

YEAR 86, NO. 84

KINGSTON, ONTARIO, WEDNESDAY, APRIL 9, 1919

SECOND SECTION

FARMERS' BUSINESS

For the past 54 years, this Bank has given particular attention to the business of Farmers.

We have helped many over the rough places, and have aided many more to the highest plane of success.

We are prepared to extend you every aid within legitimate banking practice.

Come in at any time and talk over your affairs with us. You are always welcome.

THE MERCHANTS BANK OF CANADA

Head Office: Montreal. Established 1864. Kingston Branch, H. A. TOFIELD, Manager. Vernon Branch, J. W. McCLEMMONT, Manager.

What COMFORT LYE

Comfort Lye is a very powerful cleanser. It is used for cleaning up the oldest and hardest dirt, grease, etc. Comfort Lye is fine for making sinks, drains and closets sweet and clean. Comfort Lye kills rats, mice, roaches and insect pests. Comfort Lye will do the hardest spring cleaning you've got. Comfort Lye is good for making soap. It's powdered, perfumed and 100% pure.

GREETINGS, COMRADE. -Dallas, Texas, News.

PEOPLE MUST BE EDUCATED. IT HAS NO EQUAL

TO BE RULED BY SCIENTIFIC MEN ALONG MEDICAL LINES.

Dr. C. K. Clarke, of Toronto, formerly of this city, addressed the Canadian Club at Luncheon on Tuesday—Must be Careful of Our People to Build Up a Strong Nation.

That the people must be educated to be ruled by scientific men along medical lines, was one of the outstanding points of an admirable address given by Dr. C. K. Clarke, of Toronto, before the members of the Canadian Club at their noonday luncheon, held in the Frontenac Club on Tuesday.

In introducing Dr. Clarke, who was formerly at Rockwood Hospital, and who is now engaged with special work for the Ontario Government, Mr. Elliott welcomed the guest of honor as a distinguished Canadian and an old friend of many of the gentlemen present.

"We all knew Dr. Clarke in former days," added Mr. Elliott, "and we appreciated him in all the activities in Kingston. Dr. Clarke has been away from Kingston for a number of years, and Kingstonians have watched with a great deal of pride the success he has attained in the larger sphere to which he went."

Dr. Clarke expressed his pleasure at being back in Kingston again, and having the opportunity of meeting so many of his old friends, and made reference to his stay in the city when he held a position at Rockwood Hospital.

Dr. Clarke naturally took up the medical question in his address, and at the outset stated that he had held the opinion that the insane were not being properly cared for, even in Canada, and incidentally the speaker took a good rap at politicians, when he declared that politics were responsible for poor treatment given some of the unfortunates of unsound mind.

"So far as social matters are concerned," said the speaker, "politicians are a curse to the country. The political patronage is the cause of so much deficiency in the matter of the service given in institutions. It is not a question of getting a man who can fill the position, but that of getting a position for a man to whom there is something owing, on account of service rendered the party."

Dr. Clarke went on to tell of steps which are being taken to cope with questions of the utmost importance to the people's health.

"We must be careful of our people if we are to build up a strong nation," said Dr. Clarke, who also explained how the very best of care must be taken to prevent the spread of disease. He said that the people should be educated to be ruled by scientific men. In this regard it would be necessary to have both the support of the press and the public. The passing of laws would not get you anywhere, although there were many who wanted a law passed for every evil. The best plan was by way of educating the public.

At the close, Mr. Elliott extended to Dr. Clarke the thanks of the members for his admirable address.

No Medicine Did Him Any Good Till He Took Tanlac.

"Tanlac has convinced me that it has no equal for people in the condition I was in, for it has made me feel like a different person," said Edward Hooper, 2062 St. Clair Ave., Toronto, Ont.

"For four years," he continued, "I suffered from an awful case of stomach trouble. My appetite failed and the little I forced down hurt me. I felt like there was a lump right in the pit of my stomach and was constantly belching up sour, undigested food. I would get so dizzy that I would almost fall. I had dull headaches and felt unfit for work. I felt I was getting worse and don't believe I could have kept up much longer."

"I have taken four bottles of Tanlac now, and am feeling fine. My appetite is great, and I haven't been sick since I started taking Tanlac. All that bloated feeling is gone, the dizziness has left me and I actually feel like a different person."

Tanlac is sold in Kingston by A. F. Chown, in Plevna, by Gilbert Foster, in Baginbasa, by C. S. Clark, in Ferenburgh, by Ervin Martin, in Ardlock, by M. J. Scullion, in Sharbot Lake, by W. Y. Cannon.—Advt.

tion of a new hotel was put before the public.

Dr. Clarke arrived in the city Monday night. Every room in the hotel he registered at was filled, and the other "spots," as the clerk referred to them, but the management did the very best they could for him, and that was to let him share the parlor with a fellow traveller from Cobourg. The hotel management did the very best they could for Dr. Clarke, and as they were filled to capacity, therefore, they could do no more, but what about the other fellows who, arriving in the city later on that night?

It is stated that every night travellers have to sleep in chairs, in the rotundas of local hotels, and on a night of big "doings" in the city it is stated that they are very lucky if they are able to get a chair. Travellers who are wise to local conditions here know to go through to Brockville or Belleville as the case may be, spend the night there, and then double back to Kingston the next morning. This is bad business for the travellers, and it is also bad business for the city. True, this is not a good advertisement for the city, but nevertheless it is a fact.

And the experience of Dr. Clarke is just another of the many cases where the need of a new hotel has been emphasized.

In his address to the members of the Canadian Club, Dr. Clarke, in a

"DANDERINE" FOR FALLING HAIR

Stop dandruff and double beauty of your hair for few cents.

Dandruff causes a feverish irritation of the scalp, the hair roots shrink, loosen and then the hair comes out fast. To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of "Danderine" at any drug store for a few cents, pour a little in your hand and rub it into the scalp. After several applications the hair stops coming out and you can't find any dandruff. Your hair appears soft, glossy and twice as thick and abundant. Try it!

Cocunut Oil Fine For Washing Hair

If you want to keep your hair in good condition, be careful what you wash it with.

Don't use prepared shampoos or anything else, that contains too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just plain malified cocunut oil which is pure and entirely greaseless, is much better than anything else you can use for shampooing, as this can't possibly injure the hair.

Simply moisten your hair with water and rub it in. One or two teaspoons will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily, and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get malified cocunut oil at most any drug store. It is very cheap, and a few ounces is enough to last everyone in the family for months.

BEATTY LEAVES FLEET.

Speculation as to Whether He Will be First Sea Lord.

London, April 9.—On the dispersal yesterday of the Grand Fleet Vice-Admiral Sir David Beatty hauled down his flag as commander-in-chief.

All the newspapers publish articles on the historic occasion, dwelling on the fact that its purpose was achieved with the complete destruction of the enemy's naval power. They pay tribute to Lord Jellicoe as the organizer and leader, and Vice-Admiral Beatty as a first-class fighter, who crowned Lord Jellicoe's work.

There is some speculation whether Sir David Beatty, now unemployed, will be offered the post of First Sea Lord, the importance of which position, it is now pointed out, has never been greater in view of the possible effect of the League of Nations, upon Britain's naval policy.

It is also urged that a properly organized naval general staff must never again be allowed to lapse.

MINEFIELDS CLEARED.

Sweden Has Swept or Destroyed "Pills" Planted in War.

Washington, April 9.—The Swedish Ministry of Marine has notified navigation interests that Sweden has taken up or destroyed the mines and minefields planted during the war in Swedish territorial waters as a protection against belligerent submarines. A copy of the notification received by the State Department warns shipping against possible danger from stray mines during storms.

IN FLANDERS FIELDS

The Whig has prepared a very beautiful calendar printed in three colors and containing the immortal poem by Col. John McCrae, known now wherever the English language is spoken—"In Flanders Fields."

This beautiful lyric of the war was written by Col. McCrae, of Montreal, during the second Battle of Ypres. As an inspiration to war giving and war sacrifices it strikes a major note.

The illustration that adorns the calendar is one of unusual attraction. It shows the red poppies blooming amid the crosses on Flanders fields, while in the air above are the spirits of the departed heroes calling to those who remain to "take up our quarrel with the foe." It shows them throwing the torch from their falling hands with their parting admonition to "hold it high," as otherwise,

"We shall not sleep, though poppies grow in Flanders fields."

These calendars will be distributed free to every reader of the Whig who cares to call at the office and ask for one. The calendar is a product of the Whig's Job Department and is a work of art throughout.
