glisten -as the fixed film disappears.

Just let it prove itself. Judge it by the clear results, and by the reason for them.

Then decide for yourself what filmless teeth will mean to you, and if Pepsodent insures them. This test is most important to
